## MOTION CONTROL DRIVES

# SINAMICS S210

## Servo Drive System

[siemens.com/d32](https://www.siemens.com/d32)

Dear Customer,

We are pleased to present you with the new edition of the Catalog D 32 · January 2024. The catalog provides a comprehensive overview of the SINAMICS S210 servo drive system and supersedes Catalog D 32 · April 2023.

The SINAMICS S210 servo drive system consists of a SINAMICS S210 servo converter, a SIMOTICS S servomotor and the associated MOTION-CONNECT connection technology as One Cable Connection (OCC) technology.

The single-axis AC/AC servo converter system stands out due to its high performance and dynamic response.

In addition to updates and technical modifications, the new edition of the catalog has also been supplemented with news for the innovated version of the SINAMICS S210 servo converters under the designation "SINAMICS S210 servo converters (New)" and new versions of the SIMOTICS S-1FT2 servomotors.

The products listed in this catalog are also included in SiePortal. Please contact your local Siemens office for additional information.

Up-to-date information about SINAMICS S210 and matching SIMOTICS motors is available on the internet at:

[www.siemens.com/sinamics-s210](https://www.siemens.com/sinamics-s210)

You can access SiePortal online at: <https://sieportal.siemens.com>

Your personal contact will be happy to receive your suggestions and recommendations for improvement.

You can find your representative in our Personal Contact database at: [www.siemens.com/automation-contact](https://www.siemens.com/automation-contact)

We hope that you will often enjoy using Catalog D 32 · January 2024 as a selection and ordering reference document and wish you every success with our products and solutions.

With kind regards

A handwritten signature in blue ink, appearing to read 'Frank Golüke', written in a cursive style.

# Digitalization in drive technology

## From the digital world to the real world

[siemens.com/digital-drives](https://www.siemens.com/digital-drives)

### *Increase your transparency and productivity by digitalizing your drive technology*

Many drives are used in the manufacturing and process industries. They produce lots of data anyway – why not use them to increase the availability and productivity of machines and plants?

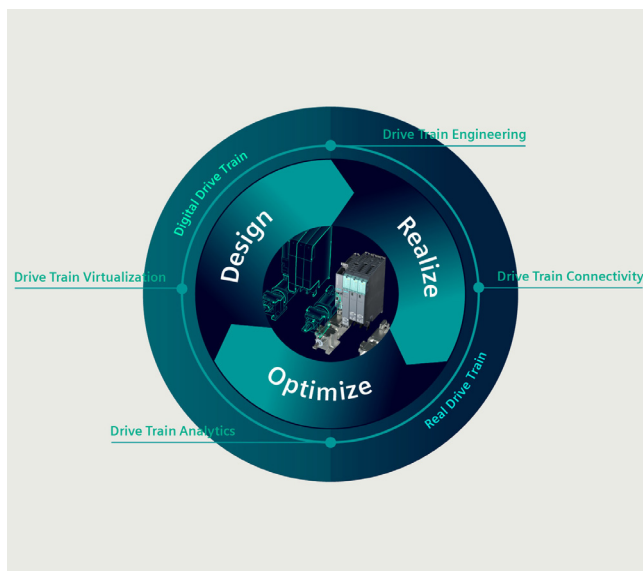

Drive technology offers the ideal entry point into the world of digitalization – for plant and machine builders as well as for users.

The digitalization portfolio for the drive train spans over the complete life cycle – from the design phase to realization and optimization – in the digital and the real world.

Our portfolio contains drive simulation solutions and efficient engineering tools, comprehensive connectivity that allows drives to be easily linked to the relevant platforms as well as smart analytics (e.g. cloud and edge apps) and drive system services.

These solutions enable you to gain a better understanding of processes, states and utilization. The health status of the drive train can be monitored and analyzing drive data enables an early detection of anomalies and reduces downtimes. This way, availability and productivity of machines and plants can be increased and the actual maintenance demand can be identified. Furthermore, data-based business models and service offerings are facilitated.

### *Our digitalization portfolio covers all phases of the life cycle: from the design phase to realization and optimization. It covers the digital and the real drive train.*

**Design:** By creating a digital twin of the drives, machine builders can shorten their time-to-market since they can design, simulate and optimize their machine before ordering any material or products. Together with other tools from the engineering box, simulation can also speed up the engineering phase of drives and entire machines, for example by virtual commissioning of the PLC.

**Realize:** Once the machine is in operation, the drives can be connected to other platforms, for example to the cloud and Industrial Edge. This creates transparency in terms of what is going on inside the drive train, e.g. with regard to the actual current, torque and speed.

**Optimize:** To understand the collected data, our drive train analytics portfolio provides algorithms and analysis tools to unlock the potential of the data and turn the gained transparency into insights and valuable knowledge. These insights can then again be used in the design phase of the next life cycle, thus closing the loop.

## Benefits of drive train digitalization

### Machine builders

#### Availability

Increase the availability of your machines

#### Speed

Shorten time-to-market

#### Business models

Develop new service and business models

### Machine operators

#### Productivity

Increase the productivity of your production

#### Flexibility

Increase the flexibility of your production

#### Efficiency

Identify potential for optimization

### Benefits for machine and plant builders

- Increased availability of machines and plants – thanks to digital options for checking and implementing design improvements and comprehensive monitoring of drive systems
- Shorter time-to-market and faster development times – thanks to practical software tools and a continuous database for concurrent development processes as well as virtual simulations, tests, and commissioning of machines and plants
- New options for future service and business models – ranging from customized application solutions and digital services to contractually guaranteed availabilities of machines and plants

### Benefits for machine and plant operators

- Increased availability and productivity of production, fewer unscheduled downtimes – through the early detection of deviations and emerging risks thanks to digital drive monitoring
- More flexible production down to batch size 1 – through more effective use of knowledge from existing production lines thanks to transparent utilization, states, locations, and capacities down to the drive level
- Identification of potential for optimization to make production faster, better, and more efficient thanks to data-based transparency – for example, for faster modifications, simpler quality control, and the early prediction of maintenance demand as well as demand-oriented maintenance

# TIA Selection Tool – quick, easy, smart configuration

For you to get the most out of our portfolio quickly and easily.

Do you always need the optimum configuration for planning your project?

For your application we offer the TIA Selection Tool to support all project planners, beginners and experts alike.

No detailed portfolio knowledge is necessary.

TIA Selection Tool is available for download as a free desktop version or a cloud variant.

## Your Advantages

### Quick

- Configure a complete project with just a few entries – without a manual, without special knowledge
- Import and export of hardware configuration to TIA Portal or other systems
- Ideal visualization of the projects to be configured

### Easy

- Tool download either as desktop version or web-based cloud version
- Technically always up-to-date about product portfolio and innovative approaches
- Highly flexible, secure, cross-team work in the cloud
- Direct ordering in SiePortal

### Smart

- Smart selection wizard for error-free configuration and ordering
- Configuration options can be tested and simulated in advance
- Library for archiving sample configurations

The TIA Selection Tool is a completely paperless solution.

# Sustainability @Siemens

Transforming the everyday to create a better tomorrow.

- Decarbonization**
- Ethics**
- Governance**
- Resource Efficiency**
- Equity**
- Employability**

For more information, see [www.siemens.com/sustainability-figures](http://www.siemens.com/sustainability-figures)

As a company, Siemens considers environmental, social and governance (ESG) criteria from all angles with its DEGREE framework (decarbonization, ethics, governance, resource efficiency, equity and employability). We are not only committed to reducing the carbon footprint in our own operations to net zero by 2030, but also helping our customers achieve their decarbonization and sustainability goals.

## Mission & strategy

As a focused technology company, Siemens is committed to addressing the world's most profound challenges by leveraging the synergies between digitalization and sustainability.

## Technology with aim and purpose

We develop technologies that connect the real and digital worlds and enable our customers to positively transform the industries that form the backbone of our economy: industry, infrastructure, transportation and healthcare.

## Our contribution

Siemens makes an impact every day by providing innovative solutions in response to challenges relating to environmental protection, decarbonization, health and safety. Innovative solutions that have a clear goal: to make the world more sustainable, more integrative and a better place to live.

## Sustainability facts

For almost 175 years, Siemens has been driven by the desire to improve the lives of people around the world with our technologies.

# System overview

## The SINAMICS converter family

### Overview

#### Integration in automation

#### Totally Integrated Automation and communication

SINAMICS is an integral component of the Siemens "Totally Integrated Automation" concept. Integrated SINAMICS systems covering configuration, data storage, and communication at automation level ensure low-maintenance solutions with the SIMATIC, SIMOTION and SINUMERIK control systems.

Depending on the application, the appropriate variable frequency drives can be selected and incorporated in the automation concept. With this in mind, the drives are clearly subdivided into their different applications. A wide range of communication options (depending on the drive type) are available for establishing a communication link to the automation system:

- PROFINET
- PROFIBUS
- EtherNet/IP
- Modbus TCP
- Modbus RTU
- AS-Interface
- BACnet MS/TP

#### Applications

SINAMICS is the comprehensive converter family from Siemens designed for machine and plant engineering applications. SINAMICS offers solutions for all drive tasks:

- Simple pump and fan applications in the process industry
- Demanding single drives in centrifuges, presses, extruders, elevators, as well as conveyor and transport systems
- Drive line-ups in textile, plastic film, and paper machines as well as in rolling mill plants
- Highly dynamic servo drives for machine tools, as well as packaging and printing machines

## Overview

**SINAMICS as part of the Siemens modular automation system****Innovative, energy-efficient and reliable drive systems and applications as well as services for the entire drive train**

The solutions for drive technology place great emphasis on the highest productivity, energy efficiency and reliability for all torque ranges, performance and voltage classes.

Siemens offers not only the right innovative variable frequency drive for every drive application, but also a wide range of energy-efficient motors for combination with SINAMICS.

Furthermore, Siemens supports its customers with global pre-sales and after-sales services, with over 295 service points in 130 countries – and with special services e.g. application consulting or motion control solutions.

**Energy efficiency**Energy management process

Efficient energy management consultancy identifies the energy flows, determines the potential for making savings and implements them with focused activities.

Almost two thirds of the industrial power requirement is from electric motors. This makes it all the more important to use drive technology permitting energy consumption to be reduced effectively even in the configuration phase, and consequently to optimize plant availability and process stability. With SINAMICS, Siemens offers powerful energy efficient solutions which, depending on the application, enable a significant reduction in electricity costs.

# System overview

1

## The SINAMICS converter family

### Overview

#### Up to 70 % potential for savings using variable-speed operation

SINAMICS enables great potential for savings to be realized by controlling the motor speed. In particular, huge potential savings can be recovered from pumps, fans and compressors which are operated with mechanical throttle and valves. Here, changing to variable-speed drives brings enormous economic advantages. In contrast to mechanical control systems, the power consumption at partial load operation is always immediately adjusted to the demand at that time. So energy is no longer wasted, permitting savings of up to 60 % – in exceptional cases even up to 70 %. Variable-speed drives also offer clear advantages over mechanical control systems when it comes to maintenance and repair. Current spikes when starting up the motor and strong torque surges become things of the past – and the same goes for pressure waves in pipelines, cavitation or vibrations which cause sustainable damage to the plant. Smooth starting and ramp-down relieve the load on the mechanical system, ensuring a significantly longer service life of the entire drive train.

#### **Variants**

Depending on the application, the SINAMICS converter family offers the ideal variant for any drive task.

#### Regenerative feedback of braking energy

In conventional drive systems, the energy produced during braking is converted to heat using braking resistors. Energy produced during braking is efficiently recovered to the supply system by versions of SINAMICS G and SINAMICS S drives with regenerative feedback capability and these devices do not therefore need a braking resistor. This permits up to 60 % of the energy requirement to be saved, e.g. in lifting applications. Energy which can be reused at other locations on a machine. Furthermore, this reduced power loss simplifies the cooling of the system, enabling a more compact design.

#### SINAMICS in combination with energy-saving motors

Engineering integration stretches beyond the SINAMICS converter family to higher-level automation systems, and to a broad spectrum of energy-efficient motors with a wide range of performance classes, which, compared to previous motors, are able to demonstrate up to 10 % greater efficiency.

Overview

Platform concept

All SINAMICS variants are based on a platform concept. Joint hardware and software components, as well as standardized tools for dimensioning, configuration, and commissioning tasks ensure high-level integration across all components. SINAMICS handles a wide variety of drive tasks with no system gaps. The different SINAMICS variants can be easily combined with each other.

Quality management according to EN ISO 9001

SINAMICS conforms to the most exacting quality requirements. Comprehensive quality assurance measures in all development and production processes ensure a consistently high level of quality.

Of course, our quality management system is certified by an independent authority in accordance with EN ISO 9001.

Integrated system configuration

Siemens offers perfectly matched drive components with which you can meet your requirements. The drive components reveal their true strengths over the full range from engineering and commissioning through to operation: Integrated system configuration is performed using the Siemens Product Configurator: Just select a motor and a converter and design them with the SIZER for Siemens Drives engineering tool (integrated into TIA Selection Tool). The STARTER and SINAMICS Startdrive commissioning tools integrate the motor data and at the same time simplify efficient commissioning. All drive components are incorporated in the TIA Portal – this simplifies engineering, commissioning and diagnostics.

#### Using the SINAMICS selection guide

The varying range of demands on modern variable frequency drives requires a large number of different types. Selecting the optimum drive has become a significantly more complex process. The application matrix shown simplifies this selection process considerably, by suggesting the ideal SINAMICS drive for examples of typical applications and requirements.

- The application type is selected from the vertical column
  - Pumping, ventilating, compressing
  - Moving
  - Processing
  - Machining
- The quality of the motion type is selected from the horizontal row
  - Basic
  - Medium
  - High

<sup>1)</sup> Industry-specific converters.

<sup>2)</sup> Information on the SIMATIC ET 200pro FC-2 frequency converter is available in Catalog D 31.2 and at: [www.siemens.com/et200pro-fc](http://www.siemens.com/et200pro-fc)

## Overview

Example: SINAMICS S210 converter (New) frame size FSB, 200 V 1 AC, with SIMOTICS S-1FK2 servomotor shaft height 30

Example: SINAMICS S210 converter (New) frame size FSB, 400 V 3 AC, with SIMOTICS S-1FK2 servomotor shaft height 63

The servo drive system comprises a SINAMICS S210 servo converter, a SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotor and the matching MOTION-CONNECT One Cable Connection (OCC) for connecting the motor to the converter. SINAMICS S210 is a single-axis AC/AC servo converter system with high performance and dynamic response.

SINAMICS S210 servo converters are available for the following line voltages:

- 200 V to 240 V 1 AC (1 AC series)
- 200 V to 480 V 3 AC (3 AC series)

### Flexible in application

The SINAMICS S210 is a flexible, versatile system. SIMOTICS S-1FK2, S-1FT2 or S-1FS2 series synchronous servomotors are installed in rotary and linear axes. The integrated One Cable Connection (OCC) interface allows user-friendly connection of a SIMOTICS S-1FK2, S-1FT2 or S-1FS2 motor with just one cable. The electronic motor type plate data can be read out, which eliminates the need to parameterize the converter with the motor data. This significantly simplifies and shortens commissioning.

In conjunction with the technological functions of the higher-level controller, there are many possibilities of motion – from continuous operation through positioning and synchronous operation, to coordinated motion of multiple axes via cyclic cams or interpolation – everything is possible.

The SINAMICS S210 converter has an integrated PROFINET communications interface for connecting to a control system.

The data exchange with the higher-level controllers takes place via standardized protocols – the PROFIdrive profile for positioning mode and the PROFIsafe profile for safety-related communication.

Thus, operation is optimally ensured with the SIMATIC S7 automation system. The drive axis is connected via technology objects and Motion Control blocks in the SIMATIC S7 or a SIMOTION controller.

### High performance for fast and precise control

The high performance of the SINAMICS S210 servo drive system in conjunction with a SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotor derives from the following features:

- Low moment of inertia and high overload capability of the motor
- High-resolution encoder with fast scanning
- Current controller clock cycle of 62.5  $\mu$ s and a pulse frequency of 8 kHz of the servo converter

This enables short cycle times on the machine even with complex motion control.

### DC link coupling (only 3 AC series)

For devices of the 3 AC series, the DC links of up to six converters can be coupled. Thus, energy balancing between the axes is possible and energy produced during braking can be used by other axes for accelerating. This is not only efficient but also reduces the dissipated heat in the control cabinet, because the energy that is produced no longer has to be converted to heat in the braking resistor.

### SINAMICS S210 servo converters (New)

Parallel to the SINAMICS S210 servo converters available so far, an innovative version is now available under the name "SINAMICS S210 servo converters (New)".

SINAMICS S210 servo converters (New) have extended functionalities with a new hardware and a revised software from the new firmware V6.1.

#### Extended functionalities with new hardware

- Operation on a supply voltage of 200 V to 240 V 3 AC, e.g. for USA, Canada and Japan now also possible with internal braking resistors  
External braking resistors are no longer required.
- 1 communications interface for communication with a 2nd encoder (as of firmware V6.3)
- For future extensions (currently without function):  
- 1 temperature sensor input PTC

#### Revised software from new firmware V6.1

- Security, User Management and Access Control
- Revised web server
- General rounding off and unification for the entire SINAMICS converter family
- Functional safety up to safety integrity level 3, PL e and Category 4.  
Firmware V6.1 includes the Safety Integrated Basic Functions as well as the Safety Integrated Extended Functions SS1, SLS, SDI, SSM.  
All other Safety Integrated Extended Functions are available with firmware V6.3 and TIA Portal from V19 onwards.

From firmware V6.3:

- Basic positioner (EPOS): A positioning functionality integrated into the converter.
- EtherNet/IP for communication with third-party controllers

Further functions available soon:  
Safety Integrated Advanced Functions

## System overview

### SINAMICS S210 servo drive system

#### Overview

##### **The SIMOTICS S-1FK2, S-1FT2 and S-1FS2 servomotors differ as follows:**

The 1FK2 servomotors are perfectly suited to overcome the essential challenges in servo drive technology. The product range includes a limited number of variants and options and therefore enables a simple overview and selection. They form the core of the servomotors for the SINAMICS S210 servo drive system.

The 1FT2 servomotors are an extension of the 1FK2 motor portfolio. They are more finely graded in terms of rated speeds, offer additional torque levels and have numerous variations and options. This makes it possible to solve the diverse challenges in the drive technology more precisely. Even more demanding tasks or applications in difficult environments can be mastered with 1FT2 servomotors.

	SIMOTICS S servomotors for SINAMICS S210

<b>Encoder systems</b> • Absolute encoder 22-bit singleturn • Absolute encoder 22-bit + 12-bit multiturn • Absolute encoder 26-bit singleturn • Absolute encoder 26-bit + 12-bit multiturn	✓ ✓ – –	✓ ✓ ✓ ✓	– ✓ – –
<b>Notes</b>	–	• Numerous variants and options	• Very high detergent resistance • Certification according to EHEDG

## Overview

### Optimized MOTION-CONNECT connection technology with One Cable Connection (OCC)

Example: SINAMICS S210 M12 OCC connecting cable

Motor and converter are simply connected to one another by one instead of the usual two or three cables. With this One Cable Technology, energy supply, encoder signals and braking signal are brought together in a single cable. This results in the following advantages:

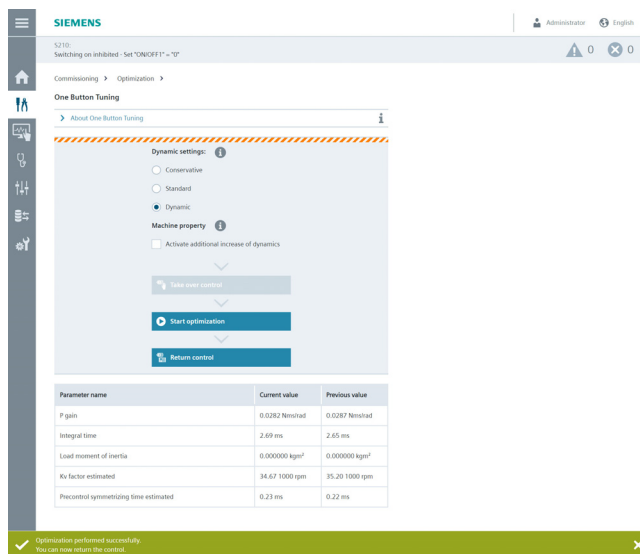

- Time-saving by laying only one cable
- Smaller installation space and space requirement in cable collars, tight bending radii
- Only one cable has to be cleaned. This is advantageous, e.g. in the pharmaceutical industry and where higher requirements are placed upon hygiene
- Can be ordered to the decimeter
- Compact connection system
- Rotatable connector on the motor side
- Motor with very low interfering contour for restricted installation space.

Cables are available in three different qualities:

- MOTION-CONNECT 500
- MOTION-CONNECT 800PLUS
- MOTION-CONNECT 400 (only for SIMOTICS S-1FS2)

In addition to the pre-assembled cable, individual components (connectors and products sold by the meter) can be ordered for self-assembly.

### Easy commissioning via web server, One Button Tuning and SINAMICS Startdrive/TIA Portal<sup>1)</sup>

#### SINAMICS Webserver for SINAMICS S210 (New) – One Button Tuning

The web server of the converter offers a simple means of parameter assignment. The web server allows commissioning purely oriented on the functionality of the drive. With the web server, the SINAMICS S210 servo drive system can be brought into operation with a few clicks.

As a result of reading the electronic type plate of the connected SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotor, only a few operator actions, such as automatic controller optimization with One Button Tuning, are necessary, as the motor and encoder are automatically detected. The controller parameters are automatically optimized. The three selectable dynamic levels of the controller can optimally take into account the desired behavior of the connected mechanics.

A motion of the axis can take place directly via the control panel during commissioning.

The customer benefits from the web server in many ways:

- Commissioning can also be easily done in places difficult to access, as the web server in the converter can also be accessed directly via PROFINET from the controller.
- The web server provides full diagnostic capability without the need for additional software.
- Commissioning and diagnostics can also be done without a cable via mobile devices, such as laptops, smart phones and tablets (an additional WLAN access point is necessary).
- Intuitive user interface

In addition to easy commissioning directly via the web server of the converter, engineering is also possible with SINAMICS Startdrive and TIA Portal<sup>1)</sup>. The tool for configuration, commissioning and diagnostics has been optimized with regard to the consistent utilization of the TIA Portal advantages – one shared work environment for PLC, HMI and drives<sup>2)</sup>.

For more information, see the [Engineering tools selection](#).

<sup>1)</sup> For SINAMICS S210 (6SL3...), from V15.1, for SINAMICS S210 (New) (6SL5...), from V18 SP1.

<sup>2)</sup> For SINAMICS S210 (6SL3...), from firmware V5.2, for SINAMICS S210 (New) (6SL5...), from firmware V6.1.

## System overview

### SINAMICS S210 servo drive system

#### Overview

##### Diagnostics

Faults and warnings are shown on the display located under the front cover, and they can be acknowledged with the Acknowledge button. Extensive diagnostics with plain text messages for cause and remedy information is possible via the web server.

##### Safety Integrated

The integrated safety functions provide highly effective, application-oriented protection for personnel and machinery (terms as defined in IEC 61800-5-2).

The following Safety Integrated Basic Functions are included as standard:

- Safe Torque Off (STO)
- Safe Brake Control (SBC)
- Safe Stop 1 time-controlled (SS1-t)

The following Safety Integrated Extended Functions <sup>3)</sup> are available as options:

- Safe Stop 1 (SS1) <sup>3)</sup>
- Safe Stop 2 (SS2)
- Safe Operating Stop (SOS)
- Safely-Limited Speed (SLS)
- Safe Speed Monitor (SSM)
- Safe Direction (SDI)
- Safely-Limited Acceleration (SLA)
- Safe Brake Test (SBT) diagnostic function

The Safety Integrated Functions are fully integrated into the drive system. They can be activated via fail-safe digital inputs on the converter (only STO and SS1-t) or via PROFINET with PROFIsafe.

The Safety Integrated Functions are implemented electronically and therefore require no additional installation effort or space in the control cabinet. Furthermore, the costs are considerably lower than for externally implemented monitoring functions.

The Safety Integrated Functions can be easily commissioned using the web server of the converter or SINAMICS Startdrive and TIA Portal <sup>1) 3)</sup>.

##### **Perfect combination with SIMATIC S7-1500, SIMATIC S7-1500 T-CPU, SIMATIC ET 200SP Open Controller, and PROFINET**

It communicates with the higher-level control via PROFINET IRT. For optimal interaction between the controller and the SINAMICS S210 servo drive system, SIMATIC S7-1500, SIMATIC S7-1500 T-CPU, SIMATIC ET 200SP Open Controller, and SIMOTION can be used as the control system.

The SINAMICS S210 servo converters have an integrated PROFINET communications interface with a cycle of up to 250 µs for connecting to a control system.

Standardized protocols for linking to a higher-level control with RT and IRT are supported – the PROFIdrive profile with DSC for positioning mode and the PROFIsafe profile for safety-related communication. Functions, such as Shared Device, ring redundancy and PROFInergy, are also possible.

Everything from one source: Through the use of Motion Control functionalities in the controller, the combination of converter and SIMATIC S7 automation system or a SIMOTION controller allows ideally harmonized engineering. As a result, commissioning times are shortened.

Via technology objects and Motion Control blocks of the higher-level controller, there are many possibilities of motion, such as continuous operation, positioning and synchronous operation, and coordinated motion of multiple axes via cyclic cams or interpolation.

Siemens offers tested SIMATIC PLC/HMI application examples for connection of the servo drive system to a SIMATIC controller: [www.siemens.com/sinamics-applications](http://www.siemens.com/sinamics-applications)

Further information on the SIMATIC S7-1500, SIMATIC S7-1500 T-CPU and SIMATIC ET 200SP Open Controller is available in the ST 70 Catalog and on the internet under [www.siemens.com/simatic-s7-1500](http://www.siemens.com/simatic-s7-1500)

<sup>1)</sup> For SINAMICS S210 (6SL3...), from V15.1, for SINAMICS S210 (New) (6SL5...), from V18 SP1.

<sup>2)</sup> Safe Stop 1 time-controlled (SS1-t) is also included in the Safety Integrated Basic functions.

<sup>3)</sup> The Extended Functions require a safety license. For SINAMICS S210 servo converters (6SL3...), available from SINAMICS V5.1 SP1. For SINAMICS S210 servo converters (New) (6SL5...) with firmware V6.1, the functions SS1, SLS, SDI and SSM are available. All other Safety Integrated Extended Functions are available with firmware V6.3 and TIA Portal from V19 onwards.

## Overview

Example: Communication via PROFINET

### Ruggedness

The SINAMICS S210 is equipped as standard with varnished or partially varnished modules. The painting on the modules protects the sensitive SMD components against corrosive gases, chemically active dust and moisture.

### Can be used worldwide

In addition to the usual approvals, the SINAMICS S210 drive system also has UL approval for the North American market. This means that the drive system, comprising SINAMICS S210 and SIMOTICS S-1FK2, S-1FT2 or S-1FS2, including the One Cable Connection (OCC), can be used worldwide.

### More information

Further documentation, such as the operating instructions, is available free on the internet at:  
[www.siemens.com/sinamics-s210/documentation](http://www.siemens.com/sinamics-s210/documentation)

Detailed information on the SINAMICS S210 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:  
[www.siemens.com/sinamics-s210](http://www.siemens.com/sinamics-s210)

and is also available via the Siemens Product Configurator on the internet.

The Siemens Product Configurator can be found in SiePortal at the following address:

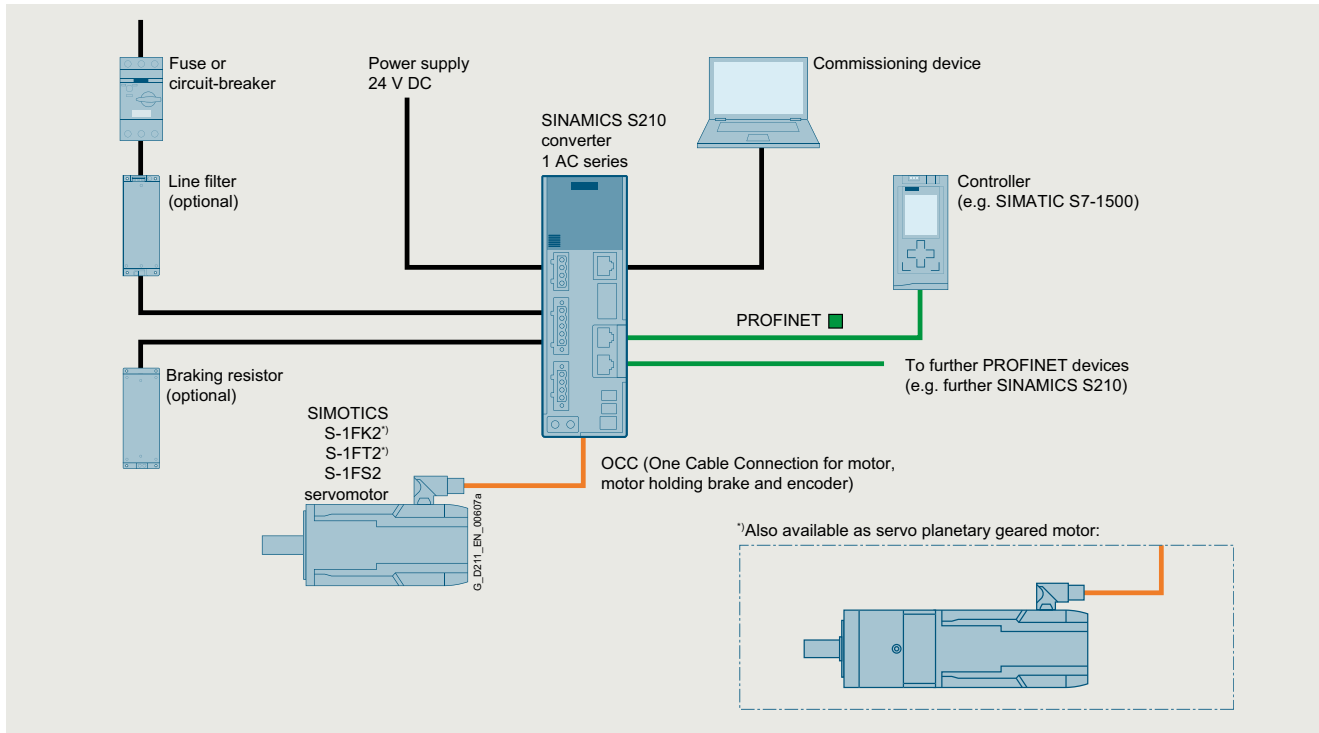

[www.siemens.com/sinamics-s210/configuration](http://www.siemens.com/sinamics-s210/configuration)

For operation with a supply voltage of 200 V to 240 V 3 AC, an external, intrinsically safe braking resistor is always required for converters with article number **6SL3...** for each converter.

Use of braking resistors integrated in the converter is not permissible with this supply voltage.

The converters with article number **6SL5...** may also be operated with the integrated braking resistor at this supply voltage. An external braking resistor is not required for this.

For operation with a supply voltage of 200 V to 240 V 3 AC, an external, intrinsically safe braking resistor is always required for converters with article number 6SL3... for each converter.

Use of braking resistors integrated in the converter is not permissible with this supply voltage.

The converters with article number 6SL5... may also be operated with the integrated braking resistor at this supply voltage. An external braking resistor is not required for this.

For operation with a supply voltage of 200 V to 240 V 3 AC, an external, intrinsically safe braking resistor is always required for converters with article number 6SL3... for each converter.

Use of braking resistors integrated in the converter is not permissible with this supply voltage.

The converters with article number 6SL5... may also be operated with the integrated braking resistor at this supply voltage. An external braking resistor is not required for this.

For operation with a supply voltage of 200 V to 240 V 3 AC, an external, intrinsically safe braking resistor is always required for converters with article number 6SL3... for each converter.

Use of braking resistors integrated in the converter is not permissible with this supply voltage.

The converters with article number 6SL5... may also be operated with the integrated braking resistor at this supply voltage. An external braking resistor is not required for this.

For operation with a supply voltage of 200 V to 240 V 3 AC, an external, intrinsically safe braking resistor is always required for converters with article number **6SL3...** for each converter. Use of braking resistors integrated in the converter is not permissible with this supply voltage.

The converters with article number **6SL5...** may also be operated with the integrated braking resistor at this supply voltage. An external braking resistor is not required for this.

<sup>1)</sup> Values for operation at 200 ... 240 V 1/3 AC, see chapter 3.3 "SIMOTICS S-1FS2 servomotors for SINAMICS S210".

		-																
	Standard																	
		Q 91																
		Q 92																
		Q 93																

**Notes:**

- The geared motor can only be delivered as a unit – motor plus gearbox – (no individual gearboxes).
- Not all combinations are possible.
- For shaft design with feather key, the gearbox data only applies to pulsating loads. With alternating load / reversal of direction of rotation, limitation of the torque as a function of the number of load cycles is required (see Configuration Manual).

<b>SINAMICS Smart Adapter <sup>6)</sup> <b>NEW</b></b> Wi-Fi solution for the next generation of SINAMICS converters SINAMICS S200 <sup>6)</sup> , SINAMICS S210 (New) <sup>6)</sup> and SINAMICS G220	<b>6SL4950-0AJ00-0AA0</b>

- <sup>1)</sup> The Extended Functions require a safety license.
- For converters with article number 6SL3... all Extended Functions are available from firmware V5.1 SP1 onwards.
  - For converters with article number 6SL5... from firmware V6.1, the extended functions SS1, SLS, SDI and SSM are available. All other Safety Integrated Extended Functions are available with firmware V6.3 and TIA Portal from V19 onwards.
- <sup>2)</sup> Extended function for an existing memory card (for converters with article number 6SL3... available with firmware V5.1 SP1 or higher). The memory card is not included in the scope of delivery. The Safety license can also be ordered together with a memory card (see above). With a CoL in electronic form, the license is supplied as a PDF file. Notification of this with a download link is received by email.
- <sup>3)</sup> The data is applicable for the complete cable length of the motors, whose associated converters are coupled with one another via an AC coupling or through the DC link.  
The maximum motor cable length per motor is 25 m using the internal filters to achieve EMC category C3 or an external filter to achieve EMC category C2. If an external filter is used to achieve EMC category C3, the maximum motor cable length per motor is 50 m.

Description	Article No.
<b>Only for the 1 AC series</b>	
<b>Line filter</b> With a line filter, Category C2 for motor cable lengths up to 25 m (82 ft), Category C3 for cable lengths up to 50 m (164 ft) acc. to IEC 61800-3 can be achieved. <ul style="list-style-type: none"> <li>• ≤ 18 A</li> </ul>	<b>6SL3203-0BB21-8VA1</b>
<b>Only for the 3 AC series</b>	
<b>Line filter</b> With a line filter, Category C2 for motor cable lengths up to 25 m (82 ft), Category C3 for cable lengths up to 50 m (164 ft) acc. to IEC 61800-3 can be achieved. When connected via a DC link, a total cable length of up to 100 m (328 ft) with Category C2 and up to 250 m (820 ft) with Category C3 is possible <sup>3)</sup> <ul style="list-style-type: none"> <li>• ≤ 35 A</li> <li>• ≤ 65 A</li> </ul>	<b>6SL3203-0BE23-5HA0</b> <b>6SL3203-0BE26-5HA0</b>
<b>Connector set AC bus and DC link</b> For coupling the DC link and the line infeed Scope of delivery: 1 AC bus connector, 1 DC link connector, 2 cover caps The AC bus connector replaces the push-in connector included in the scope of delivery of the converter. Wiring is performed with conventional 16 mm <sup>2</sup> cable (not included in scope of delivery) <sup>4)</sup>	<b>6SL3260-2DC00-0AA0</b>
<b>Connector set AC bus individual</b> For coupling the line infeed Scope of delivery: 1 AC bus connector, 1 cover cap This connector replaces the push-in connector included in the scope of delivery of the converter. Wiring is performed with conventional 16 mm <sup>2</sup> cable (not included in scope of delivery) <sup>4)</sup>	<b>6SL3260-2DC10-0AA0</b>
<b>External braking resistors for 200 ... 240 V 3 AC</b> For operation with a supply voltage of 200 V to 240 V 3 AC, an external, intrinsically safe braking resistor is always required for converters with article number <b>6SL3...</b> for each converter. Use of braking resistors integrated in the converter is not permissible with this supply voltage. The converters with article number <b>6SL5...</b> may also be operated with the integrated braking resistor at this supply voltage. An external braking resistor is not required for this. <sup>5)</sup> <ul style="list-style-type: none"> <li>• 100 W, 47 Ω for FSA and FSB</li> <li>• 240 W, 14 Ω for FSC</li> </ul>	<b>GXK:BWG250047TS-190</b> <b>GXK:BWG600014TS-190</b>

- <sup>4)</sup> Permissible cables:
- 16 mm<sup>2</sup>, Class 5 (finely stranded, PVC-insulated) H07V-K + H07V2-K according to EN 50525-2-31
  - HELUTHERM 145: 16 mm<sup>2</sup>, Class 5 (finely stranded, crosslinked polyolefin-copolymer, halogen-free) [www.helukabel.com](http://www.helukabel.com)
  - External diameter 6.7 mm to 8.1 mm
- Permissible cables (UL approval):
- AWG 6, copper cable with PVC insulation, with or without nylon jacket, 19 strands
  - Types: MTW, THHW, THW, THW-2, THHN, THWN-2, TW, TWN
  - CSA types: TW, TWU, TWN75, TW75, TWU75, T90, no compressed conductors
- <sup>5)</sup> The prefix "**GXK:**" is part of a Siemens internal order code that does not belong to the product number of the original manufacturer Michael Koch GmbH.
- <sup>6)</sup> Release for SINAMICS S200 and SINAMICS S210 (New) available soon.

## Recommended SIMATIC S7 controller

More information about SIMATIC S7-1500 and SIMATIC S7-1500 T-CPU controllers is available in Catalog ST 70 and on the internet at

[www.siemens.com/simatic-s7-1500](http://www.siemens.com/simatic-s7-1500)

<sup>1)</sup> For increased requirement regarding routing type and ambient temperature. See tables on page 4/4.

## Overview

The SINAMICS S210 starter kit with Extended Safety with Article No. 6SL5990-0AE30-0AA0 comprises

- a SINAMICS S210 servo converter (New), 230 V 1 AC, 400 W (Article No. 6SL5310-1BB10-4CF0)
- a SIMOTICS S-1FK2 servomotor, High Dynamic, shaft height 30, 400 W, without brake, shaft with feather key, with absolute encoder multiturn (Article No. 1FK2103-4AG00-1MA0)
- a corresponding One Cable Connection cable (OCC), 3 m (Article No. 6FX5002-8QN04-1AD0)
- a memory card with firmware V6.x and Safety license (Extended Functions) (Article No. 6SL5370-0G..0-0AA0-Z F01)

The delivery quantity is limited to three units per customer.

The SINAMICS S210 starter kit can be perfectly combined with the SIMATIC S7-1500 starter kit. In this way, Motion Control applications can be quickly and easily implemented.

For more information on SIMATIC S7-1500 starter kits, see: [www.siemens.com/s7-1500-starterkits](http://www.siemens.com/s7-1500-starterkits)

## SINAMICS S210 servo converters

0.1 kW to 7 kW

### SINAMICS S210 servo converters

#### Overview

#### **SINAMICS S210 – the single-axis servo drive for highly dynamic applications**

SINAMICS S210, 1 AC series, frame sizes FSA to FSC

SINAMICS S210, 3 AC series, frame sizes FSA to FSC

The SINAMICS S210 servo converter is designed for connection to SIMOTICS S-1FK2, S-1FT2 or S-1FS2 synchronous servomotors. PROFINET RT/IRT is available for connection to a higher-level control system. That allows, above all, SIMATIC S7 and SIMOTION to be used as controllers.

SINAMICS S210 is optimized for operation with SIMATIC S7-1500 and SIMATIC S7-1500T, which have their own positioning functionality. Therefore, no additional basic positioner is integrated into the converter.

The converter works with a servo controller with or without Dynamic Servo Control (DSC) and has a torque setpoint limitation. A wide range of internal protection functions are included to protect the converter.

The status of the converter is indicated by two multi-color LEDs and a 7-segment display. Pending faults can be acknowledged with a button under the front cover.

The converter has a web server, which can be called via the service interface or via PROFINET from a web browser on a PC. Both commissioning and diagnostics can be performed through this. With the web server, the converter can be brought into operation in a few steps. As the motor data from the converter is read from the electronic type plate, they do not need to be parameterized. The PROFIdrive telegram is automatically accepted by the controller; so only the controller parameters have to be adjusted. This is simply done with the One Button Tuning function, which automatically determines the parameters.

In addition to easy commissioning directly via the web server of the converter, engineering is also possible with SINAMICS Startdrive and TIA Portal (as of V15.1). The tool for configuration, commissioning and diagnostics has been optimized with regard to user friendliness and the consistent utilization of the TIA Portal advantages of a shared work environment for PLC, HMI and drives (requires SINAMICS S210 firmware V5.2 or higher).

SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotors can be connected and operated via a One Cable Connection (OCC) line. Third-party motors cannot be connected because the converter requires the type plate data of the motor.

No additional components are required for controlling the motor holding brake as all the required components are integrated into the converter. In addition, no special power supply is required because the converter optimally sets the voltage for the brake internally. Thus, in combination with the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotors, shortened opening and closing times of the brakes are also possible.

The converter can be operated optionally with a memory card. The card is inserted in the card slot behind the front cover. Firmware and drive parameters can be stored on the memory card, so that the converter can easily be replaced without any other aids. This memory card can also be used to perform series commissioning on multiple drives of identical type.

The card is available as an empty memory card or containing the latest converter firmware version. The memory card also contains the licenses for chargeable functions, such as the safety license for the Extended Safety Functions. To use these functions, a memory card containing the corresponding safety license must be permanently inserted.

If necessary, the converter contains an integrated braking resistor. As a result of the generous dimensioning of the resistor and the DC link capacities, an external braking resistor is only necessary to meet very high requirements. When operating a SINAMICS S210 servo converter with a supply voltage of 200 V to 240 V 3 AC, an external, intrinsically safe braking resistor is always required.

For the 3 AC series, DC link coupling of up to six converters is possible. Thus, the energy that is generated when braking axes can be used for accelerating other axes. This conserves energy and reduces the amount of heat dissipated via the braking resistors.

The converter also features an integrated line filter. For the 1 AC series, it satisfies category C2 for motor cable lengths up to 10 m and category C3 for cable lengths up to 25 m. With an optional external line filter, motor cable lengths of up to 25 m are also possible with category C2 and up to 50 m with category C3.

For the 3 AC series, category C3 is achieved for motor cable lengths up to 25 m. For requirements that go beyond this, an external line filter is required.

### Overview

2

Example for SINAMICS S210, 3 AC series

## Design

The single-axis AC/AC converter contains a power unit and a Control Unit for the powerful communication, open and closed-loop control functions.

The SINAMICS S210 servo converter features the following connections and interfaces as standard:

- Fieldbus interface
  - 1 PROFINET interface with two ports (RJ45 sockets) with PROFIdrive V4 profile
- 1 service interface for Ethernet communications with a service PC
- One Cable Connection (OCC)
  - 1 communications interface for communication with the encoder of the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 motors
  - 1 motor power connector for the power conductors of the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 motors
  - 1 brake connection for the conductors of the motor holding brake of the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 motors
- 1 connection for the electronic power supply via the 24 V DC supply connector (supply can be looped through connectors for several SINAMICS S210)
- 1 connection for the line voltage and an external braking resistor (braking resistor optional, for the 3 AC series via a separate connector). When connecting to 200 V to 240 V 3 AC, an external, intrinsically safe braking resistor is always required.
- 1 connection for the DC link coupling (optional, only for the 3 AC series)
- Digital inputs
  - 1 fail-safe digital input (isolated) for controlling STO and SS1-t via terminals
  - 2 high-speed digital inputs for measuring probe or reference marks
  - 1 digital input for monitoring the temperature of an external braking resistor
- 1 slot for a memory card on which the firmware, parameters and licenses can be stored
- 1 display with 3-digit, 7-segment display for indicating faults and two status LEDs
- 1 button for acknowledging errors

### DC link coupling (only 3 AC series)

For converters of the 3 AC series, the DC links of up to six converters can be coupled. Thus, energy balancing between the axes is possible and energy produced during braking can be used by other axes for accelerating. This is not only efficient but also reduces the dissipated heat in the control cabinet, because the energy that is produced no longer has to be converted to heat in the braking resistor. For DC link coupling, the line side must also be coupled (AC bus).

SINAMICS S210, 3 AC series, one line filter plus five servo converters, AC coupling and DC link coupling

## SINAMICS S210 servo converters

0.1 kW to 7 kW

### SINAMICS S210 servo converters

#### Function

<b>Closed-loop control</b>	Servo control with DSC
<b>Control functions</b>	Speed control with encoder Dynamic Servo Control (DSC) Torque setpoint limitation Current controller and current controller adaptation suitably adjusted for SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotors One Button Tuning with moment of inertia estimator and reference model Local measuring probe Simple brake control Direction reversal without changing the setpoint channel Travel to fixed stop Vertical axis Speed controller adaptation Thermal monitoring for power unit and servomotor High-performance brake control
<b>Protective functions</b>	Undervoltage DC link voltage Overvoltage DC link voltage Overcurrent power unit Overcurrent motor Overload power unit ( $I^2t$ ) Short-circuit Ground fault Temperature rise servomotor Temperature rise power unit
<b>Safety Integrated</b>	Safe Torque OFF (STO) Safe Brake Control (SBC) Safe Stop 1 time-controlled (SS1-t) Safe Stop 1 (SS1) <sup>1)</sup> Safe Stop 2 (SS2) <sup>1)</sup> Safe Operating Stop (SOS) <sup>1)</sup> Safely-Limited Speed (SLS) <sup>1)</sup> Safe Speed Monitor (SSM) <sup>1)</sup> Safe Direction (SDI) <sup>1)</sup> Safely-Limited Acceleration (SLA) <sup>1)</sup> Safe Brake Test (SBT) diagnostic function <sup>1)</sup>
<b>Commissioning</b>	Identification of the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 motors via the electronic type plate Automatic controller optimization

#### Configuration

The following electronic configuring aids and engineering tools are available for the SINAMICS S210 servo converters:

##### **DriveSim Designer (firmware V5.2 SP3 or higher)**

DriveSim Designer provides easy-to-use models for PROFIdrive-enabled SINAMICS converters, so you can create a digital twin of your drive.

More information is provided on the internet at:  
[www.siemens.com/drive-virtualization](http://www.siemens.com/drive-virtualization)

##### **SINAMICS Selector app**

Frequency converter selection guide for on the move

Siemens has developed the SINAMICS Selector app as a practical tool for finding article numbers for your SINAMICS converter in the power range from 0.1 kW to 630 kW quickly and easily. Whether for SINAMICS V20, SINAMICS V90, SINAMICS G120C, SINAMICS G120P, SINAMICS G120X, SINAMICS G120, SINAMICS G220, SINAMICS S200 or SINAMICS S210: The app will provide you with the correct article numbers conveniently.

<sup>1)</sup> Available in firmware V5.1 SP1 and higher. The Extended Functions require a Safety license.

How does it work? Simply select your application, the frequency converter you require, the rated power and device options as well as the necessary accessories.

Then you can save your selection and send it by email. The preselection serves as the basis for an order specification with the dealer/Siemens.

You will find free downloads for Android and iOS here:  
[www.siemens.com/sinamics-selector](http://www.siemens.com/sinamics-selector)

##### **Siemens Product Configurator**

The Siemens Product Configurator helps you to configure the optimum drive technology products for a number of applications – starting with gearboxes, motors, converters as well as the associated options and components and ending with controllers, software licenses and connection systems.

The Siemens Product Configurator can be used on the internet without requiring any installation. The Siemens Product Configurator can be found in SiePortal at the following address:  
[www.siemens.com/spc](http://www.siemens.com/spc)

##### **Drive dimensioning of the SINAMICS S210 servo drive system with the TIA Selection Tool**

The SINAMICS S210 servo drive system is easily configured with the TIA Selection Tool under the Drive Dimensioning plug-in. The TIA Selection Tool provides support when selecting the hardware and firmware components necessary to implement a drive task. The plug-in encompasses the configuration of the entire drive system and allows the handling of individual drives.

- Intuitive user interface, menu-based operation and help
- Configuration of the SINAMICS S210 servo drive system
- Adjustable traversing cycles and various mechanical systems integrated for single-axis applications
- Interface to the TIA Portal and SiePortal

The TIA Selection Tool is available for free on the internet at  
[www.siemens.com/tia-selection-tool-standalone](http://www.siemens.com/tia-selection-tool-standalone)

##### **SINAMICS web server for SINAMICS S210**

The converter can be brought easily and quickly into operation and optimized with the web server. Additional software does not need to be installed as access to the converter comes directly from a web browser.

You can find further information about the web server for SINAMICS S210 in the Engineering tools section.

##### **SINAMICS Startdrive commissioning tool (TIA Portal)**

SINAMICS Startdrive is a tool for configuring, commissioning and diagnosing the SINAMICS converter family that is integrated into TIA Portal (V15.1 or higher).

The SINAMICS Startdrive has been optimized with regard to user friendliness and consistent use of the TIA Portal benefits of a common working environment for PLC, HMI and drives. SINAMICS firmware V5.2 or higher is required for SINAMICS S210.

The SINAMICS Startdrive Advanced license is required for the Safety Integrated acceptance test.

The SINAMICS Startdrive commissioning tool is available free on the internet at  
[www.siemens.com/startdrive](http://www.siemens.com/startdrive)

You can find further information on the SINAMICS Startdrive commissioning tool in the section Engineering tools.

<sup>1)</sup> Extended function for an existing memory card (firmware V5.1 SP1 or higher). The memory card is not included in the scope of delivery. The Safety license can also be ordered together with a memory card (see above). With a CoL in electronic form, the license is supplied as a PDF file. Notification of this with a download link is received by email. For further information, see section Supplementary system components > Memory cards.

<sup>2)</sup> The data is applicable for the complete cable length of the motors, whose associated converters are coupled with one another via an AC coupling or through the DC link. The maximum motor cable length per motor is 25 m using the internal filters to achieve EMC category C3 or using an external filter to achieve EMC category C2. If an external filter is used to achieve EMC category C3, the maximum motor cable length per motor is 50 m.

### Dimensional drawings

2

Dimensional drawing SINAMICS S210, frame size FSA, 1 AC series

Dimensional drawing SINAMICS S210, frame size FSB, 1 AC series

Dimensional drawing SINAMICS S210, frame size FSC, 1 AC series

Dimensional drawing SINAMICS S210, frame size FSA, 3 AC series

Dimensional drawing SINAMICS S210, frame size FSB, 3 AC series

Dimensional drawing SINAMICS S210, frame size FSC, 3 AC series

All dimensions in mm (values in brackets are in inches).

With the OCC motor connection cable connected, the overall depth increases by 57 mm (2.24 inches).

**Accessories**
**Line filters**
**1 AC series**

Filters are already integrated in order to achieve category C2 (for motor cable lengths up to 10 m) or category C3 (for motor cable lengths up to 25 m). Further requirements can be achieved using an external line filter.

1 AC series	Maximum motor cable length	
	for converters without additional line filter	for converters with external line filter
EMC category C2	10 m (32.8 ft)	25 m (82.0 ft)
EMC category C3	25 m (82.0 ft)	50 m (164 ft)

**3 AC series**

Filters for achieving category C3 are already integrated (for motor cable lengths up to 25 m). Further requirements can be achieved using an external line filter.

3 AC series	Line/DC link coupling	Maximum motor cable length	
		for converters with integrated line filter	for converters with external line filter
EMC category C2	Without line/DC link coupling	–	25 m (82 ft)
	With line/DC link coupling ≤ 6 converters <sup>1)</sup>	–	100 m (328 ft)
EMC category C3	Without line/DC link coupling	25 m (82 ft)	50 m (164 ft)
	With line/DC link coupling ≤ 6 converters <sup>1)</sup>	100 m (328 ft)	250 m (820 ft)

Example: SINAMICS S210, 3 AC line filter with servo converter, frame size FSB

**Recommended line-side overcurrent protection devices**

Overcurrent protection devices are necessary for the operation of the converters. The table listed in the section "Recommended line-side overcurrent protection devices" provides recommendations according to IEC and UL regulations, depending on the area of application. Recommendations on further overcurrent protection devices are available at:

<https://support.industry.siemens.com/cs/document/109748999>

Additional information about the listed Siemens fuses is available in Catalog LV 10 as well as in SiePortal.

**Braking resistors**

As far as necessary, braking resistors are integrated into the converters. Together with the generously dimensioned DC link capacities, an external braking resistor is not necessary in the normal case.

If the internal braking resistor is inadequate for applications with very high requirements, an external braking resistor can be connected as an alternative. When operating a SINAMICS S210 servo converter with a supply voltage of 200 V to 240 V 3 AC, an external, intrinsically safe braking resistor is always required.

**Memory cards**

A memory card (SINAMICS SD card) can be optionally used with SINAMICS S210. The associated slot is located under the front cover of the converter. Not only the firmware but also the device parameterization of a SINAMICS S210 servo converter can be stored on the memory card.

When service is required, e.g. after the converter has been replaced and the data have been downloaded from the memory card, the drive system is immediately ready for use again.

A memory card is only necessary if functions requiring license, such as the Extended Safety Functions, are used. The necessary license is saved on the memory card.

<sup>1)</sup> The data is applicable for the complete cable length of the motors, whose associated converters are coupled with one another via an AC coupling or through the DC link.

The maximum motor cable length per motor is 25 m using the internal filters to achieve EMC category C3 or using an external filter to achieve EMC category C2. If an external filter is used to achieve EMC category C3, the maximum motor cable length per motor is 50 m.

## SINAMICS S210 servo converters

0.1 kW to 7 kW

### SINAMICS S210 servo converters and SINAMICS S210 servo converters (New)

#### Overview

SINAMICS S210 (New), 1 AC series, frame sizes FSA to FSC

SINAMICS S210 (New), 3 AC series, frame sizes FSA to FSC

#### **SINAMICS S210 servo converters (New)**

Parallel to the SINAMICS S210 servo converters available so far, an innovative version is now available under the name "SINAMICS S210 servo converters (New)".

SINAMICS S210 servo converters (New) have extended functionalities with a new hardware and a revised software from the new firmware V6.1.

#### **Extended functionalities with new hardware**

- Operation on a supply voltage of 200 V to 240 V 3 AC, e.g. for USA, Canada and Japan now also possible with internal braking resistors  
External braking resistors are no longer required.
- 1 communications interface for communication with a 2nd encoder (as of firmware V6.3)
- For future extensions (currently without function):  
- 1 temperature sensor input PTC

#### **Revised software from new firmware V6.1**

- Security, User Management and Access Control
- Revised web server
- General rounding off and unification for the entire SINAMICS converter family
- Functional safety up to safety integrity level 3, PL e and Category 4.  
Firmware V6.1 includes the Safety Integrated Basic Functions as well as the Safety Integrated Extended Functions SS1, SLS, SDI, SSM.  
All other Safety Integrated Extended Functions are available with firmware V6.3 and TIA Portal from V19 onwards.

From firmware V6.3:

- Basic positioner (EPOS): A positioning functionality integrated into the converter.
- EtherNet/IP for communication with third-party controllers

Further functions available soon: Safety Integrated Advanced Functions

#### **Compatibility**

Due to the lack of Safety Integrated Extended Functions (with firmware V6.1), modified numbering of the parameters and new User Management, the SINAMICS S210 servo converters (New) are not compatible with the SINAMICS S210 servo converters available to date.

SINAMICS S210 servo converters (New) are compatible with the previously available SINAMICS S210 servo converters with regard to the following aspects:

- Dimensions
- Power data
- Connection system
- SIMOTICS S-1FK2, S-1FT2 and S-1FS2 servomotors
- MOTION-CONNECT One Cable Connection (OCC) cables

Complete engineering support with the SINAMICS Startdrive and TIA Portal (from V18 SP1) is available for SINAMICS S210 servo converters (New). The converter can be integrated into the previous TIA Portal versions via the GSDML file, whereby the parameterization is only possible via the integrated web server.

A migration tool is available for upgrading TIA projects from SINAMICS S210 to SINAMICS S210 (New). This means that the converters can be conveniently exchanged while parameterization and networking remain.

<https://support.industry.siemens.com/cs/document/109822030>

It is not possible to operate the SINAMICS S210 servo converters (New) with firmware V5.2 SP3.

Furthermore, it is not possible to operate the previously available SINAMICS S210 servo converters with firmware V6.1 or higher. This means that newly available functions cannot be retrofitted.

**Overview****SINAMICS S210 (New) with firmware V6.1 and higher – the single-axis servo drive for highly dynamic applications**

SINAMICS S210 (New), 1 AC series, frame sizes FSA to FSC

SINAMICS S210 (New), 3 AC series, frame sizes FSA to FSC

The SINAMICS S210 servo converter (New) with firmware V6.1 and higher is designed for connection to SIMOTICS S-1FK2, S-1FT2 or S-1FS2 synchronous servomotors. PROFINET RT/IRT is available for connection to a higher-level control system. That allows, above all, SIMATIC S7 and SIMOTION to be used as controllers.

SINAMICS S210 (New) is optimized for operation with SIMATIC S7-1500 and SIMATIC S7-1500T, which have their own positioning functionality. As of firmware V6.3, a basic positioner (EPOS) is also integrated into the converter.

The converter works with a servo controller with or without Dynamic Servo Control (DSC) and has a torque setpoint limitation. A wide range of internal protection functions are included to protect the converter.

The status of the converter is indicated by two multi-color LEDs and a 7-segment display. Pending faults can be acknowledged with a button under the front cover.

The converter has a web server, which can be called via the service interface or via PROFINET from a web browser on a PC. Both commissioning and diagnostics can be performed through this. With the web server, the converter can be brought into operation in a few steps. As the motor data from the converter is read from the electronic type plate, they do not need to be parameterized. The PROFINET telegram is automatically accepted by the controller; so only the controller parameters have to be adjusted. This is simply done with the One Button Tuning function, which automatically determines the parameters.

With the SINAMICS S210 (New), the PROFINET function "Dynamic Frame Packing" is available, which enables the connection of large numbers of axes to a SIMATIC controller.

In addition, communication via EtherNet/IP is available from firmware V6.3 onwards. This allows the SINAMICS S210 (New) to be connected to third-party controllers in conjunction with EPOS.

In addition to easy commissioning directly via the web server of the converter, engineering is also possible with SINAMICS Startdrive (as of V18 SP1) and TIA Portal. The tool for configuration, commissioning and diagnostics has been optimized with regard to user friendliness and the consistent utilization of the TIA Portal advantages of a shared work environment for PLC, HMI and drives.

SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotors can be connected and operated via a One Cable Connection (OCC) line. Third-party motors cannot be connected because the converter requires the type plate data of the motor.

No additional components are required for controlling the motor holding brake as all the required components are integrated into the converter. In addition, no special power supply is required because the converter optimally sets the voltage for the brake internally. Thus, in combination with the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotors, shortened opening and closing times of the brakes are also possible.

The converter can be operated optionally with a memory card. The card is inserted in the card slot behind the front cover. Firmware and drive parameters can be stored on the memory card, so that the converter can easily be replaced without any other aids. This memory card can also be used to perform series commissioning on multiple drives of identical type.

The card is available as an empty memory card or containing the latest converter firmware version. The memory card also contains the licenses for chargeable functions, such as the safety license for the Extended Safety Functions. To use these functions, a memory card containing the corresponding safety license must be permanently inserted.

If necessary, the converter contains an integrated braking resistor. As a result of the generous dimensioning of the resistor and the DC link capacities, an external braking resistor is only necessary to meet very high requirements.

For the 3 AC series, DC link coupling of up to six devices is possible. Thus, the energy that is generated when braking axes can be used for accelerating other axes. This conserves energy and reduces the amount of heat dissipated via the braking resistors.

The converter also features an integrated line filter.

For the 1 AC series, it satisfies category C2 for motor cable lengths up to 10 m and category C3 for cable lengths up to 25 m. With an optional external line filter, motor cable lengths of up to 25 m are also possible with category C2 and up to 50 m with category C3.

For the 3 AC series, category C3 is achieved for motor cable lengths up to 25 m. For requirements that go beyond this, an external line filter is required.

0.1 kW to 7 kW

### SINAMICS S210 servo converters (New)

#### Design

The single-axis AC/AC converter contains a power unit and a Control Unit for the powerful communication, open and closed-loop control functions.

The SINAMICS S210 (New, with firmware V6.1 and higher) servo converter features the following connections and interfaces as standard:

- Fieldbus interface
  - 1 PROFINET interface with two ports (RJ45 sockets) with PROFIdrive V4 profile and Dynamic Frame Packing. As of firmware V6.3, communication via EtherNet/IP is supported.
- 1 service interface for Ethernet communications with a service PC
- One Cable Connection (OCC)
  - 1 communications interface for communication with the encoder of the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 motors
  - 1 motor power connector for the power conductors of the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 motors
  - 1 brake connection for the conductors of the motor holding brake of the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 motors
- 1 communication interface for communication with a 2nd encoder (encoder with DRIVE-CLiQ interface) (as of firmware V6.3)
- 1 PTC temperature sensor input (for future extensions, currently without function)
- 1 connection for the electronic power supply via the 24 V DC supply connector (supply can be looped through connectors for several SINAMICS S210)
- 1 connection for the line voltage and an external braking resistor (braking resistor optional, for the 3 AC series via a separate connector).
- 1 connection for the DC link coupling (optional, only for the 3 AC series)
- Digital inputs
  - 1 fail-safe digital input (isolated) for controlling STO and SS1-t via terminals
  - 2 high-speed digital inputs for measuring probe or reference marks
  - 1 digital input for monitoring the temperature of an external braking resistor
- 1 slot for a memory card on which the firmware, parameters and licenses can be stored
- 1 display with 3-digit, 7-segment display for indicating faults and two status LEDs
- 1 button for acknowledging errors

#### DC link coupling (only 3 AC series)

For devices of the 3 AC series, the DC links of up to six converters can be coupled. Thus, energy balancing between the axes is possible and energy produced during braking can be used by other axes for accelerating. This is not only efficient but also reduces the dissipated heat in the control cabinet, because the energy that is produced no longer has to be converted to heat in the braking resistor. For DC link coupling, the line side must also be coupled (AC bus).

It is currently recommended that converters with article numbers **6SL5...** and **6SL3...** should not be in a common DC link coupling.

SINAMICS S210 (New), 3 AC series, one line filter plus five servo converters, AC coupling and DC link coupling

### Function

<b>Closed-loop control</b>	Servo control with DSC
<b>Control functions</b>	Speed control with encoder Dynamic Servo Control (DSC) Torque setpoint limitation Current controller and current controller adaptation suitably adjusted for SIMOTICS S-1FK2, S-1FT2 or S-1FS2 servomotors One Button Tuning with moment of inertia estimator and reference model Local measuring probe Simple brake control Direction reversal without changing the setpoint channel Travel to fixed stop Vertical axis Speed controller adaptation Thermal monitoring for power unit and servomotor High-performance brake control

<b>Safety Integrated</b>	Safe Torque OFF (STO) Safe Brake Control (SBC) Safe Stop 1 time-controlled (SS1-t) Safe Stop 1 (SS1) <sup>1)</sup> Safe Stop 2 (SS2) <sup>1)</sup> Safe Operating Stop (SOS) <sup>1)</sup> Safely-Limited Speed (SLS) <sup>1)</sup> Safe Speed Monitor (SSM) <sup>1)</sup> Safe Direction (SDI) <sup>1)</sup> Safely-Limited Acceleration (SLA) <sup>1)</sup> Safe Brake Test (SBT) diagnostic function <sup>1)</sup>
<b>Commissioning</b>	Identification of the SIMOTICS S-1FK2, S-1FT2 or S-1FS2 motors via the electronic type plate Automatic controller optimization

### Configuration

The following electronic configuring aids and engineering tools are available for the SINAMICS S210 servo converters (New):

#### **DriveSim Designer and DriveSim Engineer (firmware V6.1 or higher)**

DriveSim Designer and DriveSim Engineer provides easy-to-use models for PROFIdrive-enabled SINAMICS converters, so you can create a digital twin of your drive.

More information is provided on the internet at:  
[www.siemens.com/drive-virtualization](http://www.siemens.com/drive-virtualization)

#### **SINAMICS Selector app**

Frequency converter selection guide for on the move

Siemens has developed the SINAMICS Selector app as a practical tool for finding article numbers for your SINAMICS converter in the power range from 0.1 kW to 630 kW quickly and easily. Whether for SINAMICS V20, SINAMICS V90, SINAMICS G120C, SINAMICS G120P, SINAMICS G120X, SINAMICS G120, SINAMICS G220, SINAMICS S200 or SINAMICS S210: The app will provide you with the correct article numbers conveniently.

<sup>1)</sup> The Extended Functions require a Safety license. The functions SS1, SLS, SDI and SSM are available with firmware V6.1. All other Safety Integrated Extended Functions are available with firmware V6.3 and TIA Portal from V19 onwards.

How does it work? Simply select your application, the frequency converter you require, the rated power and device options as well as the necessary accessories.

Then you can save your selection and send it by email. The preselection serves as the basis for an order specification with the dealer/Siemens.

You will find free downloads for Android and iOS here:  
[www.siemens.com/sinamics-selector](http://www.siemens.com/sinamics-selector)

#### **Siemens Product Configurator**

The Siemens Product Configurator helps you to configure the optimum drive technology products for a number of applications – starting with gearboxes, motors, converters as well as the associated options and components and ending with controllers, software licenses and connection systems.

The Siemens Product Configurator can be used on the internet without requiring any installation. The Siemens Product Configurator can be found in SiePortal at the following address:  
[www.siemens.com/spc](http://www.siemens.com/spc)

#### **Drive dimensioning of the SINAMICS S210 servo drive system with the TIA Selection Tool**

The SINAMICS S210 servo drive system is easily configured with the TIA Selection Tool under the Drive Dimensioning plug-in. The TIA Selection Tool provides support when selecting the hardware and firmware components necessary to implement a drive task. The plug-in encompasses the configuration of the entire drive system and allows the handling of individual drives.

- Intuitive user interface, menu-based operation and help
- Configuration of the SINAMICS S210 servo drive system
- Adjustable traversing cycles and various mechanical systems integrated for single-axis applications
- Interface to the TIA Portal and SiePortal

The TIA Selection Tool is available for free on the internet at  
[www.siemens.com/tia-selection-tool-standalone](http://www.siemens.com/tia-selection-tool-standalone)

#### **SINAMICS web server for SINAMICS S210 (New)**

The converter can be brought easily and quickly into operation and optimized with the web server. Additional software does not need to be installed as access comes directly from a web browser.

You can find further information about the web server for SINAMICS S210 (New) in the Engineering tools section.

#### **SINAMICS Startdrive commissioning tool (TIA Portal)**

SINAMICS Startdrive (V18 SP1 or higher) is a tool for configuring, commissioning and diagnosing the SINAMICS converter family that is integrated into TIA Portal.

The SINAMICS Startdrive has been optimized with regard to user friendliness and consistent use of the TIA Portal benefits of a common working environment for PLC, HMI and drives. SINAMICS firmware V6.1 or higher is required for SINAMICS S210.

The SINAMICS Startdrive Advanced license is required for the Safety Integrated acceptance test.

The SINAMICS Startdrive commissioning tool is available free on the internet at  
[www.siemens.com/startdrive](http://www.siemens.com/startdrive)

You can find further information on the SINAMICS Startdrive commissioning tool in the section Engineering tools.

<sup>1)</sup> The data is applicable for the complete cable length of the motors, which associated converters are coupled with one another via an AC coupling or through the DC link. The maximum motor cable length per motor is 25 m using the internal filters to achieve EMC category C3 or an external filter to achieve EMC category C2. If an external filter is used to achieve EMC category C3, the maximum motor cable length per motor is 50 m.

<sup>2)</sup> Permissible cables:

- 16 mm<sup>2</sup>, Class 5 (finely stranded, PVC-insulated) H07V-K + H07V2-K according to EN 50525-2-31
- HELUTHERM 145: 16 mm<sup>2</sup>, Class 5 (finely stranded, crosslinked polyolefin-copolymer, halogen-free) [www.helukabel.com](http://www.helukabel.com)
- External diameter 6.7 mm to 8.1 mm

Permissible cables (UL approval):

- AWG 6, copper cable with PVC insulation, with or without nylon jacket, 19 strands
- Types: MTW, THHW, THW, THW-2, THHN, THWN-2, TW, TWN
- CSA types: TW, TWU, TWN75, TW75, TWU75, T90, no compressed conductors

# SINAMICS S210 servo converters

0.1 kW to 7 kW

## SINAMICS S210 servo converters (New)

### Dimensional drawings

2

Dimensional drawing SINAMICS S210 (New), frame size FSA, 1 AC series

Dimensional drawing SINAMICS S210 (New), frame size FSB, 1 AC series

Dimensional drawing SINAMICS S210 (New), frame size FSC, 1 AC series

Dimensional drawing SINAMICS S210 (New), frame size FSA, 3 AC series

Dimensional drawing SINAMICS S210 (New), frame size FSB, 3 AC series

Dimensional drawing SINAMICS S210 (New), frame size FSC, 3 AC series

All dimensions in mm (values in brackets are in inches).

With the OCC motor connection cable connected, the overall depth increases by 57 mm (2.24 inches).

## Accessories

### Line filters

#### 1 AC series

Filters are already integrated in order to achieve category C2 (for motor cable lengths up to 10 m) or category C3 (for motor cable lengths up to 25 m). Further requirements can be achieved using an external line filter.

1 AC series	Maximum motor cable length	
	for converters without additional line filter	for converters with external line filter
EMC category C2	10 m (32.8 ft)	25 m (82.0 ft)
EMC category C3	25 m (82.0 ft)	50 m (164 ft)

#### 3 AC series

Filters for achieving category C3 are already integrated (for motor cable lengths up to 25 m). Further requirements can be achieved using an external line filter.

3 AC series	Line/DC link coupling	Maximum motor cable length	
		for converters with integrated line filter	for converters with external line filter
EMC category C2	Without line/DC link coupling	–	25 m (82 ft)
	With line/DC link coupling ≤ 6 converters <sup>1)</sup>	–	100 m (328 ft)
EMC category C3	Without line/DC link coupling	25 m (82 ft)	50 m (164 ft)
	With line/DC link coupling ≤ 6 converters <sup>1)</sup>	100 m (328 ft)	250 m (820 ft)

Example: SINAMICS S210, 3 AC line filter with servo converter, frame size FSB

### Recommended line-side overcurrent protection devices

Overcurrent protection devices are necessary for the operation of the converters. The table listed in the section "Recommended line-side overcurrent protection devices" provides recommendations according to IEC and UL regulations, depending on the area of application. Recommendations on further overcurrent protection devices are available at:

<https://support.industry.siemens.com/cs/document/109748999>

Additional information about the listed Siemens fuses is available in Catalog LV 10 as well as in SiePortal.

### Braking resistors

As far as necessary, braking resistors are integrated into the converters. Together with the generously dimensioned DC link capacities, an external braking resistor is not necessary in the normal case. Even with a supply voltage of 200 V to 240 V 3AC, no external braking resistor is necessary.

If the internal braking resistor is inadequate for applications with very high requirements, an external braking resistor can be connected as an alternative.

### Memory cards

A memory card (SINAMICS SD card) can be optionally used with SINAMICS S210. The associated slot is located under the front cover of the converter. Not only the firmware but also the device parameterization of a SINAMICS S210 servo converter can be stored on the memory card.

When service is required, e.g. after the converter has been replaced and the data have been downloaded from the memory card, the drive system is immediately ready for use again.

A memory card is only necessary if functions requiring license, such as the Extended Safety Functions, are used. The necessary license is saved on the memory card.

<sup>1)</sup> The data is applicable for the complete cable length of the motors, whose associated converters are coupled with one another via an AC coupling or through the DC link.

The maximum motor cable length per motor is 25 m using the internal filters to achieve EMC category C3 or an external filter to achieve EMC category C2. If an external filter is used to achieve EMC category C3, the maximum motor cable length per motor is 50 m.

## SINAMICS S210 servo converters

0.1 kW to 7 kW

Line-side components > Line filters

### Overview

1 AC line filter, 18 A

3 AC line filter, 35 A and 65 A

The 3 AC line filters are connected via the AC coupling of the converters.  
The total of the rated currents of the converters on an AC bus must not exceed the rated current of the line filter.

## SINAMICS S210 servo converters

0.1 kW to 7 kW

### Line-side components > Recommended line-side overcurrent protection devices

#### Selection and ordering data

Overcurrent protection devices are necessary for the operation of the converters. The following table lists recommendations for fuses.

- Siemens fuses of type 3NA3 for use in the area of validity of IEC
- UL-listed fuses Class J for use in USA and Canada

Recommendations on further overcurrent protection devices are available at:

- Für SINAMICS S210 (6SL3...) <https://support.industry.siemens.com/cs/document/109748999>
- Für SINAMICS S210 (New) (6SL5...) <https://support.industry.siemens.com/cs/document/109815356>

The Short Circuit Current Rating (SCCR) according to UL for industrial control cabinet installations to NEC Article 409 or UL 508A/508C or UL 61800-5-1 is as follows for Class J fuses for

- SINAMICS S210: 65 kA

SCCR and ICC values for combination with further overcurrent protection devices are available at:

- For SINAMICS S210 (6SL3...) <https://support.industry.siemens.com/cs/document/109748999>
- For SINAMICS S210 (New) (6SL5...) <https://support.industry.siemens.com/cs/document/109815356>

#### Notes for installations in Canada:

The converters are intended for line supply systems with overvoltage category III.

More information is available in the technical documentation on the internet at:

[www.siemens.com/sinamics-s210/documentation](http://www.siemens.com/sinamics-s210/documentation)

Additional information about the listed Siemens fuses is available in Catalog LV 10 as well as in SiePortal.

#### Group protection of multiple converters

Further information is available in the technical documentation on the internet at:

[www.siemens.com/sinamics-s210/documentation](http://www.siemens.com/sinamics-s210/documentation)

<https://support.industry.siemens.com/cs/document/109748999>

## Overview

As far as necessary, braking resistors are integrated into the converters. Together with the generously dimensioned DC link capacities, another external braking resistor is not necessary in the normal case.

If the internal braking resistor is inadequate for applications with very high requirements, an external braking resistor can be connected as an alternative.

Only intrinsically safe braking resistors with temperature monitoring may be used in order to minimize the risk of an explosion, the outbreak of fire or melting of the enclosure in the event of a continuous overload, e.g. due to a defect.

### External braking resistors for 200 V to 240 V 3 AC

For operation with a supply voltage of 200 V to 240 V 3 AC, an external, intrinsically safe braking resistor is always required for converters with article number **6SL3...** for each converter. Use of braking resistors integrated in the converter is not permissible with this supply voltage. The converters with article number **6SL5...** may also be operated with the integrated braking resistor at this supply voltage. An external braking resistor is not required for this.

The following resistors are recommended as a substitute for the internal braking resistors of converters with article number **6SL3...** If these are not sufficient, the resistors from Michael Koch GmbH listed in the table can be used.

- 100 W, 47  $\Omega$  for frame sizes FSA and FSB:  
**GXK:BWG250047TS-190**
- 240 W, 14  $\Omega$  for frame size FSC:  
**GXK:BWG600014TS-190**

These resistors have approvals for the North American market (cURus and CSA).

If the temperature sensor of the resistor is connected to the input DI4 of the converter, the converter switches off when the braking resistor is overloaded.

## More information

### Overview

Example of the SINAMICS memory card (SD card)

The parameter assignment, firmware and licenses for a converter can be stored on the SINAMICS memory card (SD card). When service is required, e.g. after the converter has been replaced and the data have been downloaded from the memory card the drive system is immediately ready for use again.

The memory card has the following functions:

- Parameter settings can be written from the memory card to the converter or saved from the converter to the memory card
- The memory card supports series commissioning without the use of a commissioning tool
- If firmware is stored on the memory card, the firmware can be upgraded/downgraded during startup
- It is used for storing licenses when using functions under license, e.g. the Safety license for enabling the Extended Functions<sup>1)</sup>
  - Safe Stop 1 (SS1)<sup>2)</sup>
  - Safe Stop 2 (SS2)
  - Safe Operating Stop (SOS)
  - Safely-Limited Speed (SLS)
  - Safe Speed Monitor (SSM)
  - Safe Direction (SDI)
  - Safely-Limited Acceleration (SLA)
  - Safe Brake Test (SBT) diagnostic function

#### Notes:

In general, the converter can be operated without a memory card. However, it is necessary if licenses, such as the Extended Safety license, are required. The card must then remain permanently inserted.

It is not possible to operate the SINAMICS S210 servo converters (New) with firmware V5.2 SP3. Furthermore, it is not possible to operate the previously available SINAMICS S210 servo converters with firmware V6.1 or higher.

<sup>1)</sup> The Extended Functions require a safety license.  
 - For converters with article number 6SL3... all Extended Functions are available from firmware V5.1 SP1 onwards.  
 - For converters with article number 6SL5... from firmware V6.1, the extended functions SS1, SLS, SDI and SSM are available.  
 All other Safety Integrated Extended Functions are available with firmware V6.3 and TIA Portal from V19 onwards.

<sup>2)</sup> Safe Stop 1 time-controlled (SS1-t) is also included in the Safety Integrated Basic functions.

## Supplementary system components > Memory cards

### More information

#### Certificate of License (CoL)

The CoL is the licensee's proof that the use of the software has been licensed by Siemens. A CoL must be assigned to each use and must be kept in a safe place.

#### Electronic Certificate of License

The electronic Certificate of License is the paperless delivery form for runtime options for SINAMICS and SINUMERIK.

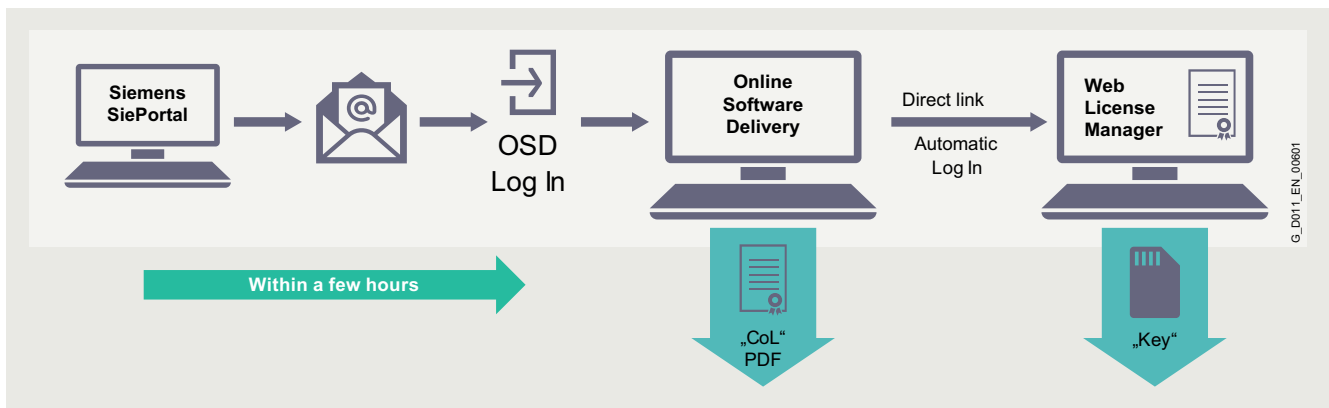

Like the previous paper Certificate of License CoL, the electronic Certificate of License contains information about the type of rights of use purchased for the software. The electronic Certificate of License is supplied as a PDF file via the Online Software Delivery Portal (OSD). This enables quick notification with a download link to the email address to be stated in the order.

The electronic Certificate of License can then be downloaded from the OSD. The Web License Manager can also be called from the OSD to assign the runtime license to a memory card. In this case, the data of the electronic Certificate of License are automatically transferred to the Web License Manager and do not have to be entered manually. This ensures quick availability of the license key and simple and secure handling and management of the license certificates.

You will find information on the OSD at:

<https://support.industry.siemens.com/cs/document/109759444>

2

Electronic Certificate of License: Procedure for order licenses

In the future, the pre-licensed memory cards will also be delivered with the corresponding electronic Certificates of License on the memory card. The Certificates of License are stored in directory "KEYS". The pre-licensed memory cards will successively make the transition from paper CoLs to electronic CoLs. The CoL on paper will then no longer be contained in the delivery.

Electronic Certificate of License: Storage location on data medium

**Overview**

SINAMICS Smart Adapter

SINAMICS Smart Adapter is a Wi-Fi solution for engineering, service and maintenance tasks for the next generation of SINAMICS converters SINAMICS S200 <sup>1)</sup>, SINAMICS S210 (New) <sup>1)</sup> and SINAMICS G220. The adapter is designed to be plugged into and powered from the service interface (X127) on the converter.

**Benefits**

- Wireless access to the converter-integrated web server via mobile users device
- Wireless access with SINAMICS Startdrive to the SINAMICS converters
- Portable and compact Wi-Fi solution for engineering, service and maintenance tasks for the next generation of SINAMICS converters SINAMICS S200 <sup>1)</sup>, SINAMICS S210 (New) <sup>1)</sup> and SINAMICS G220
- Advanced security technology
- Plug and Play interface for easy connectivity
- User friendly

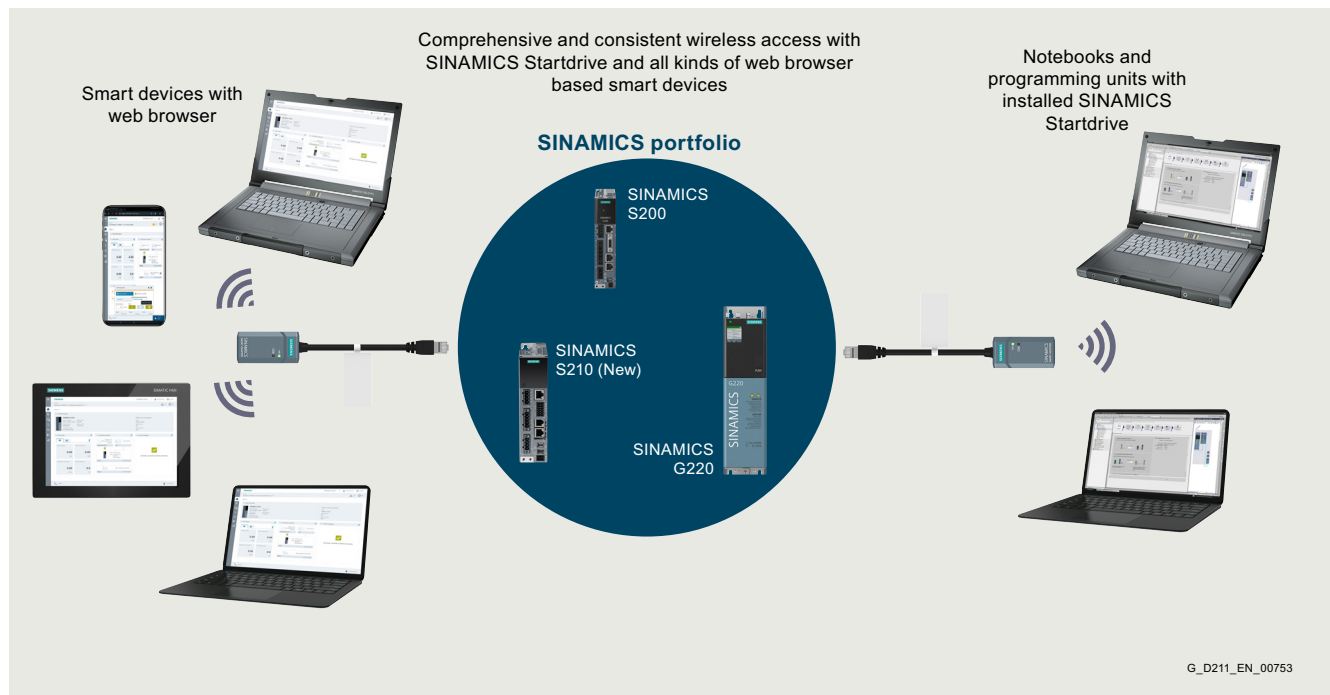

**Application**

SINAMICS Smart Adapter is used in general industrial applications as an engineering solution for quick commissioning and service.

The adapter is especially valuable in areas, which are difficult to access due to their mechanical mounting locations. The use of SINAMICS Smart Adapter avoids cable spaghetti and tripping points during commissioning and service tasks and therefore prevents from occasional accidents.

**Function**

- Easy and quick service and commissioning via a wireless solution using the converter-integrated web server
- Interface that is suitable for the next generation of SINAMICS converters SINAMICS S200 <sup>1)</sup>, SINAMICS S210 (New) <sup>1)</sup> and SINAMICS G220 and allows power supply of SINAMICS Smart Adapter directly from the converter.
- Advanced security with WPA3 protocol

**Integration**

Wireless access with SINAMICS Startdrive via SINAMICS Smart Adapter

<sup>1)</sup> Release for SINAMICS S200 and SINAMICS S210 (New) available soon.

3.3/1	SIMOTICS S-1FS2 servomotors
3.4/1	SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Detailed technical information on the SINAMICS S210 servo drive system is available on the internet at:

[www.siemens.com/sinamics-s210/documentation](http://www.siemens.com/sinamics-s210/documentation)

In addition, the Siemens Product Configurator for the SINAMICS S210 drive system can be used on the internet at the following address:

[www.siemens.com/sinamics-s210/configuration](http://www.siemens.com/sinamics-s210/configuration)

In addition, the SIMOTICS S-1FK2, S-1FT2 and S-1FS2 servo motors can be found at the following address in the Siemens Product Configurator in SiePortal:

[www.siemens.com/simotics-1fk2/configuration](http://www.siemens.com/simotics-1fk2/configuration)

[www.siemens.com/simotics-1ft2/configuration](http://www.siemens.com/simotics-1ft2/configuration)

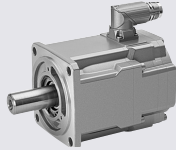

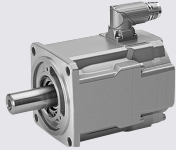

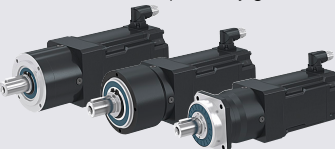

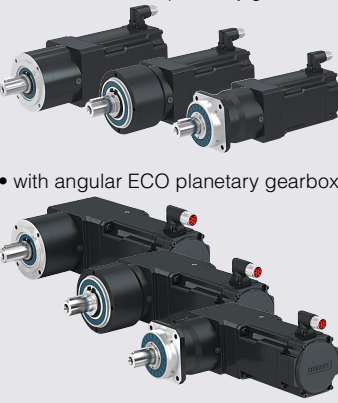

[www.siemens.com/simotics-1fs2/configuration](http://www.siemens.com/simotics-1fs2/configuration)

## SIMOTICS S servomotors and servo planetary geared motors for SINAMICS S210

### Overview

The 1FK2 servomotors are perfectly suited to overcome the essential challenges in servo drive technology. The product range includes a limited number of variants and options and therefore enables a simple overview and selection. They form the core of the servomotors for the SINAMICS S210 servo drive system.

The 1FT2 servomotors are an extension of the 1FK2 motor portfolio. They are more finely graded in terms of rated speeds, offer additional torque levels and have numerous variations and options. This makes it possible to solve the diverse challenges in the drive technology more precisely. Even more demanding tasks or applications in difficult environments can be mastered with 1FT2 servomotors.

## SIMOTICS S-1FK2 servomotors for SINAMICS S210

### Overview

The SIMOTICS S-1FK2 servomotors are compact and highly dynamic synchronous motors for a wide range of uses in an industrial environment. They are characterized by high power density, degree of protection and overload capability.

The 1FK2 servomotors are perfectly suited to overcome the essential challenges in servo drive technology. The product range includes a limited number of variants and options and therefore enables a simple overview and selection. They form the core of the servomotors for the SINAMICS S210 servo drive system.

The 1FT2 servomotors are an extension of the 1FK2 motor portfolio – see chapter 3.2.

They are more finely graded in terms of rated speeds, offer additional torque levels and have numerous variations and options. This makes it possible to solve the diverse challenges in the drive technology more precisely. Even more demanding tasks or applications in difficult environments can be mastered with 1FT2 servomotors.

#### **SIMOTICS S-1FK2 High Dynamic motors**

Highest dynamic response through low inertia for highly dynamic applications with low moved masses.

#### **SIMOTICS S-1FK2 Compact motors**

Precise, stable control with medium to high masses to be moved with medium moment of inertia.

### Benefits

The SIMOTICS S-1FK2 servomotors fully exploit their strengths in the system with the SINAMICS S210 converter:

- Short adjustment and positioning times
- Quick and precise compensation of disturbances
- Stable closed loop control with high dynamic response

This is achieved by:

- Rapid control cycle
- High pulse frequency
- Complex rule algorithms
- High-resolution optical encoder with fast scanning
- Low moment of inertia of the motors
- High overload capability

### Application

- Packaging machines
- Handling equipment
- Feed and withdrawal devices
- Stacking units
- Automatic assembly machines
- Laboratory automation
- Woodworking, glass and ceramic industries
- Digital printing machines

### More information

#### **Environmental Product Declaration (EPD)**

Environmental Product Declarations (EPD) are available as PDFs for this product. The EPD PDF provides brief and concise information about the ecological properties of a product.

You can find more information on the internet at: <https://support.industry.siemens.com/cs/ww/en/ps/24677/cert?ci=5690>

#### **SIMOTICS S-1FK2 servo planetary geared motors**

SIMOTICS S-1FK2 servomotors can optionally be ordered as SIMOTICS S-1FK2 servo planetary geared motors with coaxial gearboxes – see chapter 3.4.

SIMOTICS S-1FK2 servo planetary geared motors with coaxial gearboxes NRB, NRK, NLC are highly dynamic, compact and economical drive units. The combinations, each composed of a servomotor with a high-performance coaxial planetary gearbox, are suitable for a wide range of applications in an industrial environment.

These planetary geared motors are specified and delivered completely as a unit. All outstanding performance data are matched to the motor-gearbox combination.

#### **More technical information**

Further documentation, such as the operating instructions, is available free on the internet at: [www.siemens.com/sinamics-s210/documentation](http://www.siemens.com/sinamics-s210/documentation)

Detailed information on the SINAMICS S210 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at: [www.siemens.com/sinamics-s210](http://www.siemens.com/sinamics-s210) and is also available via the Siemens Product Configurator on the internet.

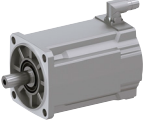

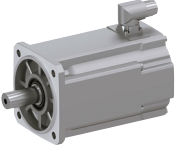

#### **Configuration in the Siemens Product Configurator**

The Siemens Product Configurator for the SINAMICS S210 drive system can be found in SiePortal at the following address: [www.siemens.com/sinamics-s210/configuration](http://www.siemens.com/sinamics-s210/configuration)

In addition, the SIMOTICS S-1FK2 servo motors and the SIMOTICS S-1FK2 servo planetary geared motors with coaxial gearboxes can be found at the following address in the Siemens Product Configurator in SiePortal: [www.siemens.com/simotics-1fk2/configuration](http://www.siemens.com/simotics-1fk2/configuration) [www.siemens.com/simotics-1fk2-servogearmotors/configuration](http://www.siemens.com/simotics-1fk2-servogearmotors/configuration)

# SIMOTICS S-1FK2 servomotors for SINAMICS S210

## Technical specifications

### General technical specifications

SIMOTICS S-1FK2 High Dynamic/Compact motors	
<b>Motor type</b>	Permanent-magnet synchronous motor
<b>Permissible operating conditions without derating</b> • Ambient temperature • Installation altitude, max.	-15 ... +40 °C (5 ... 104 °F) 1000 m (3281 ft)
<b>Degree of protection</b> According to EN 60034-5 (IEC 60034-5)	IP64 IP65 optional or retrofittable
<b>Cooling</b> According to EN 60034-6	Natural cooling (IC410)
<b>Type of construction</b> According to EN 60034-7 (IEC 60034-7)	IM B5 (IM V1, IM V3)
<b>Shaft end</b> According to DIN 748-3 (IEC 60072-1)	Plain shaft Optional shaft with feather key (half-key balancing)
<b>Shaft and flange accuracy</b> According to DIN 42955 (IEC 60072-1)	Tolerance N In each case for radial eccentricity of the shaft end, concentricity of the centering ring, and axial eccentricity of the mounting flange to the axis of the shaft end.
<b>Vibration severity grade</b> According to EN 60034-14 (IEC 60034-14)	Grade A is maintained up to rated speed
<b>Stator winding insulation</b> According to EN 60034-1 (IEC 60034-1) • 1FK2102, 1FK2.03  • 1FK2.04, 1FK2.05, 1FK2.06, 1FK2.08, 1FK2.10	Thermal class 130 (B) for a winding overtemperature of $\Delta T = 80$ K Thermal class 155 (F) for a winding overtemperature of $\Delta T = 100$ K
<b>Sound pressure level <math>L_{pA}</math> (1 m), max.</b> According to ISO 1680 • 1FK2102, 1FK2.03, 1FK2.04 • 1FK2.05 and 1FK2.06 • 1FK2.08 and 1FK2.10	55 dB(A) + 3 dB(A) tolerance 65 dB(A) + 3 dB(A) tolerance 70 dB(A) + 3 dB(A) tolerance
<b>Encoder system</b>	• AS22DQC (absolute encoder 22-bit singleturn) • AM22DQC (absolute encoder 22-bit + 12-bit multiturn)
<b>Holding brake</b>	Optional integrated holding brake
<b>Connection</b>	One Cable Connection (OCC) for signals and power Rotatable connector
<b>Paint finish</b>	RAL 7016 (anthracite gray)
<b>Certificates of suitability</b>	cURus, CE

## Technical specifications

### Regulations, standards, specifications

The motors comply with the appropriate standards and regulations, see table below.

As a result of the fact that in many countries the national regulations have been completely harmonized with the international IEC 60034-1 recommendation, there are no longer any differences with respect to coolant temperatures, temperature classes and temperature rise limits.

General specifications for rotating electrical machines	IEC 60034-1
Terminal designations and direction of rotation for electrical machines	IEC 60034-8
Types of construction of rotating electrical machines	IEC 60034-7
Cooling methods of rotating electrical machines	IEC 60034-6
Degrees of protection of rotating electrical machines	IEC 60034-5
Vibration severity of rotating electrical machines	IEC 60034-14
Noise limit values for rotating electrical machines	IEC 60034-9
Cylindrical shaft ends for electrical machines	DIN 748-3/IEC 60072-1

**UL** SIMOTICS S-1FK2 motors have UL approval from Underwriters Laboratories Inc. and are marked with the "UL Recognized Component" test symbol. This is used for components which are part of a larger product or system. This confirmed compliance with the corresponding US American and Canadian regulations, and allowed access to the North American market.

**CE** For SIMOTICS S-1FK2 motors, conformity with the relevant EC directives 2006/95/EC and 2014/35/EU and the relevant standards EN 60034-1:2010 and EN 60204-1:2006 is confirmed. By applying the CE mark to the product, Siemens AG confirms this for the product, and secures the free movement of goods within the European Union.

### Degree of protection acc. to IEC 60034-5

A suitable degree of protection must be selected according to the operating and environmental conditions to protect the machine against damage caused by the ingress of water and other liquids, as well as dust and foreign bodies.

SIMOTICS S-1FK2 motors have degree of protection IP64 as standard.

The motor can be optionally supplied with a radial shaft seal ring in degree of protection IP65. This increases the protection against the ingress of liquids.

The degree of protection designation is composed from the code **IP** (for International Protection) and two code numbers for the protection against touching and penetration of foreign bodies, and the degree of protection against the ingress of water.

#### First code number

6: Protection against dust ingress and complete protection against touching

#### Second code number

4: Protection against splashwater from any direction

5: Protection against jet water from any direction

#### Recommended degrees of protection for AC motors

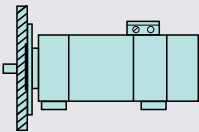

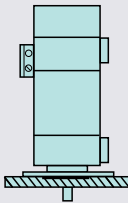

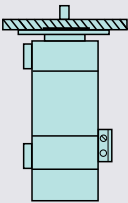

When cooling lubricants are used, protection against water alone is inadequate. The IP rating should only be considered as a guide value in this case. The motors may have to be protected by suitable covers. Attention must be paid to providing suitable sealing of the motor shaft for the selected degree of protection for the motor.

The following table can serve as a decision aid for selecting the proper degree of protection for motors. A permanent covering of liquid on the flange must be avoided when the motor is mounted with the shaft end facing upwards (IM V3).

Effect	General workshop environment	Water/general cooling lubricant (95 % water, 5 % oil)
Dry	IP64	–
Water-enriched environment	–	IP64
Mist	–	IP65
Spray	–	IP65

### Type of construction, mounting position according to IEC 60034-7

SIMOTICS S-1FK2 motors are designed in type of construction IM B5. It can also be used in mounting positions IM V1 and IM V3.

Code 1	IM B5	IM V1	IM V3
Code 2	IM 3001	IM 3011	IM 3031
			
	Horizontal flange mounting	Flange mounting, output shaft pointing vertically downwards	Flange mounting, output shaft pointing vertically upwards

## Technical specifications

### Shaft and flange accuracy in accordance with IEC 60072-1

Radial eccentricity tolerance of shaft in relation to housing axis

(referred to cylindrical shaft ends)

Motor	Shaft ends D × L	Radial eccentricity Tolerance N
	mm (in)	µm
1FK2102	8 × 25 (0.31 × 0.98)	30
1FK2.03	14 × 30 (0.55 × 1.18)	35
	11 × 23 (0.43 × 0.91)	35
1FK2.04	19 × 40 (0.75 × 1.57)	40
	14 × 30 (0.55 × 1.18)	35
1FK2.05	19 × 40 (0.75 × 1.57)	40
1FK2.06	24 × 50 (0.94 × 1.97)	40
1FK2208	32 × 58 (1.26 × 2.28)	50
1FK2210	38 × 80 (1.50 × 3.15)	50

Concentricity and axial eccentricity tolerance of the flange surface for the shaft axis

(referred to the centering diameter of the mounting flange)

Motor	Centering diameter	Concentricity and axial eccentricity Tolerance N
	mm (in)	µm
1FK2102	30 (1.18)	80
1FK2.03	50 (1.97)	
1FK2.04	70 (2.76)	
1FK2205	80 (3.15)	
1FK2105	95 (3.74)	
1FK2.06	110 (4.33)	
1FK2208	130 (5.12)	
1FK2210	130 (5.12)

### Vibration severity and vibration severity grade A according to IEC 60034-14

Vibration severity limit values

The vibration severity is the RMS value of the vibration velocity (frequency range from 10 Hz to 1000 Hz). The vibration severity

is measured using electrical measuring devices according to DIN 45666.

The specified values refer only to the motor. These values can increase as a result of the overall system vibrational behavior due to installation.

The speeds of 1800 r/min and 3600 r/min and the associated limit values are specified according to IEC 60034-14. The speeds of 4500 r/min and 6000 r/min and the specified values are defined by the motor manufacturer.

The motors maintain vibration severity grade A up to the rated speed.

### Balancing according to ISO 21940-32

Apart from the balance quality of the motor, the vibrational quality of motors with attached pulleys is mainly determined by the balance state of the mounted component. If the motor and the mounted component are balanced separately before being joined, the balancing process of the pulley is to be adapted to the motor's balancing type.

SIMOTICS S-1FK2 motors with feather keys are always half-key balanced. In general, motors with a plain shaft are recommended for systems with the most stringent vibrational quality requirements.

## Technical specifications

### Vibration stress, imitted vibration values

The requirements of environmental class 3M8 (according to EN 60721-3-3 Table 6) must be maintained for proper function and safeguard the bearing life. The following limits are valid for (imitted) vibration values introduced into the motor from outside:

- Vibration velocity  $V_{rms}$  according to ISO 10816, max. 4.5 mm/s (0.18 in/s)
- Vibration acceleration  $a_{peak}$  axial and radial 50 m/s<sup>2</sup> (164 ft/s<sup>2</sup>)

During transport, the motors withstand single shocks (6 ms) of up to 250 m/s<sup>2</sup> (820 ft/s<sup>2</sup>).

### Ambient temperature and installation altitude

Operating range without restrictions:

Temperature range from -15 °C to +40 °C (5.0 °F to 104 °F), installation altitude up to 1000 m (3281 ft).

If deviating conditions are encountered, the S1 characteristic of the motor must be adapted with regard to speed and torque.

Use the following equation to calculate the reduced S1 characteristic:  $S1_{red}(n) = x_D \times S1_{40°C; 1000m}(n/x_D)$

Installation altitude above sea level m (ft)	Derating factor $x_D$ at an ambient temperature of					
	5 °C (41 °F)	10 °C (50 °F)	20 °C (68 °F)	30 °C (86 °F)	40 °C (104 °F)	50 °C (122 °F)
1000 (3281)	1.16	1.14	1.1	1.05	1	0.91
2000 (6562)	1.12	1.1	1.05	1	0.95	0.84

### Holding brake

Many drives need a holding brake with an EMERGENCY STOP function for safety reasons or to meet process requirements. The brakes used on the SIMOTICS S-1FK2 motors function according to the closed-circuit principle. A spring or permanent magnet exerts a tensile force on the brake armature disk, i.e. in a state of zero current, the brake is closed and the motor shaft thereby stopped.

An electric current that flows through a coil generates an opposing field that counteracts the force effect of the spring or permanent magnet and releases or holds open the brake. Only a limited number of braking operations can be performed for an EMERGENCY STOP or power failure without causing excessive wear on the holding brake. The holding brake is not an operational brake. Regular dynamic braking leads to increased wear and premature brake failure. In order to ensure the functionality

Motor	Shaft height	Holding torque at 120 °C (248 °F)	Average dynamic braking torque at 120 °C (248 °F)	Maximum dynamic braking torque at 120 °C (248 °F)	Opening time	Closing time	Maximum permissible single switching energy	Total operating energy (service life)	Holding current	Break-induced current, typ. <sup>1)</sup> for 500 ms
		Nm (lb <sub>F</sub> -ft)	Nm (lb <sub>F</sub> -ft)	Nm (lb <sub>F</sub> -ft)	ms	ms	J	kJ	A	A

1FK2210-4	100	55 (40.57)	26 (19.18)	100 (73.76)	130	65	8700	3800	0.5	1.5
1FK2210-5	100	55 (40.57)	26 (19.18)	100 (73.76)	130	65	8700	3800	0.5	1.5

<sup>1)</sup> Typical values at an ambient temperature of 20 °C (68 °F).  
At -15 °C (5 °F), the break-induced currents can increase by up to 30 %.

### Encoder systems

In motors with integrated OCC/DRIVE-CLiQ interface, the sensor signal is already digitally prepared in the motor, and then transferred quickly and without loss to the drive system. Motors with an OCC/DRIVE-CLiQ interface simplify commissioning and diagnostics, as the motor parameters and encoder system are identified automatically.

#### Single-turn absolute encoder

This encoder outputs an absolute angular position between 0° and 360° in the specified resolution. In contrast to the multi-turn absolute encoder, it does not have a revolution counter, and can therefore only supply the position value within one revolution. It does not have a traversing range.

#### Multi-turn absolute encoder

This encoder outputs an absolute angular position between 0° and 360° in the specified resolution. It can also count 4096 revolutions. So with a ball screw, for example, the absolute position of the slide can be determined over a longer distance.

14th position in the Article No. of the motor	Designation	
1FK2...-.....- <b>S</b> ..	AS22DQC	Absolute encoder 22-bit singleturn (resolution 4194304)
1FK2...-.....- <b>M</b> ..	AM22DQC	Absolute encoder 22-bit + 12-bit multiturn (resolution 4194304, traversing range 4096 revolutions)

and specification of the brake, neither the total operating energy nor the maximum switching energy per braking operation may be exceeded.

The braking signal is already fully integrated into the SINAMICS S210 converter system, so that an external circuit is not necessary.

After an EMERGENCY STOP sequence with the maximum single switching energy, a cooling time of at least 5 minutes must be allowed.

The following table shows the technical specifications of the holding brakes for operation with SINAMICS S210 (for 1 AC converters, hardware version 2 or higher) and firmware V5.2 or higher.

Detailed technical information on the SINAMICS S210 servo drive system is available on the internet at:

[www.siemens.com/sinamics-s210/documentation](http://www.siemens.com/sinamics-s210/documentation)

In addition, the Siemens Product Configurator for the SINAMICS S210 drive system can be used on the internet at the following address:

[www.siemens.com/sinamics-s210/configuration](http://www.siemens.com/sinamics-s210/configuration)

In addition, the SIMOTICS S-1FT2 servo motors can be found at the following address in the Siemens Product Configurator in SiePortal:

[www.siemens.com/simotics-1ft2/configuration](http://www.siemens.com/simotics-1ft2/configuration)

## SIMOTICS S-1FT2 servomotors for SINAMICS S210

### Overview

SIMOTICS S-1FT2 servomotors, natural cooling

SIMOTICS S-1FT2 servomotors, forced ventilation

The SIMOTICS S-1FT2 servomotors are compact and highly dynamic synchronous motors for a wide range of uses in an industrial environment. They are characterized by high power density, degree of protection and overload capability. You can choose between natural cooling or forced ventilation. In the case of natural cooling, the heat loss is dissipated via the surface, while in the case of forced ventilation, an attached fan dissipates the heat loss and significantly increases the continuous performance of the motor.

The 1FT2 servomotors are an extension of the 1FK2 motor portfolio. They are more finely graded in terms of rated speeds, offer additional torque levels and have numerous variations and options. This makes it possible to solve the diverse challenges in the drive technology more precisely. Even more demanding tasks or applications in difficult environments can be mastered with 1FT2 servomotors.

#### **SIMOTICS S-1FT2 High Dynamic motors**

Highest dynamic response through low inertia for highly dynamic applications with low moved masses.

#### **SIMOTICS S-1FT2 Compact motors**

Precise, stable control with medium to high masses to be moved with medium moment of inertia.

### Benefits

The SIMOTICS S-1FT2 servomotors fully exploit their strengths in the system with the SINAMICS S210 converter:

- Short adjustment and positioning times
- Quick and precise compensation of disturbances
- Stable closed loop control with high dynamic response
- Highest flexibility during selection
- More rugged
- Best accuracy

This is achieved by:

- Rapid control cycle
- High pulse frequency
- Complex rule algorithms
- Highest resolution optical encoder
- Low moment of inertia of the motors
- High overload capability

### Application

- Packaging machines
- Handling equipment
- Feed and withdrawal devices
- Stacking units
- Automatic assembly machines
- Laboratory automation
- Woodworking, glass and ceramic industries
- Digital printing machines

### More information

#### **Environmental Product Declaration (EPD)**

Environmental Product Declarations (EPD) are available as PDFs for this product.

The EPD PDF provides brief and concise information about the ecological properties of a product.

You can find more information on the internet at:

<https://support.industry.siemens.com/cs/ww/en/ps/28193/cert?ci=5690>

#### **SIMOTICS S-1FT2 servo planetary geared motors**

SIMOTICS S-1FT2 servomotors can optionally be ordered as SIMOTICS S-1FT2 servo planetary geared motors with coaxial gearboxes or angular gearboxes – see chapter 3.4.

SIMOTICS S-1FT2 servo planetary geared motors with coaxial gearboxes NRB, NRK, NLC or with angular gearboxes NRBW, NRKW, NLCW are highly dynamic, compact and economical drive units. The combinations, each composed of a servomotor with a high-performance coaxial or angular planetary gearbox, are suitable for a wide range of applications in an industrial environment.

These planetary geared motors are specified and delivered completely as a unit. All outstanding performance data are matched to the motor-gearbox combination.

#### **More technical information**

Further documentation, such as the operating instructions, is available free on the internet at:

[www.siemens.com/sinamics-s210/documentation](http://www.siemens.com/sinamics-s210/documentation)

Detailed information on the SINAMICS S210 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:

[www.siemens.com/sinamics-s210](http://www.siemens.com/sinamics-s210)

and is also available via the Siemens Product Configurator on the internet.

#### **Configuration in the Siemens Product Configurator**

The Siemens Product Configurator for the SINAMICS S210 drive system can be found in SiePortal at the following address:

[www.siemens.com/sinamics-s210/configuration](http://www.siemens.com/sinamics-s210/configuration)

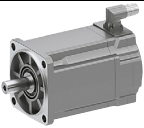

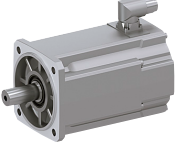

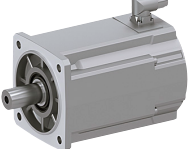

In addition, the SIMOTICS S-1FT2 servo motors and the SIMOTICS S-1FT2 servo planetary geared motors with coaxial gearboxes can be found at the following address in the Siemens Product Configurator in SiePortal:

[www.siemens.com/simotics-1ft2/configuration](http://www.siemens.com/simotics-1ft2/configuration)

[www.siemens.com/simotics-1ft2-servogearmotors/configuration](http://www.siemens.com/simotics-1ft2-servogearmotors/configuration)

## SIMOTICS S-1FT2 servomotors for SINAMICS S210

### Options

Option	Additional identification code <b>-Z</b> with order code and plain text where applicable 1FT2 . . . - . . . . . - . . . A . - <b>Z</b> Order code
Low temperature -30 °C	<b>Q30</b>
Suitable for dry room environments and certification for clean rooms	<b>Q40</b>
Customer-specific text on rating plate	<b>Y84</b> with plain text
Planetary gearboxes	SIMOTICS S-1FT2 servomotors can optionally be ordered as SIMOTICS S-1FT2 servo planetary geared motors with coaxial gearbox or angular gearbox via the corresponding order codes – see chapter 3.4.
Paint finish	
• Without	<b>X00</b>
• Jet black RAL 9005	<b>X01</b>
• Cream white RAL 9001	<b>X02</b>
• Reseda green RAL 6011	<b>X03</b>
• Pebble gray RAL 7032	<b>X04</b>
• Sky blue RAL 5015	<b>X05</b>
• Light ivory RAL 1015	<b>X06</b>
• White aluminum RAL 9006	<b>X08</b>
Resistance	
• Special paint finish with additional primer	<b>K23</b>
• Increased detergent resistance	<b>N16</b>
• Metal rating plate instead of adhesive label	<b>Q31</b>
• Pressure equalization	<b>Q20</b>

Ordering example:

**1FT2104-4AF00-1SA0-Z  
N16+Q31+X03**

#### Low temperature -30 °C – order code **Q30**

The permissible temperature range is defined as -15 °C to +40 °C as standard (without power reduction).

A version of the 1FT2 motors that can handle an extended temperature range down to -30 °C is also available as an option via the order code **Q30**. Typical applications of this version include cold stores.

However, the extended operating temperature range is not available for the following versions:

- Degree of protection IP67
- Motors with gearbox
- Motors with forced ventilation

#### Suitable for dry room conditions and certification for clean rooms – order code **Q40**

The permissible range for relative ambient air humidity is 5 % to 95 % as standard, suitability for use in clean rooms is not certified. The 1FT2 motors can optionally be designed for use in extremely dry environments and with certification for use in clean rooms via order code **Q40**.

The following clean room classes are met according to ISO 156441-14 and have been certified accordingly by the TÜV (German Technical Inspectorate):

- Motors without gearbox, with degree of protection IP64: ISO class 7 or better
- Motors without gearbox, with degree of protection IP65: ISO class 6 or better
- Motors with gearbox NRB(W), NRK(W), or NLC(W): ISO class 7 or better

The corresponding certificates can be viewed here:

<https://support.industry.siemens.com/cs/document/109815586>

These motors feature extended specifications for use in relative air humidity: Operation from a relative humidity level of just 0.3 % (dew point -50 °C at 20 °C ambient air temperature) is permitted.

#### Customer-specific text on the rating plate – order code **Y84** with plain text

A text (maximum of 20 characters), which can be freely selected by the person placing the order, can optionally be printed on the rating plate of the 1FT2 motors. Labels can then, for example, be used for the name of the axis, the installation location or customer-specific spare part numbers. The order is placed with the order code Y84 and the plain text for the desired print.

#### Planetary gearboxes – order codes see chapter 3.4

SIMOTICS S-1FT2 servomotors can optionally be ordered as SIMOTICS S-1FT2 servo planetary geared motors with coaxial gearbox or angular gearbox via the corresponding order codes.

SIMOTICS S-1FT2 servo planetary geared motors are highly dynamic, compact, and efficient drive units. The combinations, each comprising a servomotor with a high-performance coaxial or angular planetary gearbox, are suitable for a wide range of applications in industrial environments.

These planetary geared motors are specified and supplied as a complete unit. All outstanding performance data are matched to the motor-gearbox combination.

For more information see chapter 3.4 "SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors".

## Options

### Paint finish –

#### order codes **X00 ... X08**

If no specific color or paint finish data are specified when placing the order, the 1FT2 motors are finished in the standard anthracite gray color (RAL 7016). Various special colors are available as options. Special colors are ordered via the order codes **X00 ... X08**.

The paint finish in standard and special colors meets the requirements for environmental conditions of climate class 3K4 according to IEC 60721-3-3, with the exception of the influencing variables "low air temperature", "condensation", and "low air pressure". It satisfies the requirements of corrosivity category C1 according to EN ISO 12944-2.

### Special paint finish with additional primer –

#### order code **K23**

- Additional primer with paint finish in the standard anthracite gray color (RAL 7016).
- Properties same as standard paint finish - in addition, condensation is permitted on the external surfaces of the motor.
- A combination with a special color (order codes **X01 ... X08**) as per the color table is permitted - however, a combination with the order code X00 (no paint finish) is not permitted.

### Increased detergent resistance –

#### order code **N16**

(includes the properties special paint finish with additional primer – order code **K23**)

The 1FT2 motors are available with increased chemical resistance via order code **N16**. These have the following additional properties:

- 4-layer paint system (PS Premium paint system)
- Nickel-plated plug connectors
- Resistant to greases, mineral oils, aliphatic solvents (10 %), caustic soda (10 %)

Systems used in the foodstuff industry are typical applications for these versions. With this option, the motor satisfies the requirements of corrosivity category C4(M) according to EN ISO 12944-2.

Certification in terms of the resistance to common ECOLAB cleaners and disinfectants can be viewed here:

<https://support.industry.siemens.com/cs/document/58657336>

### Metal rating plate instead of adhesive label –

#### order code **Q31**

The rating plate of the motor is designed as an adhesive label as standard. However, a metal rating plate made of aluminum can be ordered instead via order code **Q31**. The labeling is lasered on. This ensures legibility for a long time even under poor environmental conditions.

### Pressure equalization –

#### order code **Q20**

When a motor with degree of protection IP67 cools down following operation, this can lead to underpressure in the motor. This may result in moisture ingress. Moisture ingress of this kind can be prevented by using a defined air supply via a connected pressure equalization tube.

<b>Holding brake</b>	Optional integrated holding brake
<b>Connection</b>	One Cable Connection (OCC) for signals and power Rotatable connector
<b>Coating color</b>	RAL 7016 (anthracite gray) <a href="#">See Options for more colors</a>
<b>Certificates of suitability</b>	cURus, CE, EAC, CEL

## Technical specifications

### Regulations, standards, specifications

The motors comply with the appropriate standards and regulations, see table below.

As a result of the fact that in many countries the national regulations have been completely harmonized with the international IEC 60034-1 recommendation, there are no longer any differences with respect to coolant temperatures, temperature classes and temperature rise limits.

General specifications for rotating electrical machines	IEC 60034-1
Terminal designations and direction of rotation for electrical machines	IEC 60034-8
Types of construction of rotating electrical machines	IEC 60034-7
Cooling methods of rotating electrical machines	IEC 60034-6
Degrees of protection of rotating electrical machines	IEC 60034-5
Vibration severity of rotating electrical machines	IEC 60034-14
Noise limit values for rotating electrical machines	IEC 60034-9
Cylindrical shaft ends for electrical machines	DIN 748-3/IEC 60072-1

 SIMOTICS S-1FT2 motors have UL approval from Underwriters Laboratories Inc. and are marked with the "UL Recognized Component" test symbol.

This is used for components which are part of a larger product or system. This confirmed compliance with the corresponding US American and Canadian regulations, and allowed access to the North American market.

 For SIMOTICS S-1FT2 motors, conformity with the relevant EC directives 2006/95/EC and 2014/35/EU and the relevant standards EN 60034-1:2010 and EN 60204-1:2006 is confirmed. By applying the CE mark to the product, Siemens AG confirms this for the product, and secures the free movement of goods within the European Union.

### Degree of protection acc. to IEC 60034-5

A suitable degree of protection must be selected according to the operating and environmental conditions to protect the motor against damage caused by the ingress of water and other liquids, as well as dust and foreign bodies.

SIMOTICS S-1FT2 motors have degree of protection IP64 as standard.

The motor can be optionally supplied with a radial shaft seal ring with degree of protection IP65. This increases the protection against the ingress of liquids.

Contrary to degree of protection IP65, degree of protection IP67 has increased protection against jet and splashing water as well as brief immersion. The mounting position of the motor must be chosen so that the stagnant water at the shaft exit is avoided.

The degree of protection designation is composed from the code **IP** (for International Protection) and two code numbers for the protection against touching and penetration of foreign bodies, and the degree of protection against the ingress of water.

#### First code number

6: Protection against dust ingress and complete protection against touching

#### Second code number

4: Protection against splashwater from any direction

5: Protection against jet water from any direction

7: Protection against brief immersion

#### Recommended degrees of protection for three-phase motors

When cooling lubricants are used, protection against water alone is inadequate. The IP rating should only be considered as a guide value in this case. The motors may have to be protected by suitable covers. Attention must be paid to providing suitable sealing of the motor shaft for the selected degree of protection for the motor.

The following table can serve as a decision aid for selecting the proper degree of protection for motors. A permanent covering of liquid on the flange must be avoided when the motor is mounted with the shaft end facing upwards (IM V3).

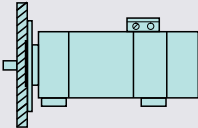

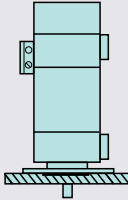

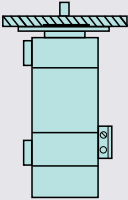

Effect	General workshop environment	Water/ general cooling lubricant (95 % water, 5 % oil)
Dry	IP64	–
Water-enriched environment	–	IP64
Mist	–	IP65
Spraying water	–	IP65
Water jet	–	IP67
Splash/brief immersion/ constant inundation	–	IP67

# SIMOTICS S-1FT2 servomotors for SINAMICS S210

## Technical specifications

### Design format, mounting position according to IEC 60034-7

SIMOTICS S-1FT2 motors are designed in type of construction IM B5. It can also be used in mounting positions IM V1 and IM V3.

Code 1	IM B5	IM V1	IM V3
Code 2	IM 3001	IM 3011	IM 3031
			
	Horizontal flange mounting	Flange mounting, output shaft pointing vertically downwards	Flange mounting, output shaft pointing vertically upwards

### Shaft and flange accuracy in accordance with IEC 60072-1

Radial eccentricity tolerance of shaft in relation to housing axis

(referred to cylindrical shaft ends)

Motor	Shaft ends D × L	Radial eccentricity Tolerance N
	mm (in)	µm
1FT2102	8 × 25 (0.31 × 0.98)	30
1FT2.03	14 × 30 (0.55 × 1.18)	35
	11 × 23 (0.43 × 0.91)	35
1FT2.04	19 × 40 (0.75 × 1.57)	40
	14 × 30 (0.55 × 1.18)	35
1FT2.05	19 × 40 (0.75 × 1.57)	40
1FT2.06	24 × 50 (0.94 × 1.97)	40
1FT2.08	32 × 58 (1.26 × 2.28)	50
1FT2210	38 × 80 (1.50 × 3.15)	50

Concentricity and axial eccentricity tolerance of the flange surface for the shaft axis

(referred to the centering diameter of the mounting flange)

Motor	Centering diameter	Concentricity and axial eccentricity Tolerance N
	mm (in)	µm
1FT2102	30 (1.18)	80
1FT2.03	50 (1.97)	
1FT2.04	70 (2.76)	
1FT2205	80 (3.15)	
1FT2105	95 (3.74)	
1FT2.06	110 (4.33)	100
1FT2.08	130 (5.12)	
1FT2210	130 (5.12)	

## Technical specifications

### Vibration severity and vibration severity grade A according to IEC 60034-14

The vibration severity is the RMS value of the vibration velocity (frequency range from 10 Hz to 1000 Hz). The vibration severity is measured using electrical measuring devices according to DIN 45666.

The specified values refer only to the motor. These values can increase as a result of the overall system vibrational behavior due to installation.

Vibration severity limit values

The speeds of 1800 r/min and 3600 r/min and the associated limit values are specified according to IEC 60034-14. The speeds of 4500 r/min and 6000 r/min and the specified values are defined by the motor manufacturer.

The motors maintain vibration severity grade A up to the rated speed.

### Balancing according to ISO 21940-32

Apart from the balance quality of the motor, the vibrational quality of motors with attached pulleys is mainly determined by the balance state of the mounted component. If the motor and the mounted component are balanced separately before being joined, the balancing process of the pulley is to be adapted to the motor's balancing type.

SIMOTICS S-1FT2 motors with feather keys are always half-key balanced. In general, motors with a plain shaft are recommended for systems with the most stringent vibrational quality requirements.

### Vibration stress, imitted vibration values

The requirements of environmental class 3M8 (according to EN 60721-3-3 Table 6) must be maintained for proper function and safeguard the bearing life. The following limits are valid for (imitted) vibration values introduced into the motor from outside:

- Vibration velocity  $V_{rms}$  according to ISO 10816, max. 4.5 mm/s (0.18 in/s)
- Vibration acceleration  $a_{peak}$  axial and radial 50 m/s<sup>2</sup> (164 ft/s<sup>2</sup>)

During transport, the motors withstand single shocks (6 ms) of up to 250 m/s<sup>2</sup> (820 ft/s<sup>2</sup>).

### Ambient temperature and installation altitude

Operating range without restrictions:

Temperature range from -15 °C to +40 °C (5.0 °F to 104 °F), installation altitude up to 1000 m (3281 ft).

If deviating conditions are encountered, the S1 characteristic of the motor must be adapted with regard to speed and torque.

Use the following equation to calculate the reduced S1 characteristic:

$$S1_{red}(n) = x_D \times S1_{40^\circ C; 1000m}(n/x_D)$$

Installation altitude above sea level	Derating factor $x_D$ at an ambient temperature of					
	5 °C (41 °F)	10 °C (50 °F)	20 °C (68 °F)	30 °C (86 °F)	40 °C (104 °F)	50 °C (122 °F)
1000 (3281)	1.16	1.14	1.1	1.05	1	0.91
2000 (6562)	1.12	1.1	1.05	1	0.95	0.84

### Encoder systems

In motors with integrated OCC/DRIVE-CLiQ interface, the sensor signal is already digitally prepared in the motor, and then transferred quickly and without loss to the drive system. Motors with an OCC/DRIVE-CLiQ interface simplify commissioning and diagnostics, as the motor parameters and encoder system are identified automatically.

#### Singleturn absolute encoder

This encoder outputs an absolute angular position between 0° and 360° in the specified resolution. In contrast to the multi-turn absolute encoder, it does not have a revolution counter, and can therefore only supply the position value within one revolution. It does not have a traversing range.

#### Multiturn absolute encoder

This encoder outputs an absolute angular position between 0° and 360° in the specified resolution. It can also count 4096 revolutions. So with a ball screw, for example, the absolute position of the slide can be determined over a longer distance.

14th position in the Article No. of the motor	Designation	
1FT2 ...-...-S..	AS22DQC	Absolute encoder 22-bit singleturn (resolution 4194304)
1FT2 ...-...-M..	AM22DQC	Absolute encoder 22-bit + 12-bit multiturn (resolution 4194304, traversing range 4096 revolutions)
1FT2 ...-...-B..	AS26DQC	Absolute encoder 26-bit singleturn (resolution 67108864)
1FT2 ...-...-C..	AM26DQC	Absolute encoder 26-bit + 12-bit multiturn (resolution 67108864, traversing range 4096 revolutions)

## SIMOTICS S-1FT2 servomotors for SINAMICS S210

### Technical specifications

#### Holding brake

Many drives need a holding brake with an EMERGENCY STOP function for safety reasons or to meet process requirements. The brakes used on the SIMOTICS S-1FT2 motors function according to the closed-circuit principle. A spring or permanent magnet exerts a tensile force on the brake armature disk, i.e. in a state of zero current, the brake is closed and the motor shaft thereby stopped.

An electric current that flows through a coil generates an opposing field that counteracts the force effect of the spring or permanent magnet and releases or holds open the brake. Only a limited number of braking operations can be performed for an EMERGENCY STOP or power failure without causing excessive wear on the holding brake. The holding brake is not an operational brake. Regular dynamic braking leads to increased wear and premature brake failure. In order to ensure the functionality and specification of the brake, neither the total operating energy nor the maximum switching energy per braking operation may be exceeded. For the 1FT2108, 1FT2208-2, 1FT2208-3, 1FT2210-2 and 1FT2210-3 motors, a reinforced holding brake is also available.

The brake control is already fully integrated into the SINAMICS S210 converter system, so that an external circuit is not necessary.

After an EMERGENCY STOP sequence with the maximum single switching energy, a cooling time of at least 5 minutes must be allowed.

The following table contains technical specifications of the holding brakes for operating on a SINAMICS S210 (for 1-AC converters, hardware version 2 or higher) and firmware V5.2 or higher.

Motor	Shaft height	Holding torque at 120 °C (248 °F)	Average dynamic braking torque at 120 °C (248 °F)	Maximum dynamic braking torque at 120 °C (248 °F)	Opening time	Closing time	Maximum permissible single switching energy	Total operating energy (service life)	Holding current	Break-induced current, typ. <sup>1)</sup> for 500 ms

## SIMOTICS S-1FS2 servomotors for SINAMICS S210

### Overview

The SIMOTICS S-1FS2 servomotors are compact and highly dynamic synchronous motors, especially designed for use in food and pharmaceutical environments with the most stringent requirements for hygiene and cleanliness. They are characterized by high power density, degree of protection and overload capability, a design suitable for cleaning and the use of materials that are approved to be used in food processing.

### Benefits

The SIMOTICS S-1FS2 servomotors fully exploit their strengths in the system with the SINAMICS S210 converter:

- Short adjustment and positioning times
- Quick and precise compensation of disturbances
- Stable closed loop control with high dynamic response
- Maximum flexibility in the selection
- Increased ruggedness
- Simplified cleaning

This is achieved by:

- Rapid control cycle
- High pulse frequency
- Complex rule algorithms
- Highest resolution optical encoders
- Low moment of inertia of the motors
- High overload capability
- One cable connection system

### Application

- Food and beverage industry
- Pharmaceutical industry
- Packaging machines
- Handling equipment
- Feed and withdrawal devices

### More information

#### **More technical information**

Further documentation, such as the operating instructions, is available free on the internet at:

[www.siemens.com/sinamics-s210/documentation](http://www.siemens.com/sinamics-s210/documentation)

Detailed information on the SINAMICS S210 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:

[www.siemens.com/sinamics-s210](http://www.siemens.com/sinamics-s210)

and is also available via the Siemens Product Configurator on the internet.

#### **Configuration in the Siemens Product Configurator**

The Siemens Product Configurator for the SINAMICS S210 drive system can be found in SiePortal at the following address:

[www.siemens.com/sinamics-s210/configuration](http://www.siemens.com/sinamics-s210/configuration)

In addition, the SIMOTICS S-1FS2 servo motors can be found at the following address in the Siemens Product Configurator in SiePortal:

[www.siemens.com/simotics-1fs2/configuration](http://www.siemens.com/simotics-1fs2/configuration)

# SIMOTICS S-1FS2 servomotors for SINAMICS S210

## Technical specifications

### General technical specifications

SIMOTICS S-1FS2 motors	
<b>Motor type</b>	Permanent-magnet synchronous motor
<b>Permissible operating conditions without derating</b>	
• Ambient temperature	-15 ... +40 °C (5 ... 104 °F)
• Installation altitude, max.	1000 m (3281 ft)
<b>Degree of protection</b>	IP66, IP67
According to EN 60034-5 (IEC 60034-5), ISO 20653	IP69K (does not apply to the shaft outlet)
<b>Cooling</b>	Natural cooling (IC410)
According to EN 60034-6	
<b>Type of construction</b>	IM B5 (IM V1, IM V3)
According to EN 60034-7 (IEC 60034-7)	
<b>Shaft end</b>	Plain shaft
According to DIN 748-3 (IEC 60072-1)	Optional shaft with feather key (half-key balancing)
<b>Shaft and flange accuracy</b>	Tolerance N
According to DIN 42955 (IEC 60072-1)	In each case for radial eccentricity of the shaft end, concentricity of the centering edge, and axial eccentricity of the mounting flange to the axis of the shaft end
<b>Vibration severity grade</b>	Grade A
According to EN 60034-14 (IEC 60034-14)	is maintained up to rated speed
<b>Stator winding insulation</b>	Thermal class 155 (F)
According to EN 60034-1 (IEC 60034-1)	for a winding overtemperature of $\Delta T = 100$ K
<b>Sound pressure level <math>L_{pA}</math> (1 m), max.</b>	
According to ISO 1680	
• 1FS2104	55 dB(A) + 3 dB(A) tolerance
• 1FS2105 and 1FS2106	65 dB(A) + 3 dB(A) tolerance
• 1FS2208	70 dB(A) + 3 dB(A) tolerance
<b>Encoder system</b>	AM22DQC (absolute encoder 22-bit + 12-bit multiturn)
<b>Holding brake</b>	Optional integrated holding brake
<b>Connection</b>	One Cable Connection (OCC) for signals and power, open cable end for direct connection to SINAMICS converter or cable end with plug connector to connect a MOTION-CONNECT basic line
<b>Surface</b>	Stainless steel 1.4404, roughness < 0.8 $\mu$ m
<b>Certificates of suitability</b>	cURus, CE, EAC, CEL, EHEDG

### Regulations, standards, specifications

The motors comply with the appropriate standards and regulations, see table below.

As a result of the fact that in many countries the national regulations have been completely harmonized with the international IEC 60034-1 recommendation, there are no longer any differences with respect to coolant temperatures, temperature classes and temperature rise limits.

General specifications for rotating electrical machines	IEC 60034-1
Terminal designations and direction of rotation for electrical machines	IEC 60034-8
Types of construction of rotating electrical machines	IEC 60034-7
Cooling methods of rotating electrical machines	IEC 60034-6
Degrees of protection of rotating electrical machines	IEC 60034-5
Vibration severity of rotating electrical machines	IEC 60034-14
Noise limit values for rotating electrical machines	IEC 60034-9
Cylindrical shaft ends for electrical machines	DIN 748-3/IEC 60072-1

SIMOTICS S-1FS2 motors have UL approval from Underwriters Laboratories Inc. and are marked with the "UL Recognized Component" test symbol.

This is used for components which are part of a larger product or system. This confirmed compliance with the corresponding US American and Canadian regulations, and allowed access to the North American market.

For SIMOTICS S-1FS2 motors, conformity with the relevant EC directives 2006/95/EC and 2014/35/EU and the relevant standards

EN 60034-1:2010 and EN 60204-1:2006 is confirmed. By applying the CE mark to the product, Siemens AG confirms this for the product, and secures the free movement of goods within the European Union.

#### Specific standards for the food industry

The SIMOTICS S-1FS2 motors meet the EHEDG directives for "Class I EL AUX". FDA-listed plastic materials are used in the relevant exterior areas. The bearing grease is approved in accordance with NSF H1.

EHEDG certificate:

<https://support.industry.siemens.com/cs/document/109805184>

## Technical specifications

### Degree of protection according to IEC 60034-5

A suitable degree of protection must be selected according to the operating and environmental conditions to protect the motor against damage caused by the ingress of water and other liquids, as well as dust and foreign bodies.

SIMOTICS S-1FS2 motors have degree of protection IP66/IP67 as standard.

In contrast to the degree of protection IP65, the degree of protection IP67 provides increased protection against water jets and splashing water as well as brief immersion. The mounting position of the motor must be chosen so that the stagnant water at the shaft exit is avoided.

The degree of protection designation is composed from the code IP (for International Protection) and two code numbers for the protection against touching and penetration of foreign bodies, and the degree of protection against the ingress of water.

#### First code number

6 Protection against dust ingress and complete protection against touching

#### Second code number

4: Protection against splashwater from any direction

5: Protection against jet water from any direction

6: Increased protection against powerful water jets from any direction

7: Protection against brief immersion

### Type of construction, mounting position according to IEC 60034-7

SIMOTICS S-1FS2 motors are designed in type of construction IM B5. They may also be used in the mounting positions IM V1 and IM V3.

### Degree of protection according to ISO 20653

The motor meets the IP69K requirements of the ISO 20653 standard. Using a much higher pressure for cleaning is generally not advisable in the food sector, as there is a risk of re-contaminating already cleaned system parts with the spray mist.

### Chemical resistance and cleaning agents

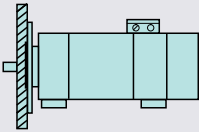

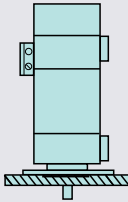

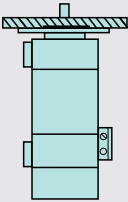

The SIMOTICS S-1FS2 motor is resistant to a wide range of cleaning agents and processes used in the food industry.

For detailed information, such as admissible cleaning agents, see operating instructions "SINAMICS servo drive system with 1FS2":

<https://support.industry.siemens.com/cs/document/109796333>

#### Note:

An EHEDG-compliant V3 mounting position requires additional measures, such as a cover for the motor flange.

Code 1	IM B5	IM V1	IM V3
Code 2	IM 3001	IM 3011	IM 3031
	 <p>Horizontal flange mounting</p>	 <p>Flange mounting, output shaft pointing vertically downwards</p>	 <p>Flange mounting, output shaft pointing vertically upwards</p>

# SIMOTICS S-1FS2 servomotors for SINAMICS S210

## Technical specifications

### Shaft and flange accuracy in accordance with IEC 60072-1

Radial eccentricity tolerance of shaft in relation to housing axis (referred to cylindrical shaft ends)

Motor	Shaft end D × L	Radial eccentricity Tolerance N
	mm (in)	
1FS2104	19 × 40 (0.75 × 1.57)	40
1FS2105		
1FS2106	24 × 50 (0.94 × 1.97)	

Concentricity and axial eccentricity tolerance of the flange surface for the shaft axis (referred to the centering diameter of the mounting flange)

Motor	Centering diameter	Concentricity and axial eccentricity Tolerance N
	mm (in)	
1FS2104	70 (2.76)	80
1FS2105	95 (3.74)	
1FS2106	110 (4.33)	100
1FS2208	130 (5.12)	

### Test: runout

### Test: concentricity

### Test: perpendicularity

### Vibration severity and vibration severity grade A according to IEC 60034-14

The vibration severity is the RMS value of the vibration velocity (frequency range from 10 Hz to 1000 Hz). The vibration severity is measured using electrical measuring devices according to DIN 45666.

The specified values refer only to the motor. These values can increase as a result of the overall system vibrational behavior due to installation.

### Vibration severity limit values

The speeds of 1800 r/min and 3600 r/min and the associated limit values are specified according to IEC 60034-14. The speeds of 4500 r/min and 6000 r/min and the specified values are defined by the motor manufacturer.

The motors maintain vibration severity grade A up to the rated speed.

### Balancing according to ISO 21940-32

Apart from the balance quality of the motor, the vibrational quality of motors with attached belt pulleys is mainly determined by the balance state of the mounted component. If the motor and the mounted component are balanced separately before being joined, the balancing process of the belt pulley is to be adapted to the motor's balancing type.

SIMOTICS S-1FS2 motors with feather keys are always half-key balanced. In general, motors with a plain shaft are recommended for systems with the most stringent vibrational quality requirements.

## Technical specifications

### Vibration stress, imitted vibration values

The requirements of environmental class 3M8 (according to EN 60721-3-3 Table 6) must be maintained for proper function and safeguard the bearing life. The following limits are valid for (imitted) vibration values introduced into the motor from outside:

- Vibration velocity  $V_{rms}$  according to ISO 10816, max. 4.5 mm/s (0.18 in/s)
- Vibration acceleration  $a_{peak}$  axial and radial 50 m/s<sup>2</sup> (164 ft/s<sup>2</sup>)

During transport, the motors withstand single shocks (6 ms) of up to 250 m/s<sup>2</sup> (820 ft/s<sup>2</sup>).

### Ambient temperature and installation altitude

Operating range without restrictions:

Temperature range from -15 °C to +40 °C (5.0 °F to 104 °F), installation altitude up to 1000 m (3281 ft).

If deviating conditions are encountered, the S1 characteristic of the motor must be adapted with regard to speed and torque.

Use the following equation to calculate the reduced S1 characteristic:

$$S1_{red}(n) = x_D \times S1_{40°C; 1000m}(n/x_D)$$

Installation altitude above sea level m (ft)	Derating factor $x_D$ at an ambient temperature of				
	30 °C (86 °F)	40 °C (104 °F)	45 °C (113 °F)	50 °C (122 °F)	55 °C (131 °F)
1000 (3281)	1.05	1	0.95	0.89	0.84
2000 (6562)	1	0.95	0.86	0.8	0.73

Larger installation heights with boundary conditions possible, see operating instructions. Operation up to 80 °C (176 °F) ambient temperature is possible with extended derating, design via TIA Selection Tool required.

### Holding brake

Many drives need a holding brake with an EMERGENCY STOP function for safety reasons or to meet process requirements. The brakes used on the SIMOTICS S-1FS2 motors operate on the quiescent current principle. A spring or permanent magnet exerts a tensile force on the brake armature disk. This means that the brake is closed and the motor shaft thereby stopped in a state of zero current.

An electric current that flows through a coil generates an opposing field that counteracts the force effect of the spring or permanent magnet and releases or holds open the brake. Only a limited number of braking operations can be performed for an EMERGENCY STOP or voltage failure without causing excessive wear on the holding brake. The holding brake is not an operational brake. Regular dynamic braking leads to increased wear and premature brake failure. In order to ensure the functionality and specification of the brake, neither the total operating energy nor the maximum switching energy per braking operation may be exceeded.

Motor	Shaft height	Holding torque at 120 °C (248 °F)	Average dynamic braking torque at 120 °C (248 °F)	Maximum dynamic braking torque at 120 °C (248 °F)	Opening time	Closing time	Maximum permissible single switching energy	Total operating energy (service life)	Holding current	Break-induced current, typ. <sup>1)</sup> for 500 ms
		Nm (lb <sub>f</sub> -ft)	Nm (lb <sub>f</sub> -ft)	Nm (lb <sub>f</sub> -ft)	ms	ms	J	kJ	A	A
1FS2104	40	3.3 (2.43)	3.3 (2.43)	9 (6.64)	50	40	270	120	0.2	1.2
1FS2105	52	8 (5.90)	5 (3.69)	18 (13.28)	35	20	570	284	0.3	1.1
1FS2106	63	16 (11.80)	9 (6.64)	35 (25.82)	70	35	1065	774	0.35	1.1
1FS2208	80	32 (23.60)	17 (12.54)	70 (51.63)	120	40	4800	2400	0.5	1.4

<sup>1)</sup> Typical values at an ambient temperature of 20 °C (68 °F). At -15 °C (5 °F), the break-induced currents can increase by up to 30 %.

### Encoder system

In motors with integrated OCC/DRIVE-CLiQ interface, the sensor signal is already digitally prepared in the motor, and then transferred quickly and without loss to the drive system. Motors with an OCC/DRIVE-CLiQ interface simplify commissioning and diagnostics, as the motor parameters and encoder system are identified automatically.

### Multiturn absolute encoder

AM22DQC: absolute encoder 22-bit + 12-bit multiturn

This encoder outputs an absolute angular position between 0° and 360° in the specified resolution. It can also count 4096 revolutions. The absolute position is also sensed in the de-energized state. With a ball screw, for example, the absolute position of the slide can be determined over a longer distance.

## SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

### Overview

#### Servo planetary geared motors

##### – SIMOTICS S-1FK2 and S-1FT2 with coaxial gearbox

- Gearbox type NRB

- Gearbox type NRK

- Gearbox type NLC

##### – SIMOTICS S-1FT2 with angular gearbox

- Gearbox type NRBW

- Gearbox type NRKW

- Gearbox type NLCW

SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors with the NRB, NRK, NLC coaxial gearboxes and SIMOTICS S-1FT2 servo planetary geared motors with the NRBW, NRKW, NLCW angular gearboxes are highly dynamic, compact and cost-effective drive units. The combinations, each composed of a servomotor with a high-performance planetary gearbox, are suitable for a wide range of applications in an industrial environment.

These planetary geared motors are specified and delivered completely as a unit. All outstanding performance data are matched to the motor-gearbox combination.

#### **Motors**

##### High Dynamic

Wherever small masses have to be moved with maximum dynamics and precision, the 1FK2 and 1FT2 High Dynamic servomotors with low inertia really come into their own.

The lightweight and low-friction gearboxes in conjunction with inertia-optimized clamping systems allow the highest cycle rates in the application.

##### Compact

If larger loads need to be moved with precision and dynamically, a motor version with higher inertia is unavoidable for controllable operations. The 1FK2 and 1FT2 Compact servomotors with medium inertia and planetary gearboxes with higher transmission ratios enable even difficult inertia conditions to be mastered in terms of the control technology.

## SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

## Overview

**Planetary gearboxes**

The three planetary gearboxes NRB(W), NRK(W) and NLC(W) can be mounted in all spatial positions without restriction and are maintenance-free thanks to their life-long lubrication.

**Coaxial gearboxes****NRB**

NRB is the lightest gearbox with the highest power density. Thanks to its low friction bearing design it is suitable for high speeds and only generates a slight amount of heat.

Application areas:

- Packaging
- Food industry
- Pharmaceutical and medical systems
- Auxiliary axes in machine tools

**NRK**

The NRK series gearbox is suitable for higher radial and axial forces due to the large output bearing. This gearbox is also suitable for higher speeds thanks to low internal friction.

Application areas:

- Automation and mounting technology
- Packaging
- Auxiliary axes in machine tools

**NLC**

Thanks to the preloaded tapered roller bearing, the NLC gearbox has a high degree of rigidity and is perfectly suited for high radial and axial loads. The IP65 cover provides protection against dust and water.

Application areas:

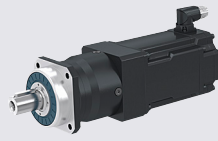

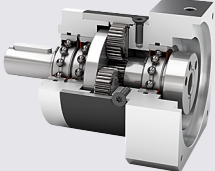

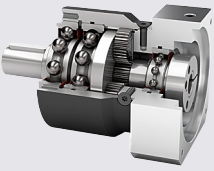

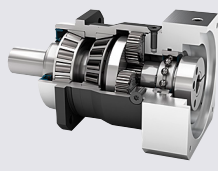

- Automation and mounting technology
- Packaging
- Food industry
- Printing industry
- Auxiliary axes in machine tools

**Angular gearboxes**

With a pre-built bevel gear stage, the planetary gearboxes NRB, NRK and NLC are also available as angular gearboxes NRBW, NRKW and NLCW.

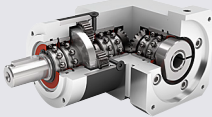

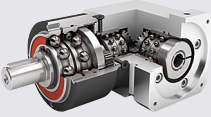

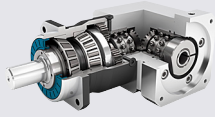

The angled versions are suitable for confined spaces.

Due to the additional angular stage, the losses in the angular gearbox are slightly higher, and the nominal data is reduced, compared to the corresponding coaxial version.

		-		Q 91		Q 92		Q 93												
	Standard																			

### Notes:

- The geared motor can only be delivered as a unit – motor plus gearbox – (no individual gearboxes).
- Not all combinations are possible.
- For shaft design with feather key, the gearbox data only applies to pulsating loads. With alternating load / reversal of direction of rotation, limitation of the torque as a function of the number of load cycles is required (see Configuration Manual).

## SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

## Option for shaft

The output shaft of the planetary gearbox can be ordered as a plain shaft for a friction-locked connection or optionally with a feather key for positive transmission.

A friction-locked connection free of backlash (plain shaft) is recommended for dynamic loads, particularly during reversals in operation.

For pulsating loads without reversals, a positive feather key connection is also suitable as an alternative.

## Limitation of output torques for gearbox shaft with feather key

It must be ensured that the following torques are not exceeded at the output shaft for gearboxes with feather key and changing application loads. Regardless of this, other limitations such as maximum torque  $M_{2max,G}$  or the rated torque  $M_{2N,G}$  of the gearbox components are maintained.

Gearbox	Max. application torque $M_2$ in feather key design in Nm	
	up to 10 million load changes	up to 100 million load changes
NRB040, NRBW040	9	7
NRB060, NRBW060	31	25
NRB080, NRBW080	68	54
NRB120, NRBW120	132	105
NRB160	401	319
NRK050, NRKW050	12	9
NRK070, NRKW070	No restriction	29
NRK090, NRKW090	84	67
NRK120, NRKW120	No restriction	190
NRK155	389	309
NLC060, NLCW060	37	29
NLC080, NLCW080	76	60
NLC120, NLCW120	239	190

## Option for lubrication

Planetary gearboxes can be optionally ordered with a food-grade lubricant.

This lubricant was developed for the food and pharmaceutical industries for unpredictable contact with products and packaging in the food, cosmetics, pharmaceutical and animal feed industries. NSF H1 registration ensures that the lubricant is compliant with FDA 21 CFR §178.3570.

Lubrication	Shaft design on the gearbox	Order code
Standard lubrication	Smooth solid shaft	<b>M00</b>
	Solid shaft with feather key	<b>M01</b>
Food-grade lubricant <sup>1)</sup>	Smooth solid shaft	<b>M10</b>
	Solid shaft with feather key	<b>M11</b>

## Option for the orientation of the output for angular gearboxes

In the case of angular geared motors, the gear output is oriented to the right as standard (view of the motor from the front). Optionally, a different assembly can be carried out according to the following table.

Orientation of the gearbox	Order code
 Gearbox output to the right, standard orientation	–
 Gearbox output upwards	<b>Q91</b>
 Gearbox output left	<b>Q92</b>
 Gearbox output to the bottom	<b>Q93</b>

<sup>1)</sup> For the angular planetary gearboxes NRBW, NRKW, NLCW, the choice of the food-grade lubricant leads to a reduction in the rating data from the following data tables. In this case, the exact performance and rating data can be found in the data sheet from the online configurator: [www.siemens.com/spc](http://www.siemens.com/spc)

## SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

### General technical specifications for NRB, NRK, NLC coaxial gearboxes and NRBW, NRKW, NLCW angular gearboxes

#### Technical specifications

##### General technical specifications for NRB, NRK, NLC coaxial gearboxes and NRBW, NRKW, NLCW angular gearboxes

Largest average input speed  $n_{1av,G}$  and maximum input speed  $n_{1max,G}$

$n_{1av,G}$  – largest average input speed:

In each time window of 15 minutes, the average input speed must be below  $n_{1av,G}$

$n_{1max,G}$  – maximum input speed:

The maximum input speed  $n_{1max,G}$  must never be exceeded.

The maximum speeds of the mounted motor can be found in the data sheet resulting from the configuration on the Siemens Product Configurator.

## Technical specifications

**Technical specifications for NRB coaxial gearbox**

$M_{2N,G}$  – Rated torque for gearbox components

An endurance strength calculation becomes necessary if this torque is exceeded (see Configuration Manual).

For the feather key version, the gearbox nominal torque is only permissible as a pulsating load or a reduction must be carried out depending on the number of load changes (see Components and Options).

## Coaxial gearbox type NRB

## Technical specifications

$M_{2Em.Off}$  – Emergency Off output torque of the gearbox components

The Emergency Off torque can be tolerated a maximum of 1000 times within the gearbox service life without causing unacceptable damage to the gearbox. This code can be used to check whether the torques, caused by very rare operating faults, can damage the gearbox.

Transmission ratio <i>i</i>	$M_{2Em.Off}$ – Emergency Off output torque of the gearbox components in Nm

## SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

### Coaxial gearbox type NRB

#### Technical specifications

##### $\eta_G$ – Efficiency of the gearbox components under full load

The exact values for the efficiency are, to some extent, dependent on the frame size of the mounted motor and can be found in the data sheet resulting from the configuration on the Siemens Product Configurator.

In the partial load range, especially when the gearbox is cold, the efficiency of the gearbox is always lower than at operating speed. The gear losses are already taken into account in the characteristic curves and in the following characteristic data of the geared motor or its components:  $M_{2,0}$ ,  $M_{2,max}$ ,  $M_{0,M}$ ,  $M_{max,M}$ .

A reduction of this characteristic curve and the characteristics on efficiency is not necessary.

Transmission ratio $i$	$\eta_G$ – Efficiency of the gearbox components under full load in %

## Permissible shaft loading capacity

The limit values shown for the bearing load refer to equivalent forces to be determined mathematically, whose effect is equivalent to the forces occurring in the load profile.

They only apply to radial and axial loads. Axial forces up to maximum  $F_A = 0.24 \times F_R$  are permissible in case of superimposition. They apply to the output speed of 100 r/min and in case of radial force for a force application point in the center of the shaft or for centrally applied axial force. For other speeds or force application points, the permissible radial forces must be obtained from the radial force diagrams of the Configuration Manual.

	Permissible shaft loading capacity, radial and axial forces in Nm

$\eta_G$  – Efficiency of the gearbox components under full load

The exact values for the efficiency are, to some extent, dependent on the frame size of the mounted motor and can be found in the data sheet resulting from the configuration on the Siemens Product Configurator.

In the partial load range, especially when the gearbox is cold, the efficiency of the gearbox is always lower than at operating speed.

The gear losses are already taken into account in the characteristic curves and in the following characteristic data of the geared motor or its components:  $M_{2,0}$ ,  $M_{2,max}$ ,  $M_{0,M}$ ,  $M_{max,M}$ .

A reduction of this characteristic curve and the characteristics on efficiency is not necessary.

## Permissible shaft loading capacity

The limit values shown for the bearing load refer to equivalent forces to be determined mathematically, whose effect is equivalent to the forces occurring in the load profile.

They only apply to radial and axial loads. Axial forces up to maximum  $F_A = 0.24 \times F_R$  are permissible in case of superimposition. They apply to the output speed of 100 r/min and in case of radial force for a force application point in the center of the shaft or for centrally applied axial force. For other speeds or force application points, the permissible radial forces must be obtained from the radial force diagrams of the Configuration Manual.

## Technical specifications

$C_{T2}$  – Torsional rigidity of the gearbox (related to the output)

The exact values for the torsional rigidity are dependent on the motor-gearbox combination and can be found in the data sheet resulting from the configuration on the Siemens Product Configurator.

Transmission ratio $i$	$C_{T2}$ – Torsional rigidity of the gearbox in Nm/°		
	Gearbox NLCW060	NLCW080	NLCW120
<b>1-stage</b>			
3	2,1	4,4	11
4	2,8	6,6	16
5	3,2	7,9	18
7	3,3	8,5	20
8	3,3	8,6	20
10	3,1	8,9	19
<b>2-stage</b>

40	4,4	12	26
64	3,7	9,3	22
100	3,0	8,4	17

$\varphi_2$  – Torsional backlash of the gearbox on the gearbox output

Gearbox stages $z$	$\varphi_2$ – Torsional backlash of the gearbox on the gearbox output in °		
	Gearbox NLCW060	NLCW080	NLCW120
1-stage	16	13	11
2-stage	18	15	13

## Permissible shaft loading capacity

The limit values shown for the bearing load refer to equivalent forces to be determined mathematically, whose effect is equivalent to the forces occurring in the load profile.

They only apply to radial and axial loads. Axial forces up to maximum  $F_A = 0.24 \times F_R$  are permissible in case of superimposition. They apply to the output speed of 100 r/min and in case of radial force for a force application point in the center of the shaft or for centrally applied axial force. For other speeds or force application points, the permissible radial forces must be obtained from the radial force diagrams of the Configuration Manual.

	Permissible shaft loading capacity, radial and axial forces in Nm		
	Gearbox NLCW060	NLCW080	NLCW120
<b>Average radial force <math>F_{R\ eq}</math></b>			
• for $L_{10h} = 20000$ h	3200	5500	6000

**Notes:**

- The geared motor can only be delivered as a unit – motor plus gearbox (no individual gearboxes).
- Not all combinations are possible – See selection and ordering data tables.
- For shaft design with feather key, the gearbox data only applies to pulsating loads. With alternating load/reversal of direction of rotation, limitation of the torque as a function of the number of load cycles is required (see Configuration Manual).

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

## Notes on the selection

### Selection and ordering data

#### Characteristic curves of the geared motor (available via the Siemens Product Configurator)

- 1  $M_{S1,M}$  – Characteristic of the largest thermally permissible effective torque of the motor component minus the gear friction and with consideration of the thermal interactions of the gearbox attachment.  
The effective operating point must be below this line to avoid thermal overload of the geared motor.
- 2  $M_{max,M}$  – Characteristic of the largest torque that can be generated by the motor component for a short time minus the gear friction.

$M_{S1,M}$  and  $M_{max,M}$  may exceed the mechanically permissible limits of the gearbox, depending on the selection of the motor-gearbox combination <sup>1)</sup>.

#### Important gearbox component data in this catalog:

- 3  $M_{2N,G}$  – The rated torque of the gearbox component at the output. This represents the fatigue strength limit of the gear teeth (independently of the motor). If exceeded, the gearbox is partially damaged and a service life calculation is required.
- 4  $M_{2max,G}$  – Maximum torque of the gearbox component. This is the limit of the time strength range (can be tolerated for 30000 revolutions of the output shaft). There is a risk of breakage if the limit is exceeded.
- 5  $n_{1av,G}$  – Greatest average input speed. In each time window of 15 minutes, the average input speed must be below  $n_{1av,G}$ .

#### Important motor component data in this catalog:

- 6  $M_{0,M}$  – The motor component can deliver this torque thermally on a sustained basis at standstill and near standstill. It may exceed the mechanical limits of the gearbox component if necessary <sup>1)</sup>.
- 7  $M_{max,M}$  – The motor component can deliver this torque for a short time. It may exceed the mechanical limits of the gearbox component if necessary <sup>1)</sup>.

#### Important geared motor system data in this catalog:

- 8 Rated operating point:  
 $M_{2N}$  – Rated torque and  
 $n_{2N}$  – rated speed.  
This rated point can be permanently driven thermally and mechanically. If the S1 characteristic  $M_{S1,M}$  at  $n_{2N}$  is greater than  $M_{2N,G}$ ,  $M_{2N}$  is reduced accordingly. At the rated point, the geared motor has approximately its maximum power.
- 9  $M_{2,0}$  – The geared motor can deliver this torque thermally on a sustained basis at standstill and near standstill. It is reduced to  $M_{2N,G}$  if necessary.
- 10  $M_{2max}$  – The geared motor can deliver this torque for a short time. It may be within the time strength range of the gearbox.

<sup>1)</sup> In this case, it must be ensured that the torque effective at the gearbox output does not exceed the permissible limits (consideration of the load-to-motor inertia ratio during acceleration processes).  
More information is provided in the Configuration Manual.

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

## Notes on the selection

### Selection and ordering data

#### Glossary

Formula symbols	Unit	Designation	Explanation
$i$		Transmission ratio	Input-to-output speed transmission ratio
$C_{T2}$	Nm/°	Torsional stiffness of the gearbox	Torsional stiffness of the gearbox related to the output
$J_1$	kg cm <sup>2</sup>	Mass moment of inertia of the geared motor	Total mass moment of inertia of the geared motor related to the input or the motor shaft
$J_{1,G}$	kg cm <sup>2</sup>	Mass moment of inertia of the gearbox component	Mass moment of inertia of the gearbox component of a geared motor related to the input of the gearbox
$J_M$	kg cm <sup>2</sup>	Mass moment of inertia of the motor component without brake	Mass moment of inertia of the motor component of a geared motor
$J_{M,Br}$	kg cm <sup>2</sup>	Mass moment of inertia of the motor component with brake	Mass moment of inertia of the motor component of a geared motor including motor holding brake
$m$	kg	Mass of the geared motor	Total mass of the geared motor
$m_G$	kg	Mass of the gearbox component	Mass of the gearbox component of a geared motor
$m_M$	kg	Mass of the motor component	Mass of the motor component of a geared motor
$m_{M,Br}$	kg	Mass of the motor component with brake	Mass of the motor component with motor holding brake
$M_{0,M}$	Nm	Static torque of the motor component on the geared motor	Torque of the motor component at standstill and near standstill that can be generated permanently electrically or on average. If this is above $M_{2max,G}$ , it must be ensured that a maximum of $M_{2max,G}/i$ is applied to the gearbox input (observe the gearbox inertia to load inertia ratio). If necessary, limit the acceleration, torque or current accordingly on the application side.
$M_{2,0}$	Nm	Geared motor static torque	The geared motor can deliver this torque thermally on a sustained basis at standstill and near standstill. It is within the fatigue strength range of the gearbox.
$M_{2N}$	Nm	Rated torque of the geared motor	The geared motor can deliver this torque thermally on a sustained basis at its rated speed. It is within the fatigue strength range of the gearbox.
$M_{2N,G}$	Nm	Rated torque of the gearbox component	Rated torque of the gearbox component at the output. This represents the fatigue strength limit of the gear teeth (independently of the motor). If exceeded, the gearbox is partially damaged and a service life calculation is required.
$M_{max}$	Nm	Maximum torque of the motor	Maximum torque of the motor that can be generated for a short time.
$M_{2max}$	Nm	Maximum torque of the geared motor	Maximum possible short-term and permissible torque at the output of the geared motor.
$M_{max,M}$	Nm	Maximum torque of the motor component	Electrically generated maximum torque of the motor component. If this is above $M_{2max,G}$ , it must be ensured that a maximum of $M_{2max,G}/i$ is applied to the gearbox input (observe the gearbox inertia to load inertia ratio). If necessary, limit the acceleration, torque or current accordingly on the application side.
$M_{2max,G}$	Nm	Maximum torque of the gearbox component	Maximum (very rare) permissible torque at the output of the gearbox. This is the limit of the time strength range. There is a risk of breakage if the limit is exceeded.
$M_{2Em.Off}$	Nm	Emergency Off torque	$M_{2Em.Off}$ can be tolerated a maximum of 1000 times during the gearbox service life without causing unacceptable damage to the gearbox. This code can be used to check whether high torques, caused by very rare operating faults, can damage the gearbox.
$n_{1av,G}$	r/min	Largest average input speed of the gearbox component	In each time window of 15 minutes, the average input speed must be below $n_{1av,G}$ .
$n_{1max,G}$	r/min	Maximum input speed of the gearbox component	Maximum permissible short-term input speed of the gearbox component on a geared motor
$n_{max,M}$	r/min	Maximum speed of the motor component	Maximum achievable and maximum permissible speed of the motor component on a geared motor
$n_{2B,G}$	r/min	Reference speed of the gearbox	Reference speed relative to the rated torque $M_{2N,G}$ of the gearbox component. This is required to perform a service life calculation of the gearbox output bearings.
$n_{2max}$	r/min	Maximum speed of the geared motor	Maximum achievable and maximum permissible speed at the gearbox output of a geared motor
$n_{2N}$	r/min	Rated speed of the geared motor	The rated torque of the geared motor is specified at this speed
$F_R$	N	Radial force	Radial force perpendicular to the shaft axis
$F_{R eq}$	N	Average radial force	Radial force averaged over the cycle, perpendicular to the shaft axis. For ball bearings, use the cubic mean. For roller bearings, use the exponent 3.33 instead of the exponent 3.
$F_{R max}$	N	Maximum radial force	Maximum statically permissible radial force
$F_A$	N	Axial force	Axial force
$F_{A eq}$	N	Average axial force	Axial force averaged over the cycle. For ball bearings, use the cubic mean. For roller bearings, use the exponent 3.33 instead of the exponent 3.
$F_{A max}$	N	Maximum axial force	Maximum statically permissible axial force
$M_b$	Nm	Maximum permissible bending moment	Maximum permissible bending moment at the motor flange to gearbox adapter separation point
$\varphi_2$	'	Torsional backlash of the gearbox	Torsional backlash of the gearbox related to the output

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Coaxial geared motors for servo converters with line connection 230 V 1 AC / 240 V 3 AC

## Selection and ordering data

### Selection of servomotors with planetary gearbox

- Select gearbox type and gearbox size, e.g. on the basis of the required torque or the required shaft loads - Table *Permissible output shaft loads*.
- Select a suitable servomotor-gearbox combination from the *Selection data servomotors with planetary gearbox*, the *Servomotor data* and the *Planetary gearbox data*, e.g. on the basis of the rated speed of the servomotor with planetary gearbox, the associated transmission ratio and the rated torque. The fatigue strength of the motor and gearbox combination must be taken into account – see color background of the *Selection data servomotors with planetary gearbox* with associated color legend.

### Structure of the tables for selection and ordering data

All combinations of servomotors with planetary gearbox including the transmission ratios available in each case can be found in the selection tables for SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors.

The selection tables are sorted according to the following criteria:

- Line supply voltage of the converter
- Gearbox type and size

The following views contain legends with explanations of the formula symbols and units specified in the selection and order tables.

### Legend for "Servomotor data":

Servomotor data	Selection data servomotors with planetary gearbox	Servomotors with planetary gearbox
$M_{0,M}$ $M_{max,M}$ $J_M$ ( $J_{M,Br}$ ) Nm Nm kg cm <sup>2</sup>		
	Rotor moment of inertia of the motor component (with holding brake) <sup>1)</sup>	1F.2102-0AG...-0.A0-Z
	Maximum possible short-term torque of the motor component <sup>2)</sup>	■ + ■ + ...
	Maximum thermally permissible effective torque of the motor component at standstill or near standstill <sup>2)</sup>	

### Legend for "Selection data servomotors with planetary gearbox":

Servomotor data	Selection data servomotors with planetary gearbox	Servomotors with planetary gearbox
$M_{0,M}$ $M_{max,M}$ $J_M$ ( $J_{M,Br}$ ) Nm Nm kg cm <sup>2</sup>		
...	$n_{2N}$ r/min Rated speed of the servo planetary geared motor	1F.2102-0AG...-0.A0-Z
	$M_{2N}$ Nm Rated torque of the servo planetary geared motor	■ + ■ + ...
	$M_{2,0}$ Nm Static torque of the servo planetary geared motor	
	$M_{2max}$ Nm Max. permissible short-term output torque of the servo planetary geared motor	

### Legend for "Planetary gearbox data":

Servomotor data	Selection data servomotors with planetary gearbox	Servomotors with planetary gearbox
$M_{0,M}$ $M_{max,M}$ $J_M$ ( $J_{M,Br}$ ) Nm Nm kg cm <sup>2</sup>		
<b>Planetary gearbox data</b>		1F.2102-0AG...-0.A0-Z
Gearbox type, gearbox stages:	Gearbox type and number of gearbox stages	■ + ■ + ...
1. Order code	1. Order code for gearbox type, gearbox size and number of gearbox stages	
$i$	Transmission ratio	
2. Order code	2. Order code for transmission ratio	
$M_{2N,G}$ Nm	Rated torque of the gearbox component (fatigue strength)	
$M_{2max,G}$ Nm	Maximum permissible short-term output torque of the gearbox (fatigue strength, max. 30000 revolutions of the output shaft)	
$M_{2Em.Off}$ Nm	Emergency Off output torque of the gearbox (max. 1000 times)	
$J_{1,G}$ kg cm <sup>2</sup>	Moment of inertia of the gearbox related to the input <sup>1)</sup>	
$\varphi_{2,G}$	Torsional backlash of the gearbox related to the output	

### Color legend for the fatigue strength of the motor and gearbox combination:

Color legend:	$M_{max,M} \times i < M_{2N,G}$	<b>The motor and gearbox combination is fatigue-proof</b>
	$M_{2N,G} < M_{max,M} \times i < M_{2max,G}$	<b>Check acceleration and inertias, perform service life calculation if necessary</b>
	$M_{max,M} \times i > M_{2max,G}$	<b>The motor can destroy the gearbox, check acceleration and inertias, perform service life calculation if necessary</b>

<sup>1)</sup> The total mass inertia is the sum of the motor and gearbox mass inertia. On some motors, the inertia of the gearbox clamping system is attributed to the motor.

<sup>2)</sup> Exact values can be found in the data sheet of the motor-gearbox combination, available via the Siemens Product Configurator.

## SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Coaxial geared motors for servo converters with line connection 230 V 1 AC / 240 V 3 AC

### Selection and ordering data

SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors with coaxial gearbox

The following servo planetary geared motors with coaxial gearbox are suitable for servo converters with line connection 200 V to 240 V 1 AC as well as 200 V to 240 V 3 AC, especially for SINAMICS S210 servo converters.

The rated points of the geared motors are adapted to this voltage.

Example: SINAMICS S210 servo converter with SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Coaxial geared motors for servo converters with line connection 230 V 1 AC / 240 V 3 AC

Gearbox type NRB080

## Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	750 N
Average axial force for 20000 h	$F_{A,eq}$	1000 N
Average radial force for 30000 h	$F_{R,eq}$	650 N
Average axial force for 30000 h	$F_{A,eq}$	900 N
Maximum radial force	$F_{R,max}$	1250 N
Maximum axial force	$F_{A,max}$	1600 N

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Coaxial geared motors for servo converters with line connection 230 V 1 AC / 240 V 3 AC

Gearbox type NRK090

## Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	1900 N
Average axial force for 20000 h	$F_{A,eq}$	2000 N
Average radial force for 30000 h	$F_{R,eq}$	1700 N
Average axial force for 30000 h	$F_{A,eq}$	1500 N
Maximum radial force	$F_{R,max}$	3100 N
Maximum axial force	$F_{A,max}$	3800 N

Color legend:

$M_{max,M} \times i < M_{2N,G}$

The motor and gearbox combination is fatigue-proof

$M_{2N,G} < M_{max,M} \times i < M_{2max,G}$

Check acceleration and inertias, perform service life calculation if necessary

$M_{max,M} \times i > M_{2max,G}$

The motor can destroy the gearbox, check acceleration and inertias, perform service life calculation if necessary

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Coaxial geared motors for servo converters with line connection 230 V 1 AC / 240 V 3 AC

Gearbox type NRK120

## Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	2500 N
Average axial force for 20000 h	$F_{A,eq}$	4000 N
Average radial force for 30000 h	$F_{R,eq}$	2150 N
Average axial force for 30000 h	$F_{A,eq}$	3000 N
Maximum radial force	$F_{R,max}$	4000 N
Maximum axial force	$F_{A,max}$	5900 N

Color legend:	$M_{max,M} \times i < M_{2N,G}$	The motor and gearbox combination is fatigue-proof
	$M_{2N,G} < M_{max,M} \times i < M_{2max,G}$	Check acceleration and inertias, perform service life calculation if necessary
	$M_{max,M} \times i > M_{2max,G}$	The motor can destroy the gearbox, check acceleration and inertias, perform service life calculation if necessary

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Coaxial geared motors for servo converters with line connection 230 V 1 AC / 240 V 3 AC

## Gearbox type NRK155

### Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	5200 N
Average axial force for 20000 h	$F_{A,eq}$	7000 N
Average radial force for 30000 h	$F_{R,eq}$	4600 N
Average axial force for 30000 h	$F_{A,eq}$	6000 N
Maximum radial force	$F_{R,max}$	8400 N
Maximum axial force	$F_{A,max}$	11000 N

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Coaxial geared motors for servo converters with line connection 230 V 1 AC / 240 V 3 AC

Gearbox type NLC080

## Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	5500 N
Average axial force for 20000 h	$F_{A,eq}$	6400 N
Average radial force for 30000 h	$F_{R,eq}$	4800 N
Average axial force for 30000 h	$F_{A,eq}$	5700 N
Maximum radial force	$F_{R,max}$	5500 N
Maximum axial force	$F_{A,max}$	6400 N

## SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Coaxial geared motors for servo converters with line connection 400 V 3 AC

### Selection and ordering data

The following servo planetary geared motors with coaxial gearbox are suitable for servo converters with line connection 380 V to 480 V 3 AC, especially for SINAMICS S120 and SINAMICS S210 servo converters.

The rated points of the geared motors are adapted to this voltage.

3  
4

SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Example: SINAMICS S210 servo converter with SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Coaxial geared motors for servo converters with line connection 400 V 3 AC

## Gearbox type NRB080

### Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	750 N
Average axial force for 20000 h	$F_{A,eq}$	1000 N
Average radial force for 30000 h	$F_{R,eq}$	650 N
Average axial force for 30000 h	$F_{A,eq}$	900 N
Maximum radial force	$F_{R,max}$	1250 N
Maximum axial force	$F_{A,max}$	1600 N

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Coaxial geared motors for servo converters with line connection 400 V 3 AC

Gearbox type NRB120

## Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	1750 N
Average axial force for 20000 h	$F_{A,eq}$	2500 N
Average radial force for 30000 h	$F_{R,eq}$	1500 N
Average axial force for 30000 h	$F_{A,eq}$	2100 N
Maximum radial force	$F_{R,max}$	2000 N
Maximum axial force	$F_{A,max}$	3800 N

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Coaxial geared motors for servo converters with line connection 400 V 3 AC

Gearbox type NRK120

## Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	2500 N
Average axial force for 20000 h	$F_{A,eq}$	4000 N
Average radial force for 30000 h	$F_{R,eq}$	2150 N
Average axial force for 30000 h	$F_{A,eq}$	3000 N
Maximum radial force	$F_{R,max}$	4000 N
Maximum axial force	$F_{A,max}$	5900 N

Color legend:

- $M_{max,M} \times i < M_{2N,G}$  The motor and gearbox combination is fatigue-proof
- $M_{2N,G} < M_{max,M} \times i < M_{2max,G}$  Check acceleration and inertias, perform service life calculation if necessary
- $M_{max,M} \times i > M_{2max,G}$  The motor can destroy the gearbox, check acceleration and inertias, perform service life calculation if necessary

## SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Angular geared motors for servo converters with line connection 230 V 1 AC / 240 V 3 AC

### Selection and ordering data

SIMOTICS S-1FT2 servo planetary geared motors with angular gearbox

The following servo planetary geared motors with angular gearbox are suitable for servo converters with line connection 200 V to 240 V 1 AC as well as 200 V to 240 V 3 AC, especially for SINAMICS S210 servo converters. The angled versions are suitable for confined spaces.

The rated points of the geared motors are adapted to this voltage.

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Angular geared motors for servo converters with line connection 230 V 1 AC / 240 V 3 AC

Gearbox type NRKW070

## Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	1050 N
Average axial force for 20000 h	$F_{A,eq}$	1350 N
Average radial force for 30000 h	$F_{R,eq}$	900 N
Average axial force for 30000 h	$F_{A,eq}$	1000 N
Maximum radial force	$F_{R,max}$	1650 N
Maximum axial force	$F_{A,max}$	2100 N

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Angular geared motors for servo converters with line connection 230 V 1 AC / 240 V 3 AC

Gearbox type NLCW060

## Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	3200 N
Average axial force for 20000 h	$F_{A,eq}$	4400 N
Average radial force for 30000 h	$F_{R,eq}$	3200 N
Average axial force for 30000 h	$F_{A,eq}$	3900 N
Maximum radial force	$F_{R,max}$	3200 N
Maximum axial force	$F_{A,max}$	4400 N

Color legend:	$M_{max,M} \times i < M_{2N,G}$	The motor and gearbox combination is fatigue-proof
	$M_{2N,G} < M_{max,M} \times i < M_{2max,G}$	Check acceleration and inertias, perform service life calculation if necessary
	$M_{max,M} \times i > M_{2max,G}$	The motor can destroy the gearbox, check acceleration and inertias, perform service life calculation if necessary

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Angular geared motors for servo converters with line connection 230 V 1 AC / 240 V 3 AC

## Gearbox type NLCW080

### Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	5500 N
Average axial force for 20000 h	$F_{A,eq}$	6400 N
Average radial force for 30000 h	$F_{R,eq}$	4800 N
Average axial force for 30000 h	$F_{A,eq}$	5700 N
Maximum radial force	$F_{R,max}$	5500 N
Maximum axial force	$F_{A,max}$	6400 N

## SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Angular geared motors for servo converters with line connection 400 V 3 AC

### Selection and ordering data

SIMOTICS S-1FT2 servo planetary geared motors with angular gearbox

The following servo planetary geared motors with angular gearbox are suitable for servo converters with line connection 380 V to 480 V 3 AC, especially for SINAMICS S120 and SINAMICS S210 servo converters.

The rated points of the geared motors are adapted to this voltage.

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Angular geared motors for servo converters with line connection 400 V 3 AC

## Gearbox type NRBW060

### Selection and ordering data

Permissible output shaft loads

Color legend:    $M_{max,M} \times i < M_{2N,G}$  The motor and gearbox combination is fatigue-proof

   $M_{2N,G} < M_{max,M} \times i < M_{2max,G}$  Check acceleration and inertias, perform service life calculation if necessary

   $M_{max,M} \times i > M_{2max,G}$  The motor can destroy the gearbox, check acceleration and inertias, perform service life calculation if necessary

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Angular geared motors for servo converters with line connection 400 V 3 AC

Gearbox type NLCW080

## Selection and ordering data

Permissible output shaft loads		
Average radial force for 20000 h	$F_{R,eq}$	5500 N
Average axial force for 20000 h	$F_{A,eq}$	6400 N
Average radial force for 30000 h	$F_{R,eq}$	4800 N
Average axial force for 30000 h	$F_{A,eq}$	5700 N
Maximum radial force	$F_{R,max}$	5500 N
Maximum axial force	$F_{A,max}$	6400 N

Color legend:	$M_{max,M} \times i < M_{2N,G}$	The motor and gearbox combination is fatigue-proof
	$M_{2N,G} < M_{max,M} \times i < M_{2max,G}$	Check acceleration and inertias, perform service life calculation if necessary
	$M_{max,M} \times i > M_{2max,G}$	The motor can destroy the gearbox, check acceleration and inertias, perform service life calculation if necessary

# SIMOTICS S-1FK2 and S-1FT2 servo planetary geared motors

Angular geared motors for servo converters with line connection 400 V 3 AC

## MOTION-CONNECT connection systems

### MOTION-CONNECT connection systems

#### Overview

MOTION-CONNECT cables are suitable for use with many different types of machine tools and production machinery.

The following variants of MOTION-CONNECT cable are available as fully-assembled power and signal cables or sold by the meter:

- **MOTION-CONNECT 500**
  - Cost-effective solution for predominantly fixed installation
  - Suitable for low mechanical loading
  - Tested for traversing paths up to 5 m (16.4 ft)
- **MOTION-CONNECT 800PLUS**
  - Meets requirements for use in cable carriers
  - Suitable for high mechanical loading
  - Oil resistance
  - Tested for traversing paths of up to 50 m (164 ft)
- **MOTION-CONNECT 400 (only for SIMOTICS S-1FS2 motors)**
  - Extremely chemically resistant FEP jacket (especially against common cleaning agents and disinfectants used in the F&B industry)
  - With integrated pressure compensation tube
  - Not suitable for repeated bending stress!

#### Benefits

Pre-assembled MOTION-CONNECT cables provide high quality and impeccable system-tested functionality.

#### SPEED-CONNECT

Connectors with SPEED-CONNECT quick-release locks enable fast, stable and reliable connection. All that is required to attain stable interlocking and a secure connection is less than a quarter turn of the lock nut of the connector. Tools are not required.

Cables with SPEED-CONNECT connectors supplement the previous offering of MOTION-CONNECT cables with full-thread connectors.

#### Application

MOTION-CONNECT cables are designed for machinery use. They are not suitable for building technology applications or outdoor installation.

MOTION-CONNECT cables have been tested in a cable carrier with horizontal traversing path and have also been designed for this type of application. They are not self-supporting.

The pre-assembled cables can be ordered in length units of 10 cm (3.94 in) and can be extended, if necessary.

When cable lengths (basic cables and extensions) are determined for the systems and applications described in this catalog, the technically permissible maximum cable lengths (e.g. 25 m (82 ft)) specified in the catalog must be observed. Malfunctions can occur if longer cables are used. Siemens assumes no liability for correct transmission of signals or power in this case.

Connector on motor with external thread	Connector with cap nut on cable	Compatibility
SPEED-CONNECT	SPEED-CONNECT	✓
SPEED-CONNECT <sup>1)</sup>	Full-thread	✓
Full-thread	Full-thread	✓
Full-thread	SPEED-CONNECT	–

<sup>1)</sup> If shocks and vibration can occur, an additional O-ring is recommended to prevent the connection from coming loose.

#### Function

The cables must be removed from the drum without twisting, i.e., the cables must be unwound and must never be lifted over the drum flange in loops.

To maximize the service life of the cable carrier and cables, cables in the carrier made from different materials must be separated by spacers in the cable carrier. The spacers must be filled evenly to ensure that the position of the cables does not change during operation. The cables should be distributed as symmetrically as possible according to their weights and dimensions. Cables with very different outer diameters should also be separated by spacers.

When inserting pre-assembled cables into the cable carrier, do not pull at the connector, as this may damage the strain relief or cable clamping.

The cables must not be fixed in the cable carrier. They must be freely movable.

The cables must be able to be moved without applying force in particular in the bending radii of the carrier. The specified minimum bending radius must be adhered to.

## Function

The cable fixings must be attached at both ends at an appropriate distance away from the end points of the moving parts in a dead zone.

MOTION-CONNECT cables are tested in a cable carrier. The cables are attached at one end by means of strain relief to the moving ends of the cable carrier. Strain relief is applied over a wide area of the cable jacket surface without crimping the cable.

Cables must be installed in accordance with the instructions supplied by the cable carrier manufacturer.

### Note:

If, for example, pre-assembled cables are installed in a cable carrier in such a way that the connector would inhibit assembly, pre-assembled cables without assembled connector can also be supplied (power and signal cables<sup>1)</sup>). Depending on the version, the contacts of the cables are crimped and the connector is supplied separately. After installing the cables, the customer assembles the connector.

In case of vibration load and with horizontal or vertical cable entries, we recommend that the cable is additionally fixed if between the cable strain relief on the cable carrier and the terminal at the motor part of the cable is hanging loose or is not routed. To prevent machine vibrations being transmitted to the connectors, the cable should be fixed at the moving part where the motor is mounted.

## Characteristic curves

### Characteristic curve for MOTION-CONNECT 800PLUS

The blue area beneath the characteristic curve represents the potential range of use for the cables. The characteristic curve represents the tested operating points.

Permissible acceleration for MOTION-CONNECT 800PLUS signal and power cables up to 16 mm<sup>2</sup>

<sup>1)</sup> Not for DRIVE-CLiQ signal cables.

## MOTION-CONNECT connection systems

### MOTION-CONNECT connection systems

#### More information

##### Current carrying capacity for power and signal cables

The current carrying capacity of PVC/PUR-insulated copper cables is specified in the table for installation types B1, B2, C, and E under continuous operating conditions with reference to

an ambient air temperature of 40 °C (104 °F). For other ambient temperatures, the values must be corrected by the derating factors from the table.

Cross-section mm <sup>2</sup>	Current carrying capacity rms AC 50/60 Hz or DC in amps for installation type			
	B1 Single-core cables in conduits or installation ducts	B2 Multi-core cables in conduits or installation ducts	C Multi-core cables, vertically or horizontally on walls/open, without conduits and installation ducts/ with contact	E Multi-core cables, horizontally or vertically on perforated cable racks/open, without conduits and installation ducts/ with contact
<b>Electronics <sup>1)</sup></b>				
0.2	–	4.3	4.4	4.4
0.5	–	7.5	7.5	7.8
0.75	–	9	9.5	10
<b>Power <sup>2)</sup></b>				
0.38	6.2	6.1	7.1	7.4
0.75	8.6	8.5	9.8	10.4
1	10.3	10.1	11.7	12.4
1.5	13.5	13.1	15.2	16.1
2.5	18.3	17.4	21	22
4	24	23	28	30
6	31	30	36	37
10	44	40	50	52
16	59	54	66	70

##### Derating factors for PVC/PUR-insulated power and signal cables

Ambient air temperature °C (°F)	Derating factor acc. to EN 60204-1, Table D.1
30 (86)	1.15
35 (95)	1.08
40 (104)	1
45 (113)	0.91
50 (122)	0.82
55 (131)	0.71
60 (140)	0.58

##### Note:

Derating for MOTION-CONNECT 400 analog acc. to EN 60204-1.

<sup>1)</sup> One control circuit pair.

<sup>2)</sup> One symmetrically loaded three-phase AC cable.

## Overview

Motor and converter are simply connected to one another by one cable instead of the usual two or three cables. With this One Cable Technology, energy supply, encoder signals and braking signal are brought together in a single cable.

This results in the following advantages:

- Time-saving by laying only one cable
- Smaller installation space and space requirement in cable collars
- Only one cable has to be cleaned. This is advantageous, e.g. in the pharmaceutical industry and where higher requirements are placed upon hygiene
- Can be ordered to the decimeter
- Compact connection system
- Rotatable connectors on the motor side
- Motor with very low interfering contour for restricted installation space
- Bending radius optimized to  $2.5 \times$  cable diameter static or  $4 \times$  cable diameter dynamic for MOTION-CONNECT 800PLUS

### SINAMICS Selector App Mobile selection guide for frequency converters

Siemens has developed the SINAMICS Selector app as a practical tool for finding article numbers for your SINAMICS converter in the power range from 0.1 kW to 630 kW quickly and easily. Whether for SINAMICS V20, SINAMICS V90, SINAMICS G120C, SINAMICS G120P, SINAMICS G120X, SINAMICS G120, SINAMICS G220, SINAMICS S200 or SINAMICS S210:

The app will provide you with the correct article numbers conveniently.

How does it work? Simply select your application, the frequency converter you require, the rated power and device options as well as the necessary accessories.

Then you can save your selection and send it by email. The preselection serves as the basis for an order specification with the dealer/Siemens.

You will find free downloads for Android and iOS here:

[www.siemens.com/sinamics-selector](http://www.siemens.com/sinamics-selector)

#### **Cybersecurity information**

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept.

Siemens' products and solutions constitute one element of such a concept.

Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place.

For additional information on industrial cybersecurity measures that may be implemented, please visit

[www.siemens.com/cybersecurity-industry](http://www.siemens.com/cybersecurity-industry)

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly

recommends that product updates are applied as soon as they are available and that the latest product versions are used.

Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>

## Engineering tools

### DriveSim Designer

#### Overview

DriveSim Designer provides easy-to-use models for PROFIdrive-enabled SINAMICS converters, so you can create a digital twin of your drive.

The models are validated and tested against real SINAMICS converters and are available in the form of a standardized FMU (Functional Mockup Unit). Therefore, they are compatible with various standard time-based simulation programs such as SIMIT, Simcenter Amesim, ANSYS Twin Builder, MATLAB Simulink or Hopsan.

DriveSim Designer is another element in your engineering toolbox. Together with other virtual Siemens solutions, e.g. SIMATIC S7-PLCSIM Advanced or NX Mechatronics Concept Designer, a consistent model-based development process can be implemented.

#### Benefits

- Speed up time-to-market for OEMs
- Test validated SINAMICS models under real conditions already at the design or planning stage and make needed adjustments
- Identify issues and improvement capabilities early in the design stage and reduce testing effort to save time and cost
- Download the free-of-charge basic version with reduced functionality set, DriveSim Basic, to try the suitability of our solution before buying it
- The full version DriveSim Designer offers a wide range of additional functionalities to improve the SINAMICS simulation model, e. g. safety or position telegrams
- Valid for the most used Siemens drives

Advantages of DriveSim Designer compared to SIMIT PROFIdrive blocks:

- Increased level of detail due to speed controller, current setpoint filters and internal load model
- Identical parameter values and meaning as in the real SINAMICS device
- Direct reference to SINAMICS documentation
- Basic Safety functions
- Brake control functions for lifting applications
- Validated against the real SINAMICS drive
- No wiring effort to represent functional configurations
- Significant reduction of SIMIT simulation tags (even more is possible if unused in-/ outputs are deselected within the Component Type Editor (CTE))
- Enables simulation of an (internal) two-mass oscillator as application with realistic SINAMICS parameter settings, besides the known limitations by the minimum sample time in SIMIT
- Compatible with every FMU Co-Simulation 2.0 compatible simulation tool

#### Application

With DriveSim Designer, you can implement three major use cases:

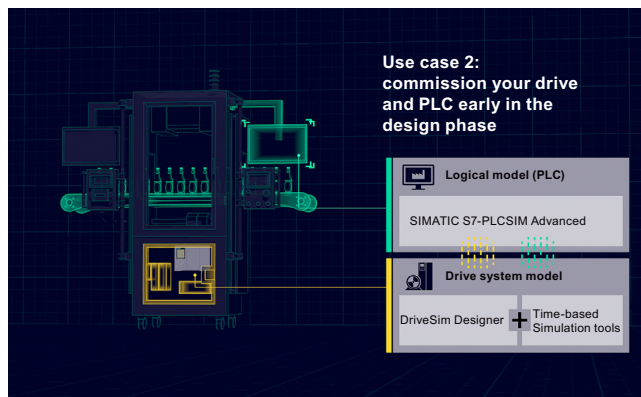

- Providing load characteristics for drive selection and dimensioning
- Virtual commission your PLC already in the design phase
- Test and improve interaction between PLC, drives and application virtually

Use case 1: Dimension and size the correct drive and motor for your application

If you are designing a machine, you want to make sure that you select the SINAMICS converter and SIMOTICS motor most suitable for your drive application. As DriveSim Designer is control-unit-agnostic and thus represents a generic drive, you can parametrize it according to the functionality of your application. Running the simulation results in load characteristics, i.e. torque or speed curves over time. You can import these load profiles into TIA Selection Tool to select the suitable Control Unit and dimension the drive to best fit to the demand. So as a result you have well selected SINAMICS converters and SIMOTICS motors with the help of the digital twin.

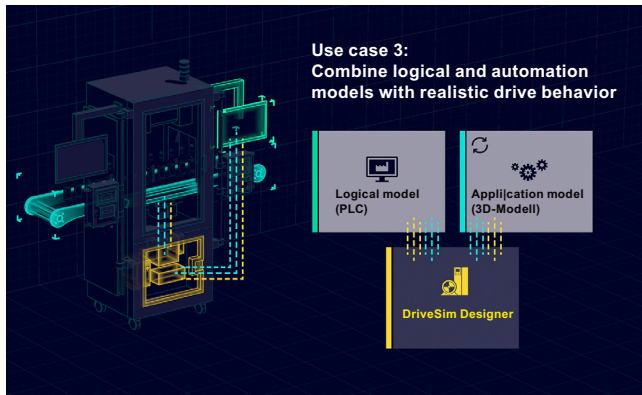

Use case 2: Virtual commission your drive and PLC early in the design phase

If you are designing a machine, you want to make sure the PLC code works with your SINAMICS drive. After writing the PLC code in TIA Portal, you can connect it via PLCSIM Advanced to any time-based simulation tool (e.g. SIMIT). Integrated into the simulation tool, DriveSim Designer acts as a realistic communication partner for the PLC. Next, you can commission the virtual PLC in TIA Portal as you would do with a real PLC connected to a real drive. Without simulation, you would need to do that on-site. With simulation, you not only save time, but also have the freedom to try out various configurations and optimize your PLC code early in the process.

## Application

Use case 3: Combine the application model and automation model with realistic drive system behavior

With the third Use case, you can connect a simulation tool such as NX Mechatronic Concept Designer to visualize the mechanical movements of your application. This way, you ensure that the drive behaves according to the desired machine performance. You can test several fault scenarios and optimize the interaction between PLC, application and drive virtually so overall, you can avoid unplanned machine behavior and increase the performance of your setup.

## Integration

DriveSim Designer can be run in tools that support FMU 2.0 Co-Simulation Import (<https://fmi-standard.org/tools/>).

The FMU has been tested in the following simulation environments and is available in the attached application examples.

Tool	Manufacturer	DriveSim*** variant	PLC Sim Advanced interface	Notes
SIMIT	Siemens	***.fmu	Yes	<ul style="list-style-type: none"> <li>Permissible configuration: ExternalLoad = 1 &amp; . Speed-Controller = 0 or ExternalLoad = 0 &amp; . Speed-Controller = 1</li> <li>Simulation with external load can provide wrong results because the minimum possible time step is 1 ms</li> </ul>
Simcenter Amesim	Siemens	***_double.fmu	Yes	
MATLAB Simulink	MathWorks	< 2019a ***_unstruct.fmu ≥ 2019a ***.fmu	Yes	
ANSYS Twin Builder	ANSYS	***.fmu	No	
Hopsan	Linköping University	***_double.fmu	No	<ul style="list-style-type: none"> <li>Open Source</li> <li>Install "win64-with_compiler-installer.exe" package</li> </ul>

## Engineering tools

### DriveSim Engineer

#### Overview

In summary, DriveSim Engineer is a powerful tool that provides a complete digital twin of the next generation of SINAMICS converters SINAMICS G220 and SINAMICS S210 (New), ensuring unparalleled accuracy and reliability. With its seamless integration into the TIA Portal and SINAMICS Startdrive, the advanced level of customization, the detailed and intuitive interface, it is the ultimate solution for optimizing your drive train system.

DriveSim Engineer is an innovative solution that combines drive simulation and virtual commissioning. With this powerful combination, you can optimize your drive systems, test and validate your projects and ensure that your drive systems function correctly prior to the installation. DriveSim Engineer is the ultimate solution for optimizing your drive systems. With its advanced technology and user-friendly interface, you can simulate and optimize the performance of your drive systems to meet the demands of your processes. DriveSim Engineer is the solution you have been searching for to improve efficiency, productivity, as well as the overall performance of your drive systems.

The complete digital twin of the real SINAMICS firmware for the next generation of SINAMICS converters SINAMICS G220 and SINAMICS S210 (New) ensures that all parameters and configurations are identical to those of the real drive, providing unparalleled accuracy and reliability.

DriveSim Engineer is a software-dependent solution that works seamlessly with the TIA Portal and SINAMICS Startdrive, eliminating the need for additional simulation tools. Its low-level interaction with the current control loop of the real drive ensures that the behavior is validated and verified, making it a reliable partner for optimizing your drive train system.

What sets DriveSim Engineer apart is its advanced level of customization and detail, allowing for more accurate testing and optimization of the drive train system. Its intuitive interface enables the fast set-up and configuration of your digital twin as well as the simulation of different operating conditions and scenarios.

Whether you are designing, commissioning or optimizing your drive train system, DriveSim Engineer is the tool you need. Its advanced features and high level of accuracy make it an essential tool for the best possible system performance.

#### Benefits

- Reduce costs and time: Eliminate the need for on-site visits, reduce costs and speed up the commissioning process.
- Testing and optimization of the drive train system without material damage.
- Improved accuracy: Perform precision simulations and tests on your systems, ensuring that they are optimized before the actual purchase.
- Increased flexibility: Make changes to your systems quickly and easily with flexibility to respond to the changes in your project requirements.
- Train the engineers and new users with the help of the virtual twin acting as a realistic partner.
- Virtual demonstration of the SINAMICS converters (prior to mounting or purchase).
- Diagnose and validate the faults or issues in the real environment and fix them with the help of the simulation without any risk of material damage and save resources (lower maintenance and downtime time, i.e. lower costs) without time pressure on the plant side.
- Identify issues and improvement capabilities early in the design stage and reduce testing effort to save time and cost.
- Valid for the next generation of SINAMICS converters SINAMICS G220 and SINAMICS S210 (New).

## Application

DriveSim Engineer can be implemented in three major use cases.

Use case	Old approach	Advantages of the new approach with DriveSim Engineer
Virtual commissioning and engineering of the next generation of SINAMICS converters SINAMICS G220 and SINAMICS S210 (New) prior to the mounting	Commissioning of the converters after mounting or purchase	<ul style="list-style-type: none"> <li>• Saving of resources (lower maintenance and shorter downtime, i.e. lower costs)</li> <li>• No time pressure in the real installation, quick and fast reconfiguration of the system</li> <li>• Improved accuracy of the drive train system in detecting and resolving potential issues</li> <li>• Virtual commissioning helps ensure that the system is future-proof by incorporating the latest technologies and design standards.</li> </ul>
Virtual training and demonstration of the next generation of SINAMICS converters SINAMICS G220 and SINAMICS S210 (New) for engineers and new users	Trainings and demonstrations on the plant side (not in advance)	<ul style="list-style-type: none"> <li>• Virtual trainings and demonstrations in advance with the digital twin acting as a realistic partner</li> <li>• Make the changes to your systems quickly and easily.</li> <li>• Show and use different application (drives) just on one computer (no need for demo cases).</li> <li>• Traveling costs for trainings and demonstrations will not rise. Everything can be done virtually and in advance (before the hardware is purchased or released).</li> </ul>
Diagnose and validate the faults or issues in the real environment and fix them with the digital twin (optimization of the real machine)	Faults and issues of the system are solved on the plant side	<ul style="list-style-type: none"> <li>• Saving of resources (lower maintenance and shorter downtime, i.e. lower costs)</li> <li>• No time pressure in the real installation, quick and fast reconfiguration of the system</li> <li>• Improved accuracy of the drive train system in detecting and resolving potential issues</li> <li>• Virtual commissioning helps ensure that the system is future-proof by incorporating the latest technologies and design standards.</li> </ul>

## Integration

DriveSim Engineer is directly integrated in TIA Portal and SINAMICS Startdrive, i.e. different software tools are not necessary. Only the installation of DriveSim Engineer and TIA Portal with SINAMICS Startdrive is required.

### Siemens Product Configurator

#### Overview

The Siemens Product Configurator helps you to configure the optimum drive technology products for a number of applications. The product portfolio comprises the full drive technology range of gearbox, motor, converter and connection system as well as corresponding controller with suitable software license. The intuitive user interface in conjunction with product-specific preliminary selectors makes it simple, fast and efficient to configure products. The result is a bill of materials with extensive documentation consisting of technical data sheets, motor characteristic curves, 2D dimensional drawings / 3D CAD models, EPLAN macros and much more. You can order the products directly by transferring the bill of materials to the shopping cart of SiePortal.

#### **Siemens Product Configurator at a glance**

- Quick and easy configuration of drive products and associated components – gearboxes, motors, converters, controllers, connection systems
- Extensive documentation for all products and components, such as
  - Data sheets in up to 12 languages
  - Motor characteristic curves
  - 2D dimensional drawings / 3D CAD models in different formats
  - Terminal box drawing and terminal connection diagram
  - Certificates
  - EPLAN macros
- Ability to order products directly through SiePortal

#### Access to the Siemens Product Configurator

The Siemens Product Configurator can be accessed without the need for registration or logging in:  
[www.siemens.com/spc](http://www.siemens.com/spc)

## Overview

Selection guide and configurator for automation technology

Error-free configuration without expert knowledge through intelligent configurators and selection wizards. Desktop and cloud versions enable cross-team collaboration with maximum flexibility.

There are two versions of the TIA Selection Tool:

- One for downloading and execution on Microsoft Windows PCs (from Microsoft Windows 10)
- One for running from the cloud, which is launched from mobile devices directly in the browser (we recommend Safari, Chrome and Firefox)

Projects stored in the cloud can be edited with both tools. This makes it possible to work on-the-go using a tablet, at home on a PC – and vice versa, or together with colleagues and customers.

In order to use the full functionality, we recommended setting up a SiePortal account for both cases. This gives you access to prices and enables you to save your projects to our cloud.

You can find additional information about the TIA Selection Tool at:

[www.siemens.com/tia-selection-tool](http://www.siemens.com/tia-selection-tool)

Drive dimensioning in the TIA Selection Tool

Application-specific requirements can be determined using drive technology dimensioning in the TIA Selection Tool. This can include motors, gearboxes and converters. The tool supports the configuration and dimensioning of control functions with an open and closed control loop. The technical documentation with features of the technical drive system, as well as a product list for ordering via SiePortal can also be compiled.

You can find more information on the SIZER for Siemens Drives engineering tool at

<https://support.industry.siemens.com/cs/ww/en/ps/13434/dl>

## Engineering tools

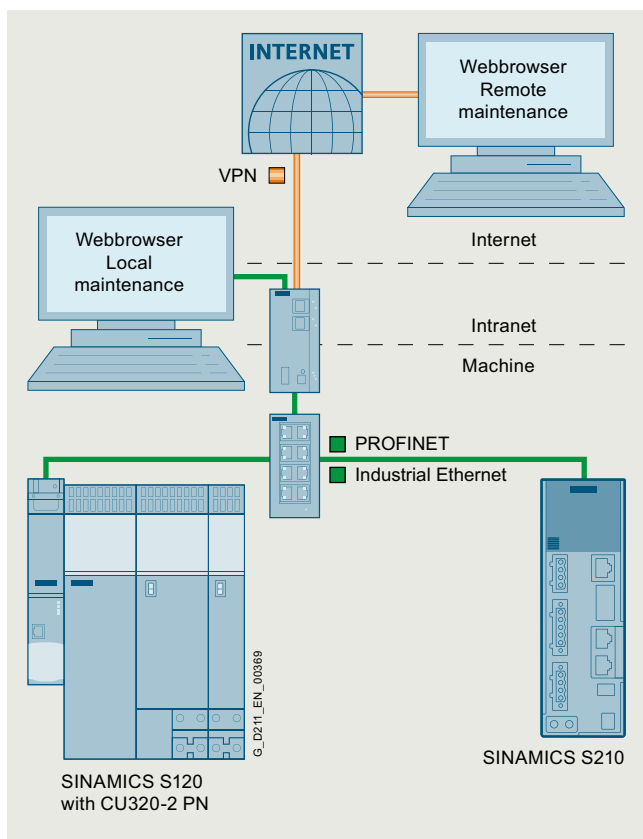

### SINAMICS web server for SINAMICS S210

#### Overview

##### **Web server for efficient commissioning, diagnostics and maintenance – available anywhere, anytime**

Thanks to the web server, the SINAMICS S210 drive system offers efficient commissioning, diagnostics and maintenance options. The web server provides access to a multi-faceted range of new options for parameter assignment, drive diagnostics and remote maintenance for any networked PC with a web browser or for tablets and smartphones (via a separate WLAN access point), including:

- Simple and fast commissioning
- Drive traversing via the control panel
- Downloading/uploading a configuration
- Providing a status overview of the drive
- Evaluating warnings and fault messages
- Monitoring and adapting parameter setting

Integration of the SINAMICS web server as shown by the example of SINAMICS S120, SINAMICS S210 and PROFINET communication

#### Benefits

##### Simple and fast commissioning

- No installation of additional commissioning software
- Simple controller optimization with One Button Tuning
- Easy parameterization of Safety Integrated Functions
- Standard pages for limit values and settings
- Comprehensive fault diagnosis
- Firmware update

##### Shorter machine downtimes

- Efficient diagnostics and maintenance

##### Direct language selection

- English, French, German, Italian, Spanish, Chinese Simplified

##### Accessibility

- Via all LAN or PROFINET interfaces
- Tablet and smartphone access via WLAN with separate access point

##### Two users with different rights profiles

- e.g. for operators and service personnel

##### Diagnostic functions

- Quick overview of the current configuration and the state of the drive
- Understandable diagnostic information and messages, including the causes of issues and possible remedies, are displayed in plain text in multiple languages

##### Freely configurable parameter lists

- Monitoring parameters for diagnostic purposes, for example for operating personnel
- Adjustment of the parameter lists using filters, parameter groups and the configuration of personal lists

##### Access security

- Protection against unauthorized access to the drive information

#### Application

The web server is ideal for applications in which special commissioning software or version dependencies are not desired. Easy commissioning, diagnostics and maintenance are possible both locally and remotely, provided appropriate security measures are applied.

## Overview

### **Web server for efficient commissioning, diagnostics, maintenance and operator control and monitoring, any time, from anywhere**

Thanks to the web server, the SINAMICS S210 drive system with the SINAMICS S210 servo converters (New) offers an efficient commissioning, diagnostics, maintenance option as well as operation and monitoring functions. The user is supported by a help function and additional links to specific product information, downloads, FAQs and manuals.

The web server provides access to a multi-faceted range of new options for commissioning or parameter assignment, drive diagnostics, remote maintenance as well as operator control and monitoring for any networked PC with a web browser or for tablets and smartphones (via a separate WLAN access point, such as SINAMICS Smart Adapter).

The following provides an insight into the functionality offered.

### The start screen offers a quick overview of the state of the drive

- Drive type, connected motor as well as the article number and installed firmware
- Important drive parameters show the operating state (can be configured)
- The connection overview provides information about the status of the connections (operating unit - converter - motor)
- Overview of all pending fault and warning messages

Start screen of the web server integrated into SINAMICS S210 (New)

## Commissioning

- The quick commissioning provides information about the current motor/encoder and offers the configuration of limit values and digital inputs
- Optimization of the drive settings using One Button Tuning (OBT)
- Easily and conveniently commission Safety Integrated functions

Nameplate data	Value	Unit
Rated current	2.4	Arms
Rated speed	3000	rpm
Rated voltage	130	Vrms
Maximum motor speed	7300	rpm
Maximum motor current	8.7	Arms

Optional motor data	Value	Unit
Rated power	0.4	kW
Rated torque	1.27	Nm
Motor stall current	2.4	Arms
Motor stall torque	1.27	Nm
Motor moment of inertia	0.000014	kgm²

Quick commissioning with open dialog showing the set motor data

Parameter name	Current value	Previous value
P gain	0.0282 Nms/rad	0.0287 Nms/rad
Integral time	2.69 ms	2.65 ms
Load moment of inertia	0.000000 kgm²	0.000000 kgm²
Kv factor estimated	34.67 1000 rpm	35.20 1000 rpm
Precontrol symmetrizing time estimated	0.23 ms	0.22 ms

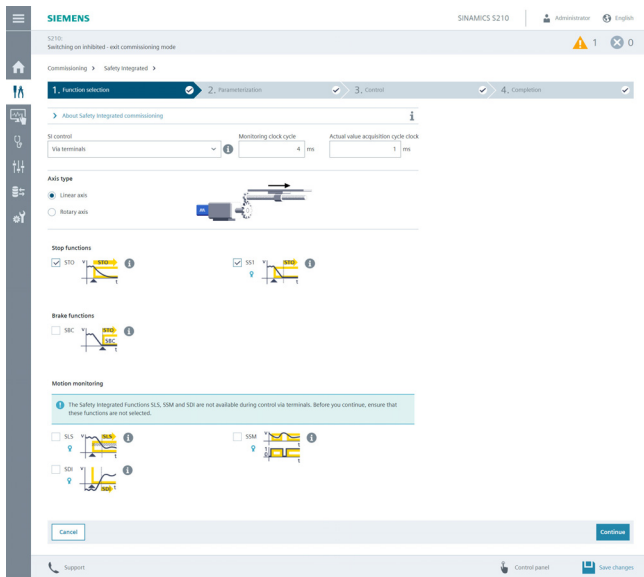

One Button Tuning (OBT)

## SINAMICS web server for SINAMICS S210 (New)

### Overview

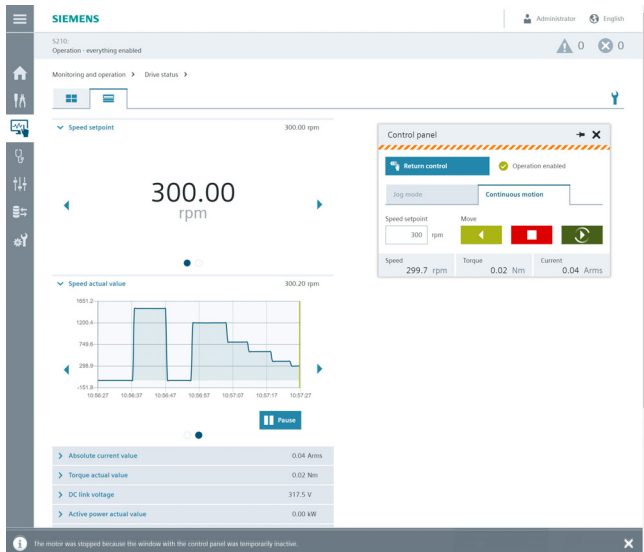

#### Commissioning (continued)

Safety Integrated assistant

#### Operator control and monitoring

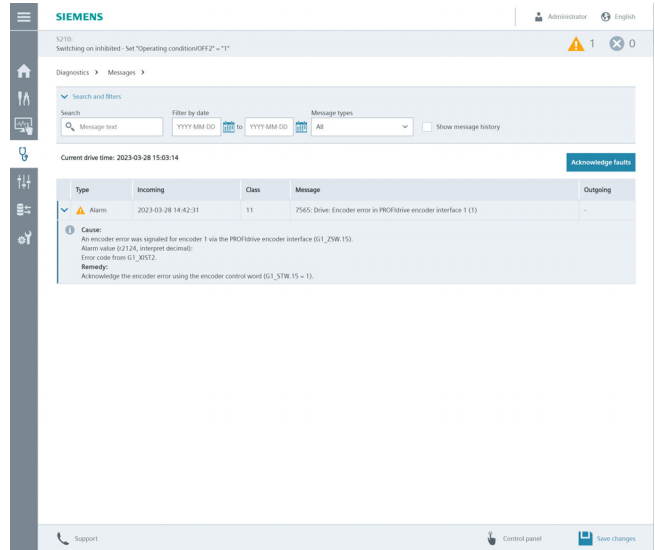

- Configurable drive status with value or trend display
- Status of the digital inputs
- Drive traversing via the control panel, which can be freely positioned on the screen

Operator control and monitoring of the drive with the help of the drive status and control panel

#### Diagnostics

- Evaluation of warnings and fault messages
- Evaluation of system events (diagnostic buffer)
- Analysis of the safety status
- Connection overview, diagnostics of the drive communication and control and status words

Alarm view with convenient search and filter functions

#### Service and maintenance functions

- Monitor and adjust drive parameters
- Create, import and export user-specific parameter lists
- Back up and restore the drive configuration
- Perform firmware update, also via the network
- Manage software licenses
- Configure basic settings for the drive and web server (e.g. date and time of the drive)
- Configure and manage user accounts and access controls (UMAC)

Parameter list for quick access to drive parameters, also via user-defined parameter lists

## SINAMICS web server for SINAMICS S210 (New)

## Overview

## Support

- Operator support with comprehensive information about the drive and user interface
- Easy access to product information such as FAQs, software downloads, manuals and certificates
- When storing the html documentation on the drive memory card, the user manual can be accessed in a context-sensitive manner from the user interface

 Serial number: ZVR1102803278

OK

Support dialog for quick access to product-specific information

## Benefits

Simple and fast commissioning

- Installation of additional commissioning software is not required.
- Tools required for the commissioning are ready to use via the integrated web server.
- Standard pages to set thresholds and onboard inputs
- Simple controller optimization with One Button Tuning (OBT)
- Guided parameterization of Safety Integrated functions
- Extensive online help with context-sensitive access to the Operating Instructions (memory card required)

Shorter machine downtimes

- Quick overview of the current configuration and the state of the drive
- Efficient diagnostics and maintenance
- Understandable diagnostic information and messages, including the causes of issues and possible remedies, are displayed in plain text in multiple languages
- Context-sensitive help with optional access to the web-based device documentation provides quick help with questions about drive functions

Convenient service and maintenance functions

- Quick backup and restoration of the drive data
- Convenient firmware update, also via the network
- Convenient access to drive parameters
- User-defined parameter lists that focus on what matters
- Easy and efficient handling of the parameter list by using search functions and filters (e.g. parameter groups, parameter types)
- Easy exchange with operating personnel by importing/exporting user-defined parameter lists.
- User-defined parameter lists can be exchanged between the SINAMICS Startdrive and the web server.

Direct language selection

- English, French, German, Italian, Spanish, Chinese Simplified

Accessibility

- Via all LAN or PROFINET interfaces
- Use of mobile devices (e.g. notebooks/tablets and smartphones) via WLAN e.g. with SINAMICS Smart Adapter or a separate access point
- Access to the web server via PCs/notebooks, SIMATIC HMI (> 10"), smartphones/tablets with a Chromium-based internet browser

Access security

- Protection against unauthorized access to the drive functions and data
- Convenient user administration that supports a roles concept
- Easy set-up and management of user accounts

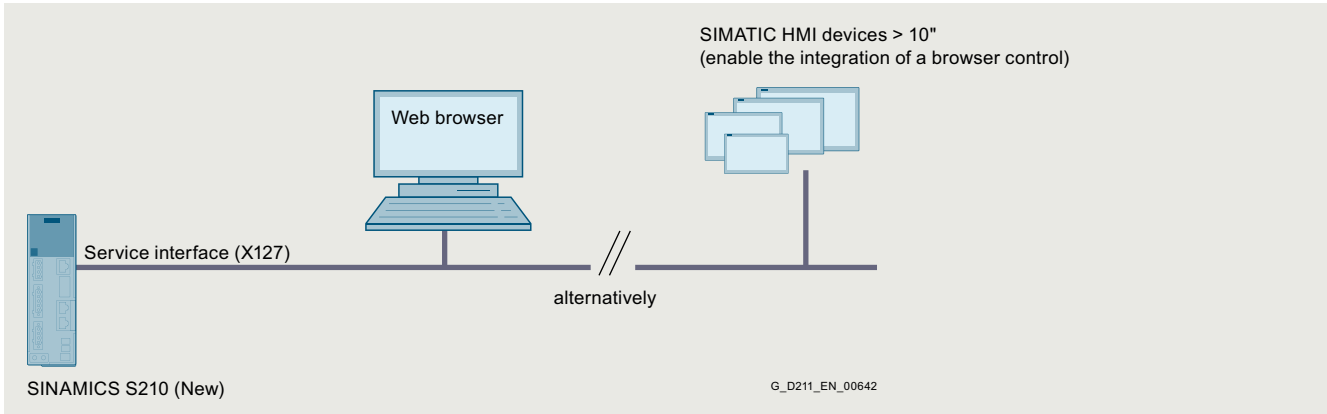

## Application

The web server is ideal for applications not requiring any special commissioning software or version dependencies. Commissioning, diagnostics and maintenance as well as operator control and monitoring are possible both locally and remotely, provided appropriate security measures are applied.

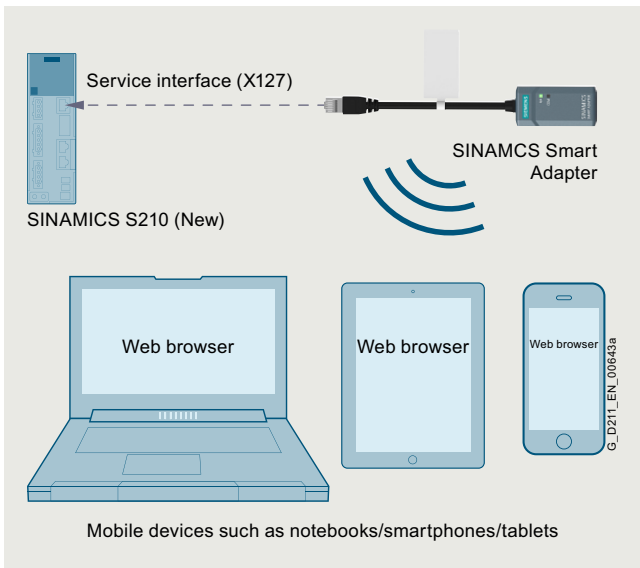

# Engineering tools

## SINAMICS web server for SINAMICS S210 (New)

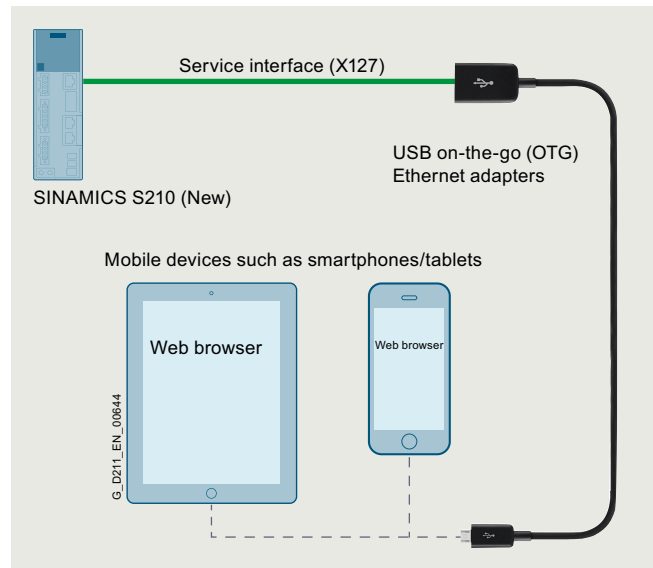

### Integration

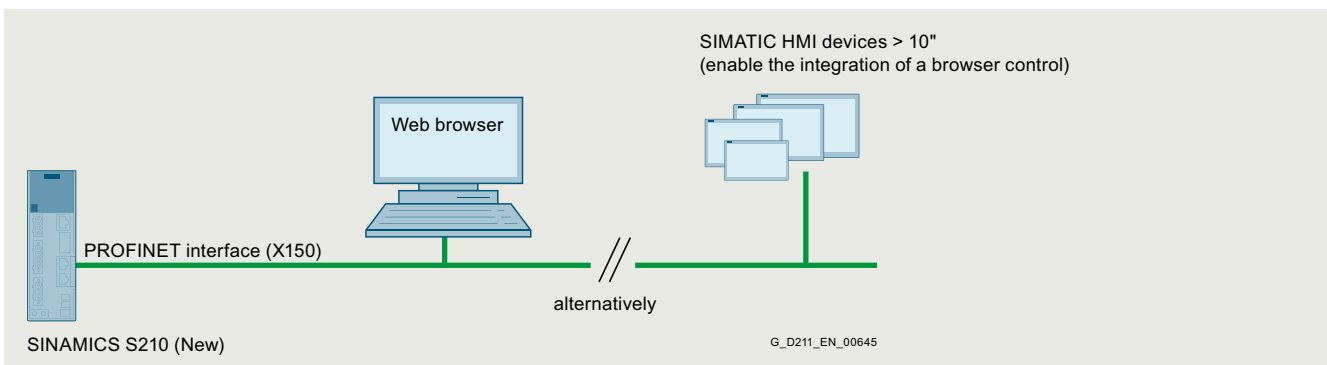

Integration of the SINAMICS web server based on the example of a SINAMICS S210 (New) and the service interface (X127)

Wireless access to the web server via the service interface (X127) of the SINAMICS S210 (New) with the help of the SINAMICS Smart Adapter

Access to the web server via the service interface (X127) of the SINAMICS S210 (New) with the help of a USB on-the-go (OTG) Ethernet adapter

Integration of the SINAMICS web server based on the example of a SINAMICS S210 (New) and the PROFINET interface (X150) as connected web client (e.g. PC, SIMATIC HMI etc.)

5

## Overview

SINAMICS Startdrive is integrated in the TIA Portal and is a tool for the configuration, commissioning and diagnostics of the SINAMICS family of converters.

The SINAMICS Startdrive commissioning tool has been optimized with regard to user friendliness and consistent use of the TIA Portal benefits of a common working environment for PLC, HMI and drives. Time-saving and guided step-by-step commissioning with maximum flexibility is complemented by user-friendly graphic function views for all drive functions, including functional safety (Safety Integrated) and drive-based technology functions (e.g. EPOS). The automatic message display, the powerful real-time trace and the context-sensitive online help make converter diagnostics very easy.

The software packages based on the TIA Portal are harmonized with each other and offer important benefits, the main advantage being a shared project storage. The TIA Portal enables simple integration of SINAMICS converters in your automation solution. Thanks to the standardization of operator actions and the integration in general TIA Portal operating concepts (e.g. UMAC, Openness) as well as standard TIA Portal functions (e.g. Undo/Redo), familiarization is easy both for drive experts as well as SIMATIC users. Special focus is placed on the interaction between SIMATIC and SINAMICS, especially when connecting the SINAMICS drives to SIMATIC technology objects.

## Integration

### Supported frequency converters

SINAMICS Startdrive Basic enables complete commissioning, diagnostics, parameterization, optimization and connection to the PLC for the following SINAMICS converters integrated in SINAMICS Startdrive:

- SINAMICS G120, G120C, G120D, G120P
- SINAMICS G115D
- SINAMICS G130, G150
- SINAMICS G220 (as of V18 SP2 Update 1)
- SINAMICS S120<sup>1)</sup>, S150
- SINAMICS S210 and SINAMICS S210 (New) (as of V18 SP1)
- SINAMICS S200 (as of V18 SP2)
- SINAMICS MV

<sup>1)</sup> Including SINAMICS S220 Smart Line Modules in booksize format as of SINAMICS Startdrive V17 Update 1.

## SINAMICS Startdrive Advanced

With SINAMICS Startdrive Advanced (available as of V15) you benefit from powerful engineering functions that save you considerable time and ultimately costs.

- Safety acceptance test:
  - Guided acceptance test wizard for all drive-based Safety Integrated functions
  - Automatic and safety function-specific generation of traces to analyze the machine behavior
  - Generation of an acceptance report as Excel file (xlsx format, can also be used with OpenOffice)
  - Safety Activation Test
- Improved optimization options in the drive: Extended measuring functions (available for CU320-2 PN/DP and CU310-2 PN as of V5.2 SP3, SINAMICS S210 (New) as of V6.1 and SINAMICS S200 as of V6.2), long-term trace
- Also contains all Startdrive Basic functions
- Only license key required, no additional installation

## New in V19

### Startdrive Basic V19

- Support of the shared device functionality for SINAMICS S210, S120, G220 for separate control of the drives by separate controllers
- Improvement of the library function for individual drive objects in the multi-axis system
- Integration of the decentralised SINAMICS S120M drives
- Unit switching (SI/US/%) for SINAMICS CU3x0-2 based drives (from V19 SP1)
- Integration of the drive version V6.3 for SINAMICS S200 and SINAMICS S210 (New):
  - Introduction of the positioning function EPOS for SINAMICS S210 (New)

### Startdrive Advanced V19

- Long-term trace functionality for CU320-2 PN/DP and CU310-2 PN-based drive units

## Installation versions

SINAMICS Startdrive can be installed as an optional package to SIMATIC STEP 7 or as a stand-alone application (without SIMATIC STEP 7).

## System requirements

The following table shows the recommended hardware and system equipment for the operation of SINAMICS Startdrive.

Hardware	Recommendation
<b>Computer</b>	As of SIMATIC FIELD PG M6 Comfort (or comparable PC)
<b>Processor</b>	Intel Core i5-8400H (2.5 ... 4.2 GHz; 4 cores + hyper-threading; 8 MB Smart Cache)
<b>RAM</b>	16 GB or more (32 GB for large projects)
<b>Hard disk</b>	SSD with at least 50 GB available memory
<b>Screen resolution</b>	15.6" Full HD display (1920 × 1080 or larger)
<b>Operating systems</b>	<ul style="list-style-type: none"> <li>• <b>Microsoft Windows 10 (64 bit)</b> <ul style="list-style-type: none"> <li>- Windows 10 Professional Version 22H2</li> <li>- Windows 10 Enterprise 21H2, 22H2</li> <li>- Windows 10 Enterprise 2016 LTSC</li> <li>- Windows 10 Enterprise 2019 LTSC</li> <li>- Windows 10 Enterprise 2021 LTSC</li> </ul> </li> <li>• <b>Microsoft Windows 11 (64 bit)</b> <ul style="list-style-type: none"> <li>- Windows 11 Home Version 21H2, 22H2</li> <li>- Windows 11 Professional Version 21H2, 22H2</li> <li>- Windows 11 Enterprise 21H2, 22H2</li> </ul> </li> <li>• <b>Microsoft Windows Server (64 bit)</b> <ul style="list-style-type: none"> <li>- Windows Server 2016 Standard (full installation)</li> <li>- Windows Server 2019 Standard (full installation)</li> <li>- Windows Server 2022 Standard (full installation)</li> </ul> </li> </ul>

## Engineering tools

### SINAMICS Startdrive commissioning tool

#### Integration

##### Compatibility with other products

- SINAMICS Startdrive V19 operates with STEP 7, WinCC and Scout TIA V19 in one framework
- SINAMICS Startdrive V19 can be installed on the same computer in parallel with other versions of SINAMICS Startdrive V12 to V18
- SINAMICS Startdrive can be installed on the same computer as SINAMICS MICROMASTER STARTER

##### Supported virtualization platforms

SINAMICS Startdrive can be installed in a virtual machine. For this purpose, one of the following virtualization platforms in the specified version or a newer version can be used:

- VMware vSphere Hypervisor (ESXi) 6.7
- VMware Workstation 15.5.0
- VMware Player 15.5.0
- Microsoft Hyper-V Server 2019

##### Supported safety programs

The following safety programs have been tested with SINAMICS Startdrive V19:

- Virus scanners:
  - Symantec Endpoint Protection 14.6
  - Trend Micro OfficeScan 14.0
  - McAfee Endpoint Security (ENS) 10.6 and 10.7
  - Microsoft Defender
  - Qihoo 360 "Safe Guard 12.1" + "Virus Scanner"
- Encryption software:
  - Microsoft Bitlocker
- Host-based Intrusion Detection System
  - McAfee Application Control 8.3.3

#### Accessories

Depending on the version of the Control Unit (CU), the Control Unit of the drive unit can communicate with the programming device (PG) or PC via PROFIBUS or PROFINET/Ethernet or via a serial interface. The following accessories are available for the particular drive system as listed in the following table.

Recommended accessories For communication between the drive unit and the programming device or PC	
Description	Article No.
<b>SINAMICS S210 (New)</b> • Wi-Fi <b>SINAMICS Smart Adapter</b> <sup>1)</sup> Wi-Fi solution for the next generation of SINAMICS converters SINAMICS S200 <sup>1)</sup> , SINAMICS S210 (New) <sup>1)</sup> and SINAMICS G220	<b>6SL4950-0AJ00-0AA0</b>

#### More information

The SINAMICS Startdrive Basic commissioning tool is available free on the internet at [www.siemens.com/startdrive](http://www.siemens.com/startdrive)

### SINAMICS Migration Tool

#### Overview

##### Support for migration from SINAMICS S210 TIA projects

To update TIA projects with existing SINAMICS S210 and firmware V5.x to SINAMICS S210 (New) with firmware V6.x, the SINAMICS Migration Tool is on hand, offering a convenient way to replace the converters.

Migration tends to take place automatically in offline mode. Parameter assignment and drive networking remain unchanged.

Only the security settings (incl. Safety Integrated) need to be manually set, for the purpose of protecting the project.

The SINAMICS Migration Tool requires the TIA Portal V18 SP1 or higher.

**Overview**

**Keep your business running and shaping your digital future – with Industry Services**

Optimizing the productivity of your equipment and operations can be a challenge, especially with constantly changing market conditions. Working with our service experts makes it easier. We understand your industry's unique processes and provide the services needed so that you can better achieve your business goals.

You can count on us to maximize your uptime and minimize your downtime, increasing your operations' productivity and reliability. When your operations have to be changed quickly to meet a new demand or business opportunity, our services give you the flexibility to adapt. Of course, we take care that your production is protected against cyber threats. We assist in keeping your operations as energy and resource efficient as possible and reducing your total cost of ownership. As a trendsetter, we ensure that you can capitalize on the opportunities of digitalization and by applying data analytics to enhance decision making: You can be sure that your plant reaches its full potential and retains this over the longer lifespan.

You can rely on our highly dedicated team of engineers, technicians and specialists to deliver the services you need – safely, professionally and in compliance with all regulations. We are there for you, where you need us, when you need us.

## Services and documentation

### Industry Services

#### Industry Services – Portfolio overview

##### Overview

#### Digital Industry Services

Digital Industry Services make your industrial processes transparent to gain improvements in productivity, asset availability, and energy efficiency.

Production data is generated, filtered and translated with intelligent analytics to enhance decision-making.

This is done whilst taking data security into consideration and with continuous protection against cyber-attack threats.

[www.siemens.com/digital-enterprise-services](https://www.siemens.com/digital-enterprise-services)

#### Training Services

From the basics and advanced to specialist skills, SITRAIN courses provide expertise right from the manufacturer – and encompass the entire spectrum of Siemens products and systems for the industry.

Worldwide, SITRAIN courses are available wherever you need a training course in more than 170 locations in over 60 countries.

<https://support.industry.siemens.com/cs/ww/en/sc/2226>

#### Support and Consulting Services

**Industry Online Support** site for comprehensive information, application examples, FAQs and support requests.

**Technical and Engineering Support** for advice and answers for all inquiries about functionality, handling, and fault clearance. The Service Card as prepaid support for value added services such as Priority Call Back or Extended Support offers the clear advantage of quick and easy purchasing.

**Information & Consulting Services**, e.g. SIMATIC System Audit; clarity about the state and service capability of your automation system or Lifecycle Information Services; transparency on the lifecycle of the products in your plants.

<https://support.industry.siemens.com/cs/ww/en/sc/2235>

#### Spare Parts

Spare Parts Services are available worldwide for smooth and fast supply of spare parts – and thus optimal plant availability. Genuine spare parts are available for up to ten years. Logistic experts take care of procurement, transport, custom clearance, storage and order management.

Reliable logistics processes ensure that components reach their destination as needed.

Since not all spare parts can be kept in stock at all times, Siemens offers a preventive measure for spare parts provisioning on the customer's premises with optimized **Spare Parts Packages** for individual products, custom-assembled drive components and entire integrated drive trains – including risk consulting.

**Asset Optimization Services** help you design a strategy for parts supply where your investment and carrying costs are reduced and the risk of obsolescence is avoided.

<https://support.industry.siemens.com/cs/ww/en/sc/2110>

#### Repair Services

Repair Services are offered on-site and in regional repair centers for fast restoration of faulty devices' functionality.

Also available are extended repair services, which include additional diagnostic and repair measures, as well as emergency services.

<https://support.industry.siemens.com/cs/ww/en/sc/2154>

#### Field and Maintenance Services

Siemens specialists are available globally to provide expert field and maintenance services, including commissioning, functional testing, preventive maintenance and fault clearance.

All services can be included in customized service agreements with defined reaction times or fixed maintenance intervals.

<https://support.industry.siemens.com/cs/ww/en/sc/2265>

#### Retrofit and Modernization Services

Provide a cost-effective solution for the expansion of entire plants, optimization of systems or upgrading existing products to the latest technology and software, e.g. migration services for automation systems.

Service experts support projects from planning through commissioning and, if desired over the entire extended lifespan, e.g. Retrofit for Integrated Drive Systems for an extended lifetime of your machines and plants.

<https://support.industry.siemens.com/cs/ww/en/sc/2286>

#### Service Programs and Agreements

A technical Service Program or Agreement enables you to easily bundle a wide range of services into a single annual or multi-year agreement.

You pick the services you need to match your unique requirements or fill gaps in your organization's maintenance capabilities.

Programs and agreements can be customized as KPI-based and/or performance-based contracts.

## Online Support for Siemens Industry Products

Siemens Industry and Online Support with some 1.7 million visitors per month is one of the most popular web services provided by Siemens. It is the central access point for comprehensive technical know-how about products, systems and services for automation and drives applications as well as for process industries.

In connection with the challenges and opportunities related to digitalization you can look forward to continued support with innovative offerings.

## Services and documentation

### Training

#### SITRAIN – Digital Industry Academy

##### Introduction

##### *Lern the way you like it – with SITRAIN*

SITRAIN imparts a wide range of technical knowledge for all industries and applications. Our offering is oriented toward the needs of learners and the demands of innovative companies. Get pleasure out of learning - thanks to innovative learning methods, personal support, and knowledge that will help you in your work and further development. For successful, flexible, and continuous learning.

##### *Education and training directly from the manufacturer*

SITRAIN provides you with training from the industrial product and solution portfolio from Siemens and benefits from 30 years of expertise in technical training. Take a look at the many options for expanding your knowledge with SITRAIN and find the course that meets your needs! The following training and further education units are available to you for your individual knowledge building:

##### Industrial Automation Systems SIMATIC

Training available for: SIMATIC S7-1500, TIA Portal, SIMATIC S7-300/400, SIMATIC S7-1200

##### Drive Technology

Training available for: SINAMICS S120 and SINAMICS G120 low-voltage converters, SINAMICS G130 / G150 / G180 / S150

##### SINUMERIK CNC automation system

Training available for: SINUMERIK 840D, SINUMERIK 840D sl and SINUMERIK ONE

##### Process Control Systems

Training available for: SIMATIC PCS 7, SIMATIC PCS neo

##### Digital Enterprise

Training available for: Openness, SIMIT, OPC UA, Industrial Edge, Virtual commissioning

##### Industrial Communications

Training available for: PROFINET, SCALANCE, RUGGEDCOM, Industrial Ethernet, Fieldbus communication, Industrial Security, Remote communication

##### Identification and Locating

Training available for: RFID, RTLS-Systems

##### Operator Control and Monitoring Systems

Training available for: SIMATIC WinCC Unified in TIA Portal, SIMATIC WinCC in TIA Portal, SIMATIC WinCC V7x

##### Motion Control System SIMOTION

Training available for: SIMOTION (Programming, Commissioning, Diagnostics, Service)

##### Smart Infrastructure

Training available for: SIRIUS, SENTRON, SIVACON, ALPHA, SIMOCODE, Circuit breakers

##### Process Analytics & Instrumentation

Training is available for process analytics and instrumentation, explosion protection, process gas chromatographs

##### Additional training offer

SIMOVE with Automated Guided Vehicles (AGV), SIPLUS CMS, Guidelines and standards for control cabinets

**Introduction**

**Different learning formats and methods for maximum learning success**

With our SITRAIN training formats, you learn in the way that best suits your preferences and routine. You decide whether you would rather take online training or face-to-face training. It is up to you whether you would like to study on demand or at fixed times.

With a personal learning consultant, in the team, or on your own – you can explore all the possibilities.

Discover our three learning formats:

**Learning Event**

SITRAIN Learning Events are the perfect choice when you want to achieve a defined learning goal in the shortest possible time. You learn in a protected learning environment outside of the daily work routine under the guidance of a learning consultant - virtually, in the training center, or at your company.

**Learning Membership  
SITRAIN Access**

With SITRAIN access, you enter a world of extensive and constantly expanding self-study units on our digital learning platform for industry. With SITRAIN access, you can implement a modern learning culture in your team or company with independent and continuous learning.

**Learning Journey**

The Learning Journey is the perfect combination of units taken live and self-study units for sustainable learning success. The modular approach enables simple integration into your daily work. This also includes one-year membership for using the SITRAIN access digital learning platform.

<p><b>Live</b> Learn together with others, simultaneously and guided by a learning consultant. Online, in the SITRAIN training center or at your company.</p>	<p><b>Self-reliant</b> Expand your knowledge self-determined with industry learning and work on your learning units at your own pace and according to your own schedule.</p>	<p><b>On demand</b> Get the knowledge you need, exactly when you need it. Be it to answer a current question or to work on a special topic.</p>	<p><b>Individual</b> Talk directly with the learning consultant, clarify detailed questions and get personal coaching for transferring the learned topics to your own application.</p>

### Training

#### SINAMICS S210 training case

##### Overview

SINAMICS S210 training case

The SINAMICS S210 training case (version with 2 axes and PROFINET) is a convincing demonstration system thanks to its compact design. It is suitable for direct presentations as well as for tests in technical departments. The training case enables the functions of SINAMICS S210 servo drive system to be demonstrated and tested quickly and easily.

It contains the following components:

- 2 × SINAMICS S210 servo converters (New), 0.1 kW, 230 V 1 AC
- 2 × SIMOTICS S-1FK2 servomotors, High Dynamic (1 × singleturn, 1 × multiturn, without break)
- 2 × One Cable Connection (OCC) motor connection cable
- Rail, prepared for installation of a controller, e.g. SIMATIC S7-1500 (controller not included in scope of delivery)

The SINAMICS S210 training case is supplied as a trolley with a hood.

##### Technical specifications

SINAMICS S210 training case	6AG1067-1AA33-0AA0
<b>Supply voltage</b>	230 V 1 AC
<b>Dimensions</b>	
• Width	420 mm (16.54 in)
• Height	580 mm (22.83 in)
• Depth	340 mm (13.39 in)
<b>Weight, approx.</b>	21 kg (46.3 lb)

##### Selection and ordering data

Description	Article No.
<b>SINAMICS S210 training case</b>	<b>6AG1067-1AA33-0AA0</b>

### Overview

Our understanding of an application is the customer-specific solution of an automation task based on standard hardware and software components. In this respect, industry knowledge and technological expertise are just as important as expert knowledge about how our products and systems work. We are setting ourselves this challenge with more than 280 application engineers in 20 countries.

#### Application centers

We currently have application centers in:

- Germany: Head Office in Erlangen and in other German regions, e.g. in Munich, Nuremberg, Stuttgart, Mannheim, Frankfurt, Chemnitz, Cologne, Bielefeld, Bremen, Hanover, Hamburg
- Belgium: Brussels
- Brazil: Sao Paulo
- China: Beijing and 12 regions
- Denmark: Ballerup
- France: Paris
- Great Britain: Manchester
- India: Mumbai
- Italy: Bologna, Milan
- Japan: Tokyo, Osaka
- The Netherlands: The Hague
- Austria: Vienna
- Poland: Warsaw
- Sweden: Göteborg
- Switzerland: Zurich, Lausanne
- Spain: Madrid
- South Korea: Seoul
- Taiwan: Taipei
- Turkey: Istanbul
- USA: Atlanta

These application centers specialize in the use of SIMATIC/SIMOTION/SINAMICS. You therefore can rely on automation and drive specialists for implementing successful applications. By involving your personnel at an early stage in the process, we can provide a solid basis for rapid knowledge transfer, maintenance and further development of your automation solution.

#### Advice on applications and implementation

We offer a variety of consultation services to help you find the optimum solution for the SIMATIC/SIMOTION/SINAMICS application you want to implement:

The quotation phase includes

- clarification of technical questions,
- discussion of machine concepts and customer-specific solutions,
- selection of suitable technology and
- suggestions for implementation.

A technical feasibility study is also performed at the outset. In this way, difficult points of the application can be identified and solved early on. We can also configure and implement your application as a complete solution from a single source.

A large number of proven standard applications are available for use during the implementation phase. This saves engineering costs.

The system can be commissioned by experienced, competent personnel, if required. This saves time and trouble.

If servicing is required, we can support you on site or remotely. For further information about servicing, please see the section "Industry Services".

#### On-site application training

Training for the implemented applications can also be organized and carried out on site. This training for machine manufacturers and their customers does not deal with individual products, but the entire hardware and software system (for example, automation, drives and visualization).

From an initial concept to successful installation and commissioning: We provide complete support for SIMATIC/SIMOTION/SINAMICS! Contact your Siemens representative.

You can find further information at [www.siemens.com/machinebuilding](http://www.siemens.com/machinebuilding)

## Services and documentation

### Drives Options Partner

#### Overview

##### Siemens Product Partners for Drives Options

###### Individual options for our drives

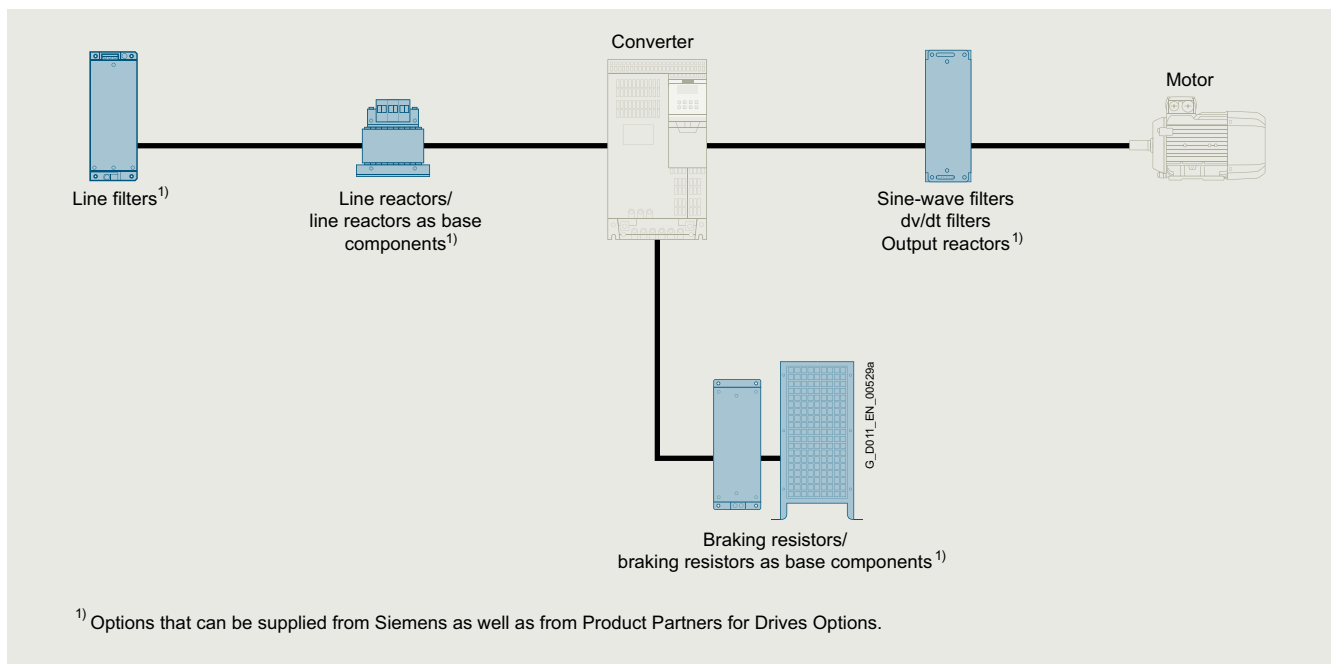

In order to meet as many customer requirements as possible in the field of drive technology, in addition to its own products, Siemens also relies on the individual and complementary services of selected partners.

We are increasingly focusing on the standard drive options, and our Siemens Product Partners for Drives Options supplement our drives with individual drive options.

This gives Siemens a unique flexibility to meet all application requirements. Naturally, we support our Siemens Product Partners for Drives Options in tailoring their options perfectly to our drives.

For you as our customer, there are multiple benefits:

- The Siemens Product Partners for Drives Options meet the same high standards of quality and performance that we place on our own products
- Drive options can be adapted to individual requirements/designs
- The Siemens Product Partners for Drives Options know our Siemens converter portfolio and can advise you individually and quickly

Schematic circuit diagram

#### More information

You can find more information on the internet at [www.siemens.com/drives-options-partner](http://www.siemens.com/drives-options-partner)

### Overview

#### mySupport documentation – Compiling personal documents

mySupport documentation is a web-based system for generating personalized documentation based on standard documents and is part of the Siemens Industry Online Support portal.

In mySupport, a personal document library can be created in the "Documentation" category. This library can be accessed online in mySupport or also be generated in various formats for offline use.

Previously, this functionality was available in the My Documentation Manager for configurable manuals. Due to the integration in mySupport, all entries of the Industry Online Support can now be imported into the personal document library, including FAQs or product notifications.

If you have already worked with the My Documentation Manager, all of the previously created libraries will continue to be available without restrictions in mySupport.

In addition, the personal library in mySupport can be shared with other mySupport users. In this way, a collection of relevant documents can be created very effectively and used together with other mySupport users all over the world.

You must register/log in for configuring and generating/managing.

### Benefits

- Display  
View, print or download standard documents or personalized documents
- Configure  
Transfer standard documents or parts of them to personalized documents
- Generate/Manage  
Generate and manage personalized documents in the formats PDF, RTF or XML in all available languages

### Function

#### Opening mySupport documentation in the Industry Online Support portal

- Via the product support, entry type "Manual":  
<https://support.industry.siemens.com/cs/ww/en/ps/manual>  
By clicking on the required version of the manual and then "Show and configure", the manual opens in a modular view, where you can navigate from topic to topic. Here the direct link to a topic can be used and made available to other users. The selected document can be added to the personal library via "mySupport Cockpit" > "Add to mySupport documentation".
- Via the direct link  
<https://support.industry.siemens.com/my/ww/en/documentation/advanced>  
After logon/registration, the online help is displayed as the current document.

### More information

You can find additional information on the internet at

- <https://support.industry.siemens.com/my/ww/en/documentation>
- [https://support.industry.siemens.com/cs/helpcenter/en/index.htm?#persoenliche\\_bibliothek\\_aufbauen.htm](https://support.industry.siemens.com/cs/helpcenter/en/index.htm?#persoenliche_bibliothek_aufbauen.htm)

## Services and documentation

### Documentation

#### Overview

A high-quality programmable control or drive system can be used to maximum effect only if the user is aware of the performance of the products used as a result of intensive training and good technical documentation.

This is becoming more important due to the shorter innovation cycles of modern automation products and the convergence of electronics and mechanical engineering.

A comprehensive range of documentation is available which includes a Getting Started guide, operating instructions, installation manuals and a list manual.

In addition to technical information for SINUMERIK, SINAMICS, SIMOTION and SIMOTICS, the documentation is available for downloading as a PDF file from the internet:

- SINUMERIK  
<https://support.industry.siemens.com/cs/document/108464614>
- SINAMICS  
<https://support.industry.siemens.com/cs/document/109807358>
- SIMOTION  
<https://support.industry.siemens.com/cs/document/109479653>
- SIMOTICS  
<https://support.industry.siemens.com/cs/document/109813641>

#### Application

##### **Explanations of the manuals:**

- **Operating Instructions**  
contain all the information needed to install the device and make electrical connections, information about commissioning and a description of the converter functions.  
Phases of use: Control cabinet construction, commissioning, operation, maintenance and servicing.
- **Hardware Installation Manual**  
contains all relevant information about the intended use of the components of a system (technical specifications, interfaces, dimensional drawings, characteristics, or possible applications), information about installation and electrical connections and information about maintenance and servicing.  
Phases of use: Control cabinet configuration/construction, maintenance and servicing.
- **Operating and Installation Instructions**  
(for converter and accessories)  
contain all relevant information about the intended use of the components, such as technical specifications, interfaces, dimensional drawings, characteristics, or possible applications.  
Phases of use: Control cabinet configuration/construction.
- **Manual/Configuration Manual**  
contains all necessary information about the intended use of the components of a system, e.g. technical specifications, interfaces, dimensional drawings, characteristics, or possible applications.  
Phases of use: Cabinet configuration/setup, circuit diagram configuration/drawing.
- **Commissioning Manual**  
contains all information relevant to commissioning after installation and wiring. It also contains all safety and warning notices relevant to commissioning in addition to overview drawings.  
Phases of use: Commissioning of components that have already been connected, configuration of system functions.
- **List Manual**  
contains all parameters, function diagrams, and faults/alarms for the product/system as well as their meanings and setting options. It contains parameter data and fault/alarm descriptions with functional correlations.  
Phases of use: Commissioning of components that have already been connected, configuration of system functions, fault cause/diagnosis.
- **Getting Started**  
provides information about getting started for the first-time user as well as references to additional information. It contains information about the basic steps to be taken during commissioning. The information in the other documentation should be carefully observed for all of the other work required.  
Phases of use: Commissioning of components that have already been connected.
- **Function Manual Drive Functions**  
contains all the relevant information about individual drive functions: Description, commissioning and integration in the drive system.  
Phases of use: Commissioning of components that have already been connected, configuration of system functions.

**Overview**

<b>Decentralization with PROFIBUS DP/DPV1</b> <ul style="list-style-type: none"> <li>• German</li> <li>• English</li> </ul>	Via bookstore  <b>ISBN 978-3-89578-189-6</b> <b>ISBN 978-3-89578-218-3</b>
<b>Automating with PROFINET: Industrial Communication Based on Industrial Ethernet</b> <ul style="list-style-type: none"> <li>• German</li> <li>• English</li> </ul>	Via bookstore  <b>ISBN 978-3-89578-293-0</b> <b>ISBN 978-3-89578-294-7</b>

**SINAMICS S210 documentation****Overview**

A **Quick Installation Guide** is supplied in hard copy form in English and Turkish with every SINAMICS S210.

Identification link according to IEC 61406 for SINAMICS S210 (New)

The ID link contains the article and serial number of the product. As a QR code, it replaces the previous data matrix code on the nameplate and takes you with the URL directly to a product information page on the internet with access to the technical documentation, data sheet, certificates, FAQs, product notifications, and catalogs. Paper package inserts become superfluous since the information is available electronically directly via the QR code, even years later. In this way, we are making a valuable contribution to the preservation of our environment. You don't need an additional app. Simply scan the QR code with your smartphone or tablet. According to IEC 61406, the QR code of an ID link is marked with a frame and a triangle at the bottom right.

With their globally unique identifiers, Siemens products are ready for Industry 4.0.

The ID serves as a connection to the administration shell with which modules of the digital twin can be provided.

Further documentation, such as the operating instructions, is available free on the internet at:

[www.siemens.com/sinamics-s210/documentation](http://www.siemens.com/sinamics-s210/documentation)

Detailed information on the SINAMICS S210 drive system, including the latest technical documentation (brochures, tutorials, dimensional drawings, certificates, manuals and operating instructions), is available on the internet at:

[www.siemens.com/sinamics-s210](http://www.siemens.com/sinamics-s210)

and is also available via the Siemens Product Configurator on the internet.

The Siemens Product Configurator can be found in SiePortal at the following address:

[www.siemens.com/sinamics-s210/configuration](http://www.siemens.com/sinamics-s210/configuration)

### Certificates of suitability (approvals)

#### Overview

Many of the products in this catalog fulfill requirements, e.g. for UL, CSA or FM and are labeled with the corresponding approval designation.

All of the certificates of suitability, approvals, certificates, declarations of conformity, test certificates, e.g. CE, UL, Safety Integrated etc. have been performed with the associated system components as they are described in the Catalogs and Configuration Manuals.

The certificates are only valid if the products are used with the described system components, are installed according to the Installation Guidelines and used for their intended purpose.

In other cases, the vendor of these products is responsible for arranging for the issue of new certificates.

## Appendix

### Software licenses

#### Overview

##### Software types

Software requiring a license is categorized into types. The following software types have been defined:

- Engineering software
- Runtime software

##### Engineering software

This includes all software products for creating (engineering) user software, e.g. for configuring, programming, parameterizing, testing, commissioning or servicing.

Data generated with engineering software and executable programs can be duplicated for your own use or for use by third-parties free-of-charge.

##### Runtime software

This includes all software products required for plant/machine operation, e.g. operating system, basic system, system expansions, drivers, etc.

The duplication of the runtime software and executable programs created with the runtime software for your own use or for use by third-parties is subject to a charge.

You can find information about license fees according to use in the ordering data (e.g. in the catalog). Examples of categories of use include per CPU, per installation, per channel, per instance, per axis, per control loop, per variable, etc.

Information about extended rights of use for parameterization/configuration tools supplied as integral components of the scope of supply can be found in the readme file supplied with the relevant product(s).

##### License types

Siemens Digital Industries and Smart Infrastructure offers various types of software license:

- Floating license
- Single license
- Rental license
- Rental floating license
- Trial license
- Demo license
- Demo floating license

##### Floating license

The software may be installed for internal use on any number of devices by the licensee. Only the concurrent user is licensed. The concurrent user is the person using the program. Use begins when the software is started. A license is required for each concurrent user.

##### Single license

Unlike the floating license, a single license permits only one installation of the software per license.

The type of use licensed is specified in the ordering data and in the Certificate of License (CoL). Types of use include for example per instance, per axis, per channel, etc.

One single license is required for each type of use defined.

##### Rental license

A rental license supports the "sporadic use" of engineering software. Once the license key has been installed, the software can be used for a specific period of time (the operating hours do not have to be consecutive).

One license is required for each installation of the software.

##### Rental floating license

The rental floating license corresponds to the rental license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

##### Trial license

A trial license supports "short-term use" of the software in a non-productive context, e.g. for testing and evaluation purposes. It can be transferred to another license.

##### Demo license

The demo license support the "sporadic use" of engineering software in a non-productive context, for example, use for testing and evaluation purposes. It can be transferred to another license. After the installation of the license key, the software can be operated for a specific period of time, whereby usage can be interrupted as often as required.

One license is required per installation of the software.

##### Demo floating license

The demo floating license corresponds to the demo license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

##### Certificate of License (CoL)

The CoL is the licensee's proof that the use of the software has been licensed by Siemens. A CoL is required for every type of use and must be kept in a safe place.

##### Downgrading

The licensee is permitted to use the software or an earlier version/release of the software, provided that the licensee owns such a version/release and its use is technically feasible.

##### Delivery versions

Software is constantly being updated. The following delivery versions

- PowerPack
- Upgrade

can be used to access updates.

Existing bug fixes are supplied with the ServicePack version.

##### PowerPack

PowerPacks can be used to upgrade to more powerful software. The licensee receives a new license agreement and CoL (Certificate of License) with the PowerPack. This CoL, together with the CoL for the original product, proves that the new software is licensed.

A separate PowerPack must be purchased for each original license of the software to be replaced.

##### Upgrade

An upgrade permits the use of a new version of the software on the condition that a license for a previous version of the product is already held.

The licensee receives a new license agreement and CoL with the upgrade. This CoL, together with the CoL for the previous product, proves that the new version is licensed.

A separate upgrade must be purchased for each original license of the software to be upgraded.

## Overview

### **ServicePack**

ServicePacks are used to debug existing products. ServicePacks may be duplicated for use as prescribed according to the number of existing original licenses.

### **License key**

Siemens Digital Industries and Smart Infrastructure supplies software products with and without license keys.

The license key serves as an electronic license stamp and is also the "switch" for activating the software (floating license, rental license, etc.).

The complete installation of software products requiring license keys includes the program to be licensed (the software) and the license key (which represents the license).

### **Software Update Service (SUS)**

As part of the SUS contract, all software updates for the respective product are made available to you free of charge for a period of one year from the invoice date. The contract will automatically be extended for one year if it is not canceled three months before it expires.

The possession of the current version of the respective software is a basic condition for entering into an SUS contract.

You can download explanations concerning license conditions from [https://mall.industry.siemens.com/legal/ww/en/terms\\_of\\_trade\\_en.pdf](https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf)

## Appendix

### Metal surcharges

#### Explanation of the raw material/metal surcharges <sup>1)</sup>

##### Surcharge calculation

To compensate for variations in the price of the raw materials silver, copper, aluminum, lead, gold, dysprosium <sup>2)</sup> and/or neodym <sup>2)</sup>, surcharges are calculated on a daily basis using the so-called metal factor. These apply to products containing these raw materials and are calculated per raw material. These surcharges are added to the price of a product if the basic official price (BOP) of the raw material in question is exceeded. Surcharges are calculated in accordance with the following criteria:

##### Basic official price (BOP) of the raw material

- BOP of the workday prior to receipt of the order or prior to release order (Daily Price) for:
  - Silver (processed) <sup>3)</sup>
  - Gold (processed) <sup>3)</sup>
  - Aluminum (temporary constant 360.31 EUR per 100 kg, due to loss of DEL-Notiz)
  - Lead (constant 199.50 EUR per 100 kg)
- BOP of two workdays prior to receipt of the order or prior to release order (Daily Price) per 100 kg for:
  - Copper (LME-notation/10, converted from USD to EUR using LME-FX-Rate [MTLE] + 1.2%) + 1% <sup>4)</sup>
- If BOP is suspended, the last one is used.

##### Metal factor of the products

Certain products are displayed with a metal factor. The metal factor determines the official price (for those raw materials concerned) as of which the metal surcharges are applied and the calculation method used (weight or percentage method). An exact explanation is given below.

##### Structure of the metal factor

Metal factor consists of several digits; the first digit indicates whether the percentage method of calculation refers to the list price or a discounted price (customer net price) (L = list price / N = customer net price).

The remaining digits indicate the method of calculation used for the respective raw material. If no surcharge is added for a raw material, a "-" is used.

1st digit	List or customer net price using the percentage method
2nd digit	for silver (AG)
3rd digit	for copper (CU)
4th digit	for aluminum (AL)
5th digit	for lead (PB)
6th digit	for gold (AU)
7th digit	for dysprosium (Dy) <sup>2)</sup>
8th digit	for neodym (Nd) <sup>2)</sup>

##### Weight method

The weight method uses the BOP, the daily price and the raw material weight. In order to calculate the surcharge, the BOP must be subtracted from the daily price. The difference is then multiplied by the raw material weight.

The BOP can be found in the table below using the number (1 to 9) of the respective digit of the metal factor. The raw material weight can be found in the respective product descriptions.

##### Percentage method

Use of the percentage method is indicated by the letters A-Z at the respective digit of the metal factor.

The surcharge is increased - dependent on the deviation of the daily price compared with the BOP - using the percentage method in "steps" and consequently offers surcharges that remain constant within the framework of this "step range". A higher percentage rate is charged for each new step. The respective percentage level can be found in the table below.

##### Metal factor examples

<b>L E A - - - - -</b>	<ul style="list-style-type: none"> <li>Basis for % surcharge: List price</li> <li>Silver Basis 150 €, Step 50 €, 0.5 %</li> <li>Copper Basis 150 €, Step 50 €, 0.1 %</li> <li>No surcharge for aluminum</li> <li>No surcharge for lead</li> <li>No surcharge for gold</li> <li>No surcharge for dysprosium</li> <li>No surcharge for neodym</li> </ul>

## Explanation of the raw material/metal surcharges for dysprosium and neodym (rare earths)

### Surcharge calculation

To compensate for variations in the price of the raw materials silver <sup>1)</sup>, copper <sup>1)</sup>, aluminum <sup>1)</sup>, lead <sup>1)</sup>, gold <sup>1)</sup>, dysprosium and/or neodym, surcharges are calculated on a daily basis using the so-called metal factor. This applies to products containing at least one of these raw materials. The surcharge for dysprosium and neodym is calculated as a supplement to the price of a product if the basic official price (BOP) of the raw material in question is exceeded.

The surcharge is calculated in accordance with the following criteria:

- Basic official price (BOP) of the raw material <sup>2)</sup>  
Three-month basic average price (see below) in the period before the quarter in which the order was received or the release order took place (average official price) for  
- Dysprosium (Dy metal, 99 % min. FOB China; USD/kg)  
- Neodym (Nd metal, 99 % min. FOB China; USD/kg)
- Metal factor of the products  
Certain products are displayed with a metal factor. The metal factor indicates (for those raw materials concerned) the BOP as of which the surcharges for dysprosium and neodym are calculated using the weight method. An exact explanation of the metal factor is given below.

### Three-month average price

The prices of rare earths vary according to the foreign currency, and there is no freely accessible stock exchange listing. This makes it more difficult for all parties involved to monitor changes in price. In order to avoid continuous adjustment of the surcharges, but to still ensure fair, transparent pricing, an average price is calculated over a three-month period using the average monthly foreign exchange rate from USD to EUR (source: European Central Bank). Since not all facts are immediately available at the start of each month, a one-month buffer is allowed before the new average price applies.

Examples of calculation of the average official price:

Period for calculation of the average price:	Period during which the order/release order is effected and the average price applies:
Sep 2012 - Nov 2012	Q1 in 2013 (Jan - Mar)
Dec 2012 - Feb 2013	Q2 in 2013 (Apr - Jun)
Mar 2013 - May 2013	Q3 in 2013 (Jul - Sep)
Jun 2013 - Aug 2013	Q4 in 2013 (Oct - Dec)

### Structure of the metal factor

The metal factor consists of several digits; the first digit is not relevant to the calculation of dysprosium and neodym.

The remaining digits indicate the method of calculation used for the respective raw material. If no surcharge is added for a raw material, a "-" is used.

1st digit	List or customer net price using the percentage method
2nd digit	for silver (AG) <sup>1)</sup>
3rd digit	for copper (CU) <sup>1)</sup>
4th digit	for aluminum (AL) <sup>1)</sup>
5th digit	for lead (PB) <sup>1)</sup>
6th digit	for gold (AU) <sup>1)</sup>
7th digit	for dysprosium (Dy)
8th digit	for neodym (Nd)

### Weight method

The weight method uses the basic official price, the average price and the raw material weight. In order to calculate the surcharge, the BOP must be subtracted from the average price. The difference is then multiplied by the raw material weight.

The basic official price can be found in the table below using the number (1 to 9) of the respective digit of the metal factor. Your Sales contact can inform you of the raw material weight.

### Metal factor examples

<sup>1)</sup> For a different method of calculation, refer to the separate explanation for these raw materials on the previous page.

## 1. General Provisions

By using this catalog you can purchase hard- and software products as well as services (together hereinafter referred to as "products") described therein from Siemens Aktiengesellschaft subject to the following Terms and Conditions of Sale and Delivery (hereinafter referred to as "T&C"). Note, for products purchased from any Siemens entity having a registered office outside of Germany, the respective terms and conditions of sale and delivery of the respective Siemens entity apply exclusively. The following T&C apply exclusively for orders placed with Siemens Aktiengesellschaft, Germany.

### 1.1 For customers with a seat or registered office in European Union

For customers with a seat or registered office in European Union, the following terms and conditions apply subordinate to T&C:

- for products, which include specific terms and conditions in the text of the product description, these specific terms and conditions shall apply and subordinate thereto,,
- for stand-alone software products and software products forming a part of a product or project, the "General Conditions for Software Products for Infrastructure & Industry Business (German law)"<sup>1)</sup> and/or
- for consulting services the "Allgemeine Geschäftsbedingungen für Beratungsleistungen für Infrastructure & Industry Geschäft (Deutsches Recht)"<sup>1)</sup> (available only in German) and/or
- for other services, the „Supplementary Terms and Conditions for Services for Infrastructure & Industry Business (German Law) ("BL")"<sup>1)</sup> and/or
- for other products the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry"<sup>1)</sup>.  
In case such products should contain Open Source Software, the conditions of which shall prevail over the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry"<sup>1)</sup>, the Product will be given a note as to which special conditions apply to this open source software. This shall apply mutatis mutandis for notices referring to other third-party software components.

### 1.2 For customers with a seat or registered office outside European Union

For customers with a seat or registered office outside European Union, the following terms and conditions apply subordinate to T&C:

- for products, which include specific terms and conditions in the description text, these specific terms and conditions shall apply and subordinate thereto,
- for consulting services the "Standard Terms and Conditions for Consulting Services for Infrastructure & Industry Business (Swiss Law)"<sup>1)</sup> and/or
- for other services the "International Terms & Conditions for Services"<sup>1)</sup> supplemented by "Software Licensing Conditions"<sup>1)</sup> and/or
- for other products the "International Terms & Conditions for Products"<sup>1)</sup> supplemented by "Software Licensing Conditions"<sup>1)</sup>

### 1.3 For customers with master or framework agreement

To the extent products offered are covered by an existing master or framework agreement, the terms and conditions of that agreement shall apply instead of T&C.

## 2. Prices

The prices are in € (Euro) ex point of delivery, exclusive of packaging.

The sales tax (value added tax) is not included in the prices. It shall be charged separately at the respective rate according to the applicable statutory legal regulations.

Prices are subject to change without prior notice. We will charge the prices valid at the time of delivery.

To compensate for variations in the price of raw materials (e.g. silver, copper, aluminum, lead, gold, dysprosium and neodym), surcharges are calculated on a daily basis using the so-called metal factor for products containing these raw materials.

A surcharge for the respective raw material is calculated as a supplement to the price of a product if the basic official price of the raw material in question is exceeded.

The metal factor of a product indicates the basic official price (for those raw materials concerned) as of which the surcharges on the price of the product are applied, and with what method of calculation. The metal factor, provided it is relevant, can be found in the respective product description.

You will find a detailed explanation of the metal factor on the page headed "Metal surcharges".

To calculate the surcharge (except in the cases of copper, dysprosium and neodym), the official price from the day prior to that on which the order was received or the release order was effected is used.

To calculate the surcharge applicable to copper, the official price from two days prior to that on which the order was received or the release order was effected is used.

To calculate the surcharge applicable to dysprosium and neodym ("rare earths"), the corresponding three-month basic average price in the quarter prior to that in which the order was received or the release order was effected is used with a one-month buffer (details on the calculation can be found in the explanation of the metal factor).

## 3. Additional Terms and Conditions

The dimensions are in mm. In Germany, according to the German law on units in measuring technology, data in inches apply only to devices for export.

Illustrations are not binding.

Insofar as there are no remarks on the individual pages of this catalog – especially with regard to data, dimensions and weights given – these are subject to change without prior notice.

## Appendix

### Conditions of sale and delivery

#### 4. Export Control and Sanctions Compliance

##### 4.1 General

Customer shall comply with all applicable sanctions, embargoes and (re-)export control laws and regulations, and, in any event, with those of the European Union, the United States of America and any locally applicable jurisdiction (collectively "Export Regulations").

##### 4.2 Checks for Products

Prior to any transaction by customer concerning products (including hardware, documentation and technology) delivered by Siemens, or products (including maintenance and technical support) performed by Siemens with a third party, customer shall check and certify by appropriate measures that

- (i) the customer's use, transfer, or distribution of such products, the brokering of contracts or the provision of other economic resources in connection with products will not be in violation of any Export Regulations, also taking into account any prohibitions to circumvent these (e.g., by undue diversion)
- (ii) the products are not intended or provided for prohibited or unauthorized non-civilian purposes (e.g. armaments, nuclear technology, weapons, or any other usage in the field of defense and military);
- (iii) customer has screened all direct and indirect parties involved in the receipt, use, transfer, or distribution of the products against all applicable restricted party lists of the Export Regulations concerning trading with entities, persons and organizations listed therein and
- (iv) products within the scope of items-related restrictions, as specified in the respective annexes to the Export Regulations, will not, unless permitted by the Export Regulations, be
  - (a) exported, directly or indirectly (e.g., via Eurasian Economic Union (EAEU) countries), to Russia or Belarus, or
  - (b) resold to any third party business partner that does not take a prior commitment not to export such products to Russia or Belarus.

##### 4.3 Non-Acceptable Use of Software and Cloud Services

Customer shall not, unless permitted by the Export Regulations or respective governmental licenses or approvals,

- (i) download, install, access or use the products from or in any location prohibited by or subject to comprehensive sanctions or subject or to license requirements according to the Export Regulations;
  - (ii) grant access to, transfer, (re-)export (including any "deemed (re-)exports"), or otherwise make available the products to any entity, person, or organization identified on a restricted party list of the Export Regulations;
  - (iii) use the products for any purpose prohibited by the Export Regulations (e.g. use in connection with armaments, nuclear technology or weapons);
  - (iv) upload to a products platform any customer content unless it is non-controlled (e.g. in the EU: AL = N; in the U.S.: ECCN = N or EAR99);
  - (v) facilitate any of the afore mentioned activities by any user.
- Customer shall provide all users with all information necessary to ensure compliance with the Export Regulations.

##### 4.4 Semiconductor Development

Customer will not, without advance written authorization from Siemens, use offerings for the development or production of integrated circuits at any semiconductor fabrication facility located in China meeting the criteria specified in the U.S. Export Administration Regulations, 15 C.F.R. 744.23.

##### 4.5 Information

Upon request by Siemens, customer shall promptly provide Siemens with all information pertaining to users, the intended use and the location of use or the final destination (in the case of hardware, documentation and technology) of the products. Customer will notify Siemens prior to customer disclosing any information to Siemens that is defense-related or requires controlled or special data handling pursuant to applicable government regulations, and will use the disclosure tools and methods specified by Siemens.

##### 4.6 Reservation

Siemens shall not be obligated to fulfill this agreement if such fulfillment is prevented by any impediments arising out of national or international foreign trade or customs requirements or any embargoes or other sanctions. Customer acknowledges that Siemens may be obliged under the Export Regulations to limit or suspend access by customer and/or users to products.

#### 5. Miscellaneous

Errors excepted and subject to change without prior notice.

# Selection and ordering at Siemens SiePortal – Ordering products and downloading catalogs

## Easy product selection and ordering with SiePortal

### SiePortal > Products & Services

The internet ordering platform of Siemens AG is located in SiePortal. It provides you with online access to a comprehensive product spectrum that is presented in an informative, well-organized way.

Powerful search functions help you select the required products, while configurators enable you to configure complex product and system components quickly and easily. CAx data are also available for you to use.

Data transfer allows the entire procedure, from selection through ordering to tracking and tracing, to be carried out online. Availability checks, individual customer discounting, and quotation preparation are also possible.

<https://sieportal.siemens.com>

## Downloading catalogs

### SiePortal > Support > Knowledge base

You can download catalogs and brochures in PDF format from Siemens Industry Online Support without having to register.

The filter box makes it possible to perform targeted searches.

<https://sieportal.siemens.com>

### Cybersecurity information

Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept.

Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place.

For additional information on industrial cybersecurity measures that may be implemented, please visit

[www.siemens.com/cybersecurity-industry](http://www.siemens.com/cybersecurity-industry)

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under

[www.siemens.com/cert](http://www.siemens.com/cert)

Subject to changes and errors. The information given in this document only contains general descriptions and/or performance features which may not always specifically reflect those described, or which may undergo modification in the course of further development of the products. The requested performance features are binding only when they are expressly agreed upon in the concluded contract.
